MileageWise logs business mileage through an automatic tracking app and a web dashboard, and produces mileage logs formatted for IRS records. It can also build a log from a Google Maps Timeline export. Plans are sold per vehicle, with monthly, annual and lifetime options.

To get you started, here are **9 things to know about MileageWise**, taken from its own pages and our grades.

Who MileageWise is for

- ✓ Fits if you are self-employed and need a mileage log for tax records
- ✓ Works for rideshare or delivery drivers and agents who drive for work in the US

Who it is not for

- ✕ Skip it if you need receipts or expense reports, as it only logs mileage
- ✕ Pricey if you drive several vehicles, because every plan covers one vehicle
- ✕ Not for you if you want a free plan: after the 14-day trial a paid plan is required
- ✕ Watch out: an annual plan can move to Lifetime only if you pay the difference before the calendar year ends
- ✕ Watch out: it is built around US IRS logs, so it suits few drivers elsewhere

Good to know

Good for

- ✓ Self-employed people who need a mileage log for tax records
- ✓ Real estate agents, rideshare and delivery drivers
- ✓ People reconstructing past years' mileage from Google Timeline

Worth knowing

- ⓘ Each plan covers one vehicle; drivers using several vehicles interchangeably need a plan for each.
- ⓘ Annual plans can be upgraded to Lifetime only by paying the difference before the end of the calendar year of purchase.
- ⓘ It is built around US IRS mileage logs and does not handle receipts or other expense reports.
- ⓘ There is no free plan; after the 14-day trial a paid plan is required.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

55/76

Other spend and bill pay tools it is graded above

MileageWise's GPA of 2.4 is higher than 55 of the 76 other spend and bill pay tools we grade, and level with 2.

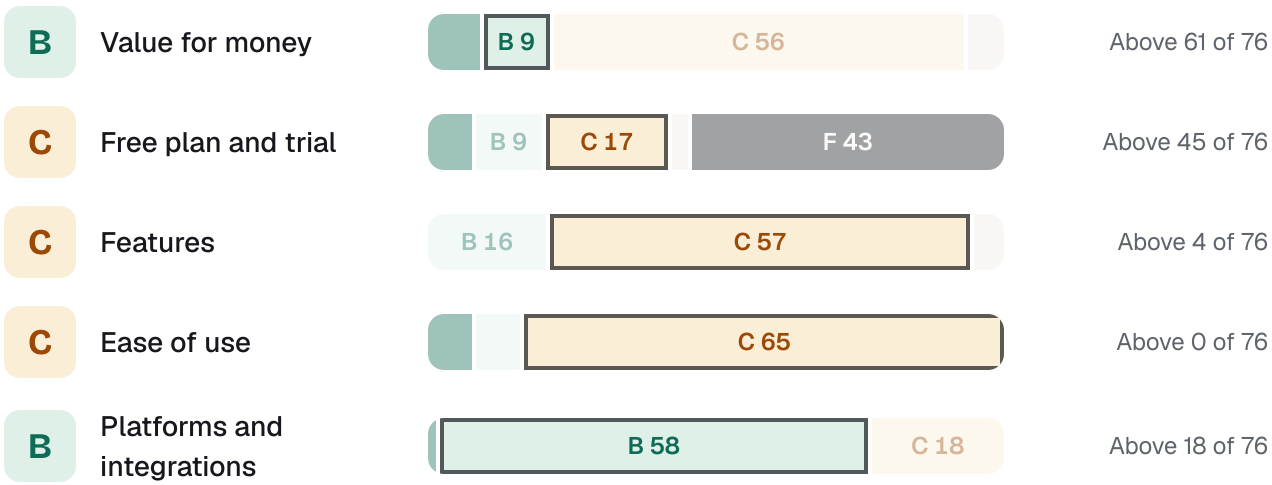

It stands best on value for money (B, above 61 of 76) and worst on ease of use (C, above 0).

Its paid plans start at $8.99 a month, against a middle price of $12 for the category: 8 of the 36 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 6 tools score higher and cost less.

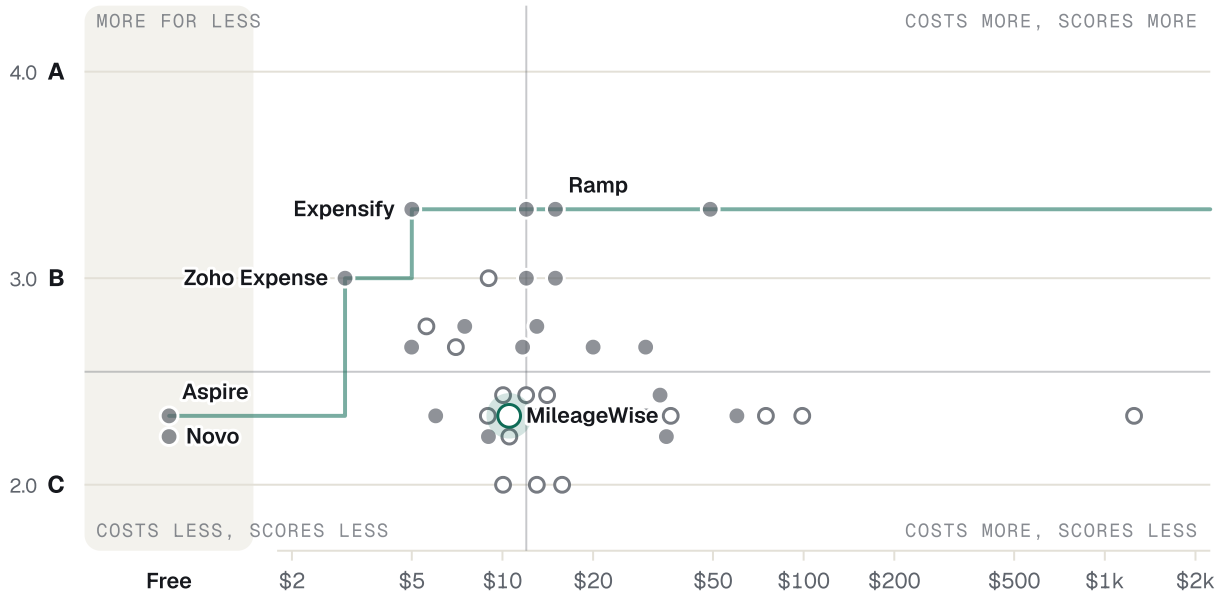

Each grade against the category

Every bar is all 77 spend and bill pay tools we grade, cut by the letter each got. MileageWise's own letter is outlined.

Price against what you get

Each dot is one of 39 spend and bill pay tools. Further left costs less; higher up scores better on features, ease of use and platforms. MileageWise is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of MileageWise you could make: expense tracking and reports. What surrounds it you could not. The 1 things listed below take a company, not a weekend.

It is one of the better ones too: its GPA of 2.4 is higher than 55 of the 76 other spend and bill pay tools we grade. It costs $107.88 a year.

What you could make

- Expense tracking and reports: an app builder makes these well.

What you could not

- A real app for iOS and Android. Something home-made would be a web page.

What this rests on. MileageWise's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
