Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 8 of the 69 other AI research tools we grade

Mindgrasp is an AI study assistant for students, self-learners and professionals. You record a lecture or upload files, and it generates notes, a summary, flashcards and quizzes, plus a chat tutor that answers questions about the material.

To get you started, here are **9 things to know about Mindgrasp**, taken from its own pages and our grades.

> "
>
> **It is a study tool, not a way to search scholarly literature.**
>
> From our report card of Mindgrasp

1 **Best for turning lectures and files into study notes**

Mindgrasp turns lectures, videos and documents into notes, flashcards and quizzes, and has an AI tutor chat.

2 **Paid plans start at $12.99 a month**

As its pricing page puts it: $12.99 per month (Scholar, billed monthly).

3 **You can try it first**

Free trial offered; its length is not stated on the pages read

4 **It runs on 2 platforms**

Web and iOS, with a browser extension too.

5 **Notes and summaries**

Generates structured notes and a short summary from recorded lectures, documents, videos and links.

6 **Flashcards and quizzes**

Builds flashcards and quizzes from the uploaded material for active recall and self-testing.

7 **AI tutor chat**

A chat tutor that answers questions about the material in a study session.

8 **A 2.0 GPA, above 8 of 69**

That is against the other AI research tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Mindgrasp you would be making an AI model, which you can rent by the request but not make. That is not a weekend's work, with an AI app builder or without one.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

8/69

Other AI research tools it is graded above

Mindgrasp's GPA of 2.0 is higher than 8 of the 69 other AI research tools we grade, and level with 7.

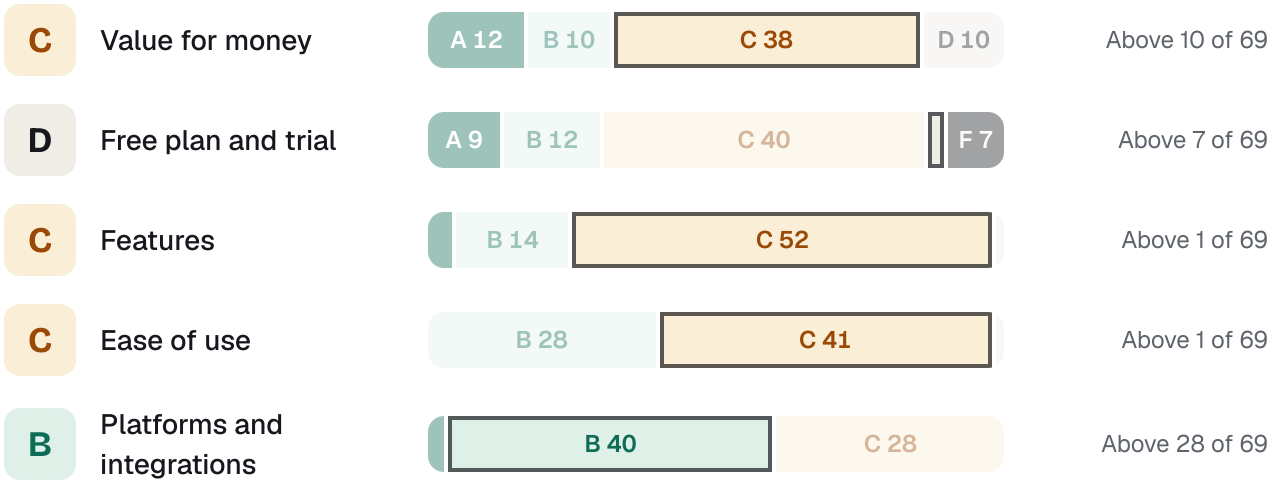

It stands best on platforms and integrations (B, above 28 of 69) and worst on free plan and trial (D, above 7).

Its paid plans start at $12.99 a month, against a middle price of $10 for the category: 33 of the 48 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 20 tools score higher and cost less.

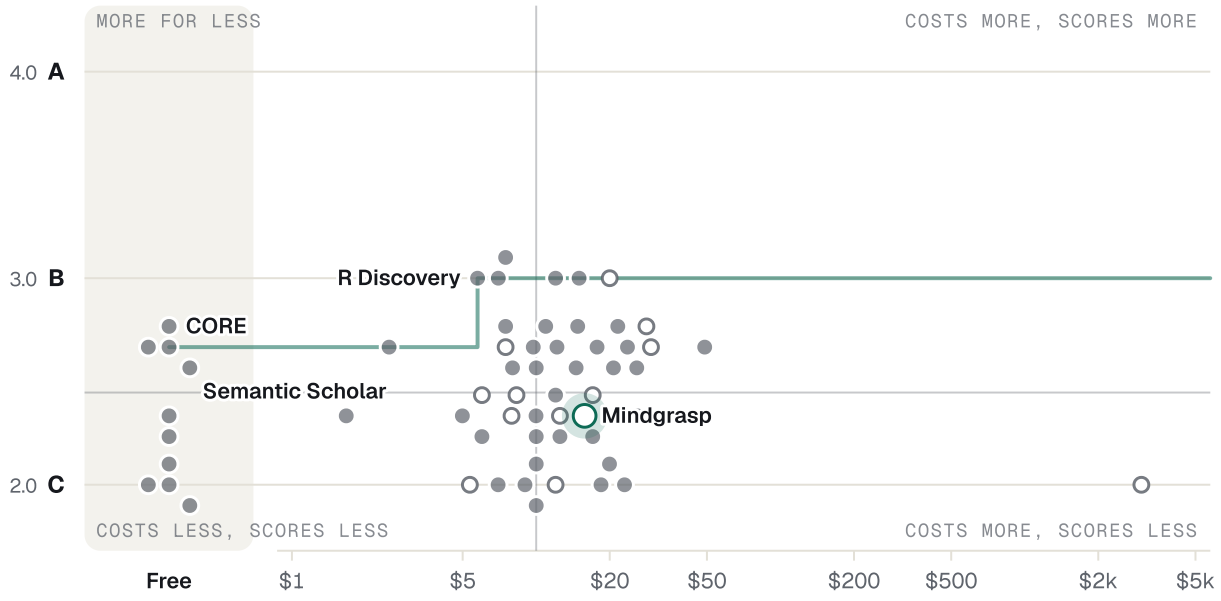

Each grade against the category

Every bar is all 70 AI research tools we grade, cut by the letter each got. Mindgrasp's own letter is outlined.

Price against what you get

Each dot is one of 59 AI research tools. Further left costs less; higher up scores better on features, ease of use and platforms. Mindgrasp is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Mindgrasp you would be making an AI model, which you can rent by the request but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 54 of the 69 other AI research tools grade higher. It costs $155.88 a year.

What you could make

- Notes and documents: an app builder makes these well.

What you could not

- An AI model, which you can rent by the request but not make.

- Speech turned into text you can trust.
- A real app for iOS. Something home-made would be a web page.

What this rests on. Mindgrasp's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
