Best for assessments and proctored exams

Mercer Mettl offers psychometric, aptitude, coding and language tests plus online proctoring, and is used for hiring, development and exams. The range is wide, and the pricing page lists no figures at all.

TOOLGPA REPORT CARD	Mercer Mettl	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published, so we can't set it against the $74 to $149 a month this category charges. That leaves it at C.
Free plan and trial	F	No free plan and no trial is listed; the site routes you to a demo. A demo request isn't a trial.
Features	C	Psychometric, coding, English and domain tests plus AI-assisted proctoring. The products span hiring, development and exams, so a hiring-only buyer pays for a broad suite.
Ease of use	C	No store rating on record, and the listing shows tests to assemble and candidates to schedule. That puts it at C.
Platforms and integrations	C	Web only, with no separate app on record. One kind of device, so C.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

6/101

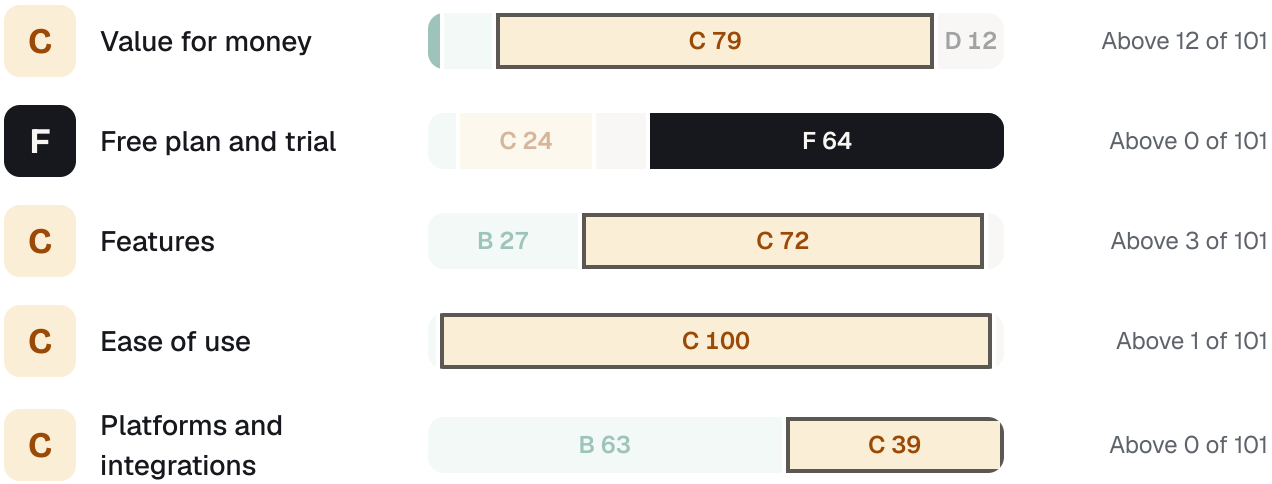

Other hiring and applicant tracking tools it is graded above

It stands best on value for money (C, above 12 of 101) and worst on free plan and trial (F, above 0).

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Mercer Mettl you could make: surveys and reports. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 72 of the 101 other hiring and applicant tracking tools grade higher.

What you could make

- Surveys and reports: an app builder makes these well.

What you could not

- A library of tested questions with scores to compare candidates by.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Mercer Mettl's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
