PART 04 · STANDING

Medesk's GPA of 2.4 is higher than 46 of the 60 other therapy and clinic software we grade, and level with 9.

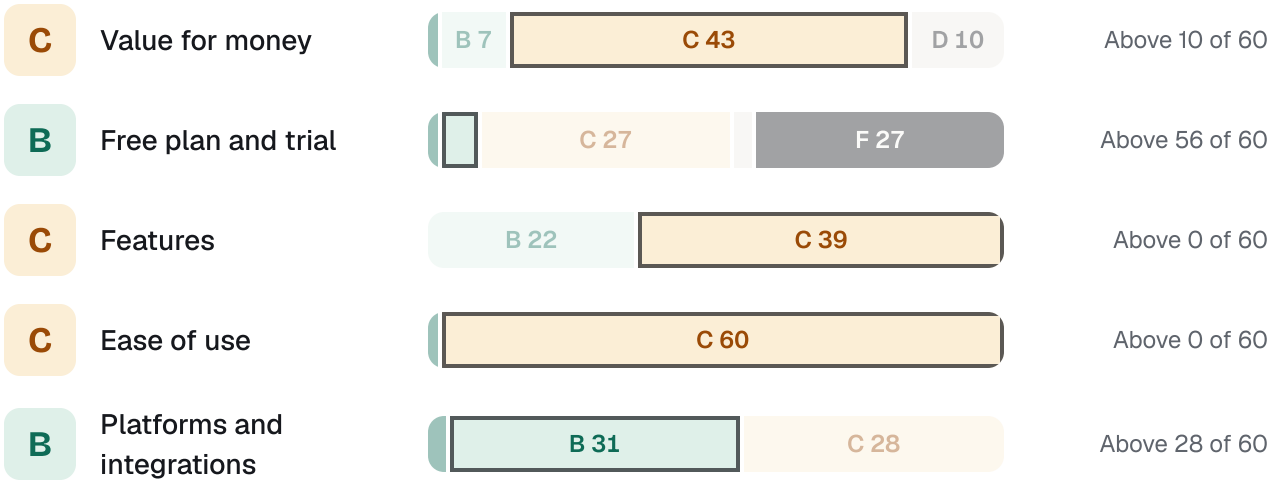

It stands best on free plan and trial (B, above 56 of 60) and worst on features (C, above 0).

Its paid plans start at $28 a month, against a middle price of $35.75 for the category: 10 of the 32 others that charge start lower.

Each grade against the category

Every bar is all 61 therapy and clinic software we grade, cut by the letter each got. Medesk's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Medesk you would be making video sessions that meet health privacy rules. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.4 is higher than 46 of the 60 other therapy and clinic software we grade. It costs $336 a year.

What you could make

- Appointment booking, clinical notes, invoicing and reports: an app builder makes these well.

What you could not

- Video sessions that meet health privacy rules.
- Sharing with other people, which means accounts and invitations.

What this rests on. Medesk's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
