Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

A read-later list at its plainest is saved links with tags.

You could make the core of Meco for yourself: bookmarks and highlights. What you would give up is listed below. Whether that is worth the price is your call. It costs $39.99 a year.

What you could make

- Bookmarks and highlights: an app builder makes these well.

What you could not

- A real app for iOS and Android. Something home-made would be a web page.

- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Meco's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
