2.4

GPA, above 42 of the 60 other webinar and live streaming tools we grade

Mevo makes wireless live streaming cameras, such as the 4K Mevo Core, and the Mevo Studio app that switches between several cameras and streams to platforms. Studio is a free download, and a Mevo Pro subscription unlocks multistreaming and extra inputs.

To get you started, here are **9 things to know about Mevo**, taken from its own pages and our grades.

That is against the other webinar and live streaming tools we grade, on value, the free plan, features, ease of use and platforms.

Who Mevo is for

- ✓ Fits if you own Mevo cameras and switch between them
- ✓ Works for small events streamed from a phone

Who it is not for

- ✕ Not for you if you want software alone, as cameras are sold separately
- ✕ Tight if you stay free: one destination only
- ✕ Watch out: NDI|HX output and multistreaming need Pro
- ✕ Watch out: Mevo Go needs a second device on the same network
- ✕ Skip it if you want a computer app, since only phones are listed

Good to know

Good for

- ✓ Small productions mixing several Mevo cameras
- ✓ Events using phones as extra camera angles
- ✓ Teams that want NDI|HX input without a hardware switcher

Worth knowing

- ⓘ Cameras are sold separately; the page lists Mevo Core, Mevo Start and a 3-pack.
- ⓘ Without Pro, Studio streams direct to one destination, and outputting the program via NDI|HX needs Pro.
- ⓘ Mevo Go needs a second device on the same network as the one running Mevo Studio.

What you could not

- ✕ One live stream sent to several platforms at once.
- ✕ Live video to hundreds of people at once.

× A real app for iOS and Android. Something home-made would be a web page.
