PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

22/114

Other calendar and scheduling apps it is graded above

meetergo's GPA of 2.2 is higher than 22 of the 114 other calendar and scheduling apps we grade, and level with 23.

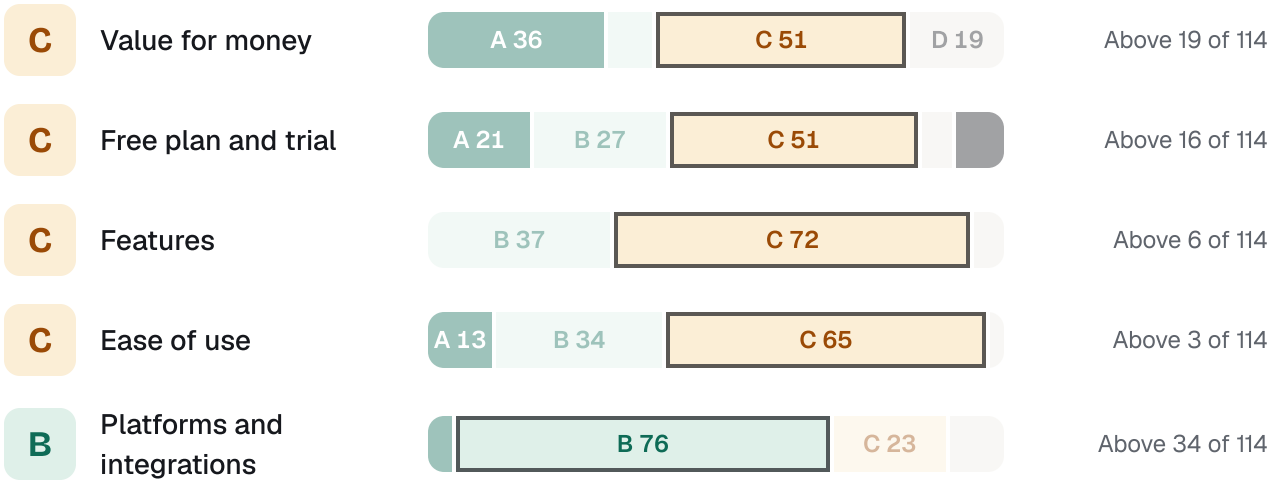

It stands best on platforms and integrations (B, above 34 of 114) and worst on ease of use (C, above 3).

Its paid plans start at about $11.53 a month for each person, against a middle price of $8.13 for the category: 58 of the 85 others that charge start lower.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace meetergo you would be making one mailbox that several people work at once. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 69 of the 114 other calendar and scheduling apps grade higher. It costs $138.35 a year.

What you could make

- Appointment booking and calendar: an app builder makes these well.

What you could not

- One mailbox that several people work at once.

- ✕ Booking pages that read and write other people's calendars and send the emails.
- ✕ It is priced for each person, which means accounts and billing for a team.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. meetergo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
