Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 6 of the 37 other QR code generators we grade

Menu Tiger is a restaurant management system built around QR code menus: guests scan a code at the table, order and pay, and the order lands in a dashboard. Higher plans add a point of sale, a kitchen display system and table management. It says it charges no commission on orders.

To get you started, here are **9 things to know about Menu Tiger**, taken from its own pages and our grades.

5 **QR code ordering**

6 **AI menu builder**

7 **POS and printers**

A cloud POS with receipt and kitchen printer management. It is included on Premium and a paid add-on on Regular and Advanced.

8 **A 2.0 GPA, above 6 of 37**

That is against the other QR code generators we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Menu Tiger you would be making checkout, card payments and sales tax handled for you. That is not a weekend's work, with an AI app builder or without one.

- ✗ Watch out: table management and the custom domain are Premium only, at $119 a month
- ✗ Skip it if you want listed integrations, since none are on record

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Menu Tiger you would be making checkout, card payments and sales tax handled for you. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 26 of the 37 other QR code generators grade higher. It costs $204 a year.

What you could make

- QR codes and reports: an app builder makes these well.

What you could not

- Checkout, card payments and sales tax handled for you.

- ✕ Connections that pull numbers from dozens of other services.

What this rests on. Menu Tiger's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
