07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Mem0's own pages, its app-store listings and our grades. Every fact in it is on Mem0's page too, where it is kept up to date. Checked Nov 12, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.6

GPA, above 70 of the 101 other AI agents we grade

Mem0 is a memory service for AI agents and apps. Developers add conversation messages through an SDK or API, and Mem0 stores condensed memories per user that the agent can search in later sessions. It is offered as a hosted platform and as an open-source version that runs on your own servers.

To get you started, here are **8 things to know about Mem0**, taken from its own pages and our grades.

> "
>
> **No store rating, and you add it to your own agent through SDKs or an MCP server.**
>
> From our grade for ease of use

1 **Best for adding long-term memory to an AI agent through code**

Mem0 is a memory layer that lets agents remember users across sessions, with SDKs in Python and JavaScript and an open-source version.

2 **There is a free plan**

Unlimited end users; 10,000 adds and 1,000 retrievals a month for the first 30 days, or 50,000 adds and 10,000 retrievals a month with your own LLM key.

3 It runs on Web

Web.

4 Persistent memory

Messages are added per user and searched later, so an agent can recall preferences and facts across sessions.

5 Memory compression

The vendor says chat history is condensed into compact memories to cut tokens and latency.

6 Python and JavaScript SDKs

A few lines of code add and search memories, and the docs include setup guides for 22 frameworks and tools such as LangChain, CrewAI and the Vercel AI SDK.

7 A 2.6 GPA, above 70 of 101

That is against the other AI agents we grade, on value, the free plan, features, ease of use and platforms.

8 Keep it

To replace Mem0 you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

Mem0 at a glance

PRICING Free plan	FREE PLAN Yes

OUR GRADE 2.6 GPA, good	

The report card

Best for adding long-term memory to an AI agent through code

Mem0 is a memory layer that lets agents remember users across sessions, with SDKs in Python and JavaScript and an open-source version. The Free plan's hosted limits shrink after 30 days unless you add your own LLM key, and the paid plan has no published price.

TOOLGPA REPORT CARD	Mem0	Graded Nov 12, 2026
SUBJECT	GRADE	COMMENT
Value for money	A	An open-source version you can run yourself, and a Free plan with unlimited end users. The only other plan is Custom, with no price shown.
Free plan and trial	B	Free gives 10,000 adds and 1,000 retrievals a month for 30 days, then 50,000 adds and 10,000 retrievals with your own LLM key.
Features	C	It does the memory job fully but only that job. Graph memory, user profiles, analytics and SSO are Custom only.
Ease of use	D	No store rating, and you add it to your own agent through SDKs or an MCP server.
Platforms and integrations	B	Web, with Python and JavaScript SDKs and LangChain, CrewAI, LlamaIndex, Claude Code and Cursor listed.
Grade point average		Good, out of 4.0 **2.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Mem0 is for

- ✓ Fits if you are a developer who wants your agent to remember users
- ✓ Works for teams already on LangChain, CrewAI or the Vercel AI SDK

Who it is not for

- ✗ Skip it if you want a finished agent, as it is only the memory part
- ✗ Tight if you stay free, since after 30 days hosted model calls need your own LLM key
- ✗ Not for you if you need graph memory or SSO, because those are Custom only
- ✗ Watch out: usage past the free limits is billed, but the page states no rates

Good to know

Good for

- ✓ Developers adding long-term memory to chatbots, support agents and voice agents
- ✓ Teams that want to self-host memory for data-control reasons
- ✓ Builders who can bring their own LLM key to get higher free limits

Worth knowing

- ⓘ The pricing page shows only a Free plan and a Custom plan; the price of Custom is not published.
- ⓘ The Free plan includes 10,000 adds and 1,000 retrievals for the first 30 days with model calls on Mem0; after that you supply your own LLM key.
- ⓘ Graph memory, user profiles, advanced analytics, SSO, audit logs and on-prem deployment are limited to Custom.
- ⓘ Past the free limits, usage is billed, but the page does not state the rates.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

2

plans to choose from

Mem0 has a free plan.

> **An open-source version you can run yourself, and a Free plan with unlimited end users.**
>
> From our grade for value for money

FREE

$0

Unlimited end users, community support, and usage-based billing past the limits with a monthly cap you set.

CUSTOM

Custom

Limits set to your volume, graph memory, user profiles, advanced analytics, private Slack support, SSO, audit logs, SLA and on-prem deployment.

The free plan

Unlimited end users; 10,000 adds and 1,000 retrievals a month for the first 30 days, or 50,000 adds and 10,000 retrievals a month with your own LLM key.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Memory layer that lets AI agents remember across sessions. Here is what it does, as its own site describes it, and what it covers: open source, self-hostable, public API, AI features, AI agents.

> **It does the memory job fully but only that job.**

From our grade for features

Persistent memory

Messages are added per user and searched later, so an agent can recall preferences and facts across sessions.

Memory compression

The vendor says chat history is condensed into compact memories to cut tokens and latency.

Python and JavaScript SDKs

A few lines of code add and search memories, and the docs include setup guides for 22 frameworks and tools such as LangChain, CrewAI and the Vercel AI SDK.

Coding-agent plugins and MCP

Guides cover adding memory to Claude Code, Cursor, Codex and other coding agents, and an MCP integration is listed.

Graph memory and user profiles

Entity linking and user profiles are listed on the Custom plan only.

Open-source version

The same memory layer can run as a library or a Docker stack on your own infrastructure under an Apache-2.0 license.

LlamaIndex
Vercel AI SDK
Claude Code
Cursor
Codex

Mem0 is made by Mem0.

Where it stands

Its grades against its category, and whether to keep it or make your own

70/101

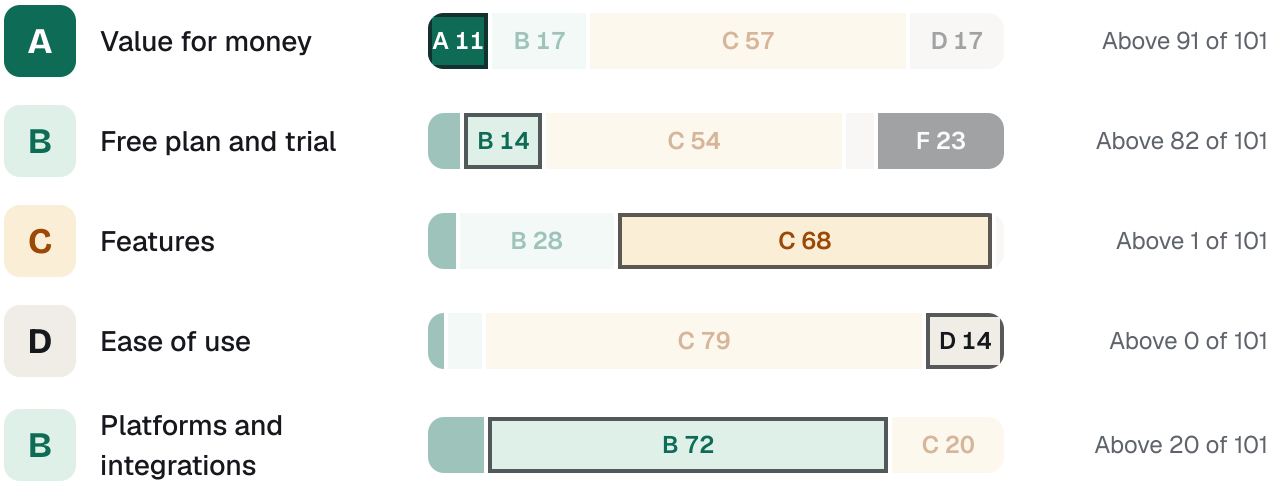

Other AI agents it is graded above

Mem0's GPA of 2.6 is higher than 70 of the 101 other AI agents we grade, and level with 17.

It stands best on value for money (A, above 91 of 101) and worst on ease of use (D, above 0).

Each grade against the category

Every bar is all 102 AI agents we grade, cut by the letter each got. Mem0's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Mem0 you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.6 is higher than 70 of the 101 other AI agents we grade. Mem0 is open source, so there is a third way: take its code and run it yourself.

What you could not

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ It plugs into other products, LangChain, CrewAI and LlamaIndex among them, and has an API.

What this rests on. Mem0's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Letta, Mastra, CrewAI, Agenta and E2B

The 5 tools Mem0 is most often weighed against, with where each one differs from it.

Letta

2.0 GPA

Free plan · from $20/mo

Stateful agents with long-term memory, from the MemGPT team.

- Mem0 is self-hostable, according to its own site.
- Letta also covers workflow automation.

Mem0 and Letta compared in full

Mastra

2.8 GPA

Free plan · from $25/mo

TypeScript framework for building and running AI agents.

- Mastra also covers workflow automation.

Mem0 and Mastra compared in full

CrewAI

2.2 GPA

Free plan

Multi-agent platform to build, run and govern AI agents.

- Mem0 is self-hostable, according to its own site.
- CrewAI also covers workflow automation and no-code.

Mem0 and CrewAI compared in full

2.6
GPA

Agenta

Free plan · from $29/mo

Open-source workspace for building team AI agents and automations.

- Agenta also covers templates, workflow automation and no-code.

Mem0 and Agenta compared in full

1.8
GPA

E2B

Free trial · from $150/mo

Cloud sandboxes where AI agents run code and tools.

- Mem0 has a free plan. E2B does not, though it has a free trial.
- Mem0 is self-hostable, according to its own site.

Mem0 and E2B compared in full

Quick answers

The questions people ask about it, each answered in a line or two

12

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Mem0 free?

Mem0 has a free plan. Unlimited end users; 10,000 adds and 1,000 retrievals a month for the first 30 days, or 50,000 adds and 10,000 retrievals a month with your own LLM key.

How much does Mem0 cost?

Mem0 lists 2 plans. Free: $0.

What platforms does Mem0 work on?

Mem0 is available on Web.

Does Mem0 have an Android app?

No Android app was listed when its pages were read on Nov 12, 2026. Mem0 is listed for Web.

Does Mem0 have an iPhone app?

No iPhone app was listed when its pages were read on Nov 12, 2026. Mem0 is listed for Web.

Is Mem0 open source?

Yes. Mem0 is open source, according to its own site.

Does Mem0 have an API?

Yes. Mem0 offers a public API, according to its own site.

What does Mem0 integrate with?

Mem0's listing names LangChain, CrewAI, LlamaIndex, Vercel AI SDK, Claude Code, Cursor and Codex.

Who makes Mem0?

Mem0 is made by a company of the same name.

What are the alternatives to Mem0?

The closest alternatives to Mem0 in our directory are Letta, Mastra, CrewAI, Agenta and E2B.

How does Mem0 compare with other AI agents?

Mem0's GPA of 2.6 is higher than 70 of the 101 other AI agents we grade, and level with 17.

Could I make my own version of Mem0?

To replace Mem0 you would be making an AI agent, with the models and the safeguards behind it.

Where this guide comes from

The prices, plans, platforms and features were read from Mem0's own pages on Nov 12, 2026, and the grades were given on Nov 12, 2026. Graded from this listing, whose facts were read from Mem0's own pages on 12 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Mem0. Prices change, so check mem0.ai before you buy.

PART 07 · ABOUT

About ToolGPA

Who made this guide, what else is on the site, and how to cite it

5,038

Tools graded, in 95 categories

ToolGPA grades software the way a school report grades a pupil: five subjects, a letter for each with the reason written beside it, and a GPA that averages them. Prices, plans and platforms are read from each maker's own pages and dated, so you always know how fresh a figure is.

Every grade, review and ranking on ToolGPA is our own judgement. No company can pay for a grade or change one. Every tool on the site has a guide like this one, free to download and pass on. It all lives at **toolgpa.com**.
