Where it stands

Its grades against its category, and whether to keep it or make your own

11/72

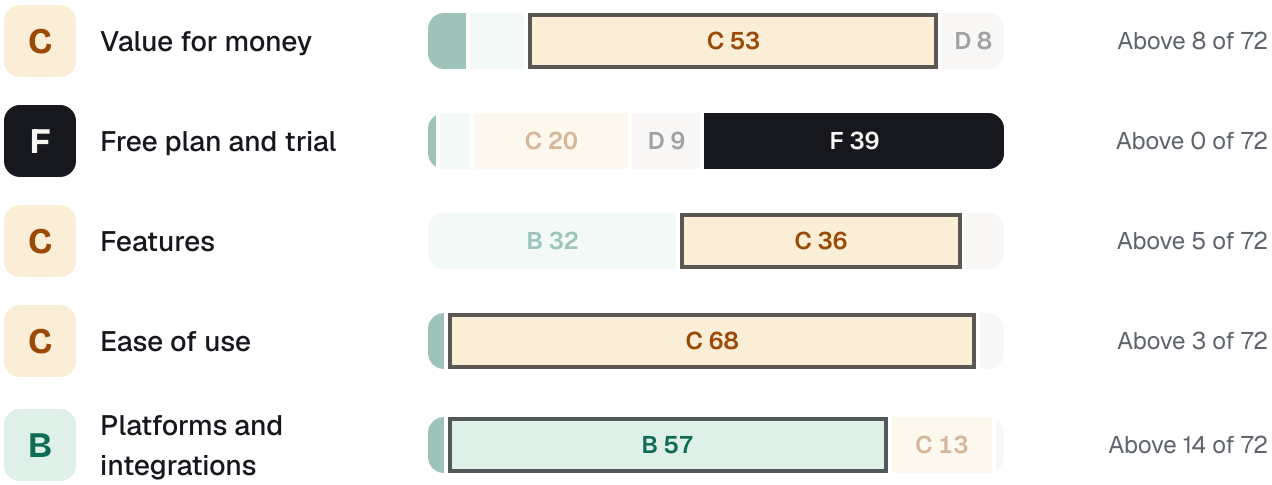

Other inventory management tools it is graded above

Marg ERP's GPA of 1.8 is higher than 11 of the 72 other inventory management tools we grade, and level with 16.

It stands best on platforms and integrations (B, above 14 of 72) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 73 inventory management tools we grade, cut by the letter each got. Marg ERP's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Marg ERP you would be making live feeds from your bank, which take an agreement with each bank or a service that has them. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 45 of the 72 other inventory management tools grade higher.

What you could make

- Inventory, invoicing and reports: an app builder makes these well.

What you could not

- Live feeds from your bank, which take an agreement with each bank or a service that has them.
- Scanning barcodes with a phone camera or a scanner.
- It plugs into other products, Axis Bank, ICICI Bank and IndusInd Bank among them.

What this rests on. Marg ERP's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
