Who MindPal is for

- ✓ Fits if you are a coach or consultant who wants clients to talk to an agent built on your material
- ✓ Works for agencies who can pay for extra seats and domains

Who it is not for

- ✗ Pricey if you add the extras: $9 per 1,000 credits, $29 an editor seat, $9 a custom domain and $1 a GB
- ✗ Too light on Pro for clients, as it has no user seats
- ✗ Watch out: free credits may renew monthly or be a one-time amount, depending on the workspace
- ✗ Watch out: the pricing page showed a 60% Black Friday code, which is not counted here

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

2/87

Other AI assistants it is graded above

MindPal's GPA of 1.8 is higher than 2 of the 87 other AI assistants we grade, and level with 6.

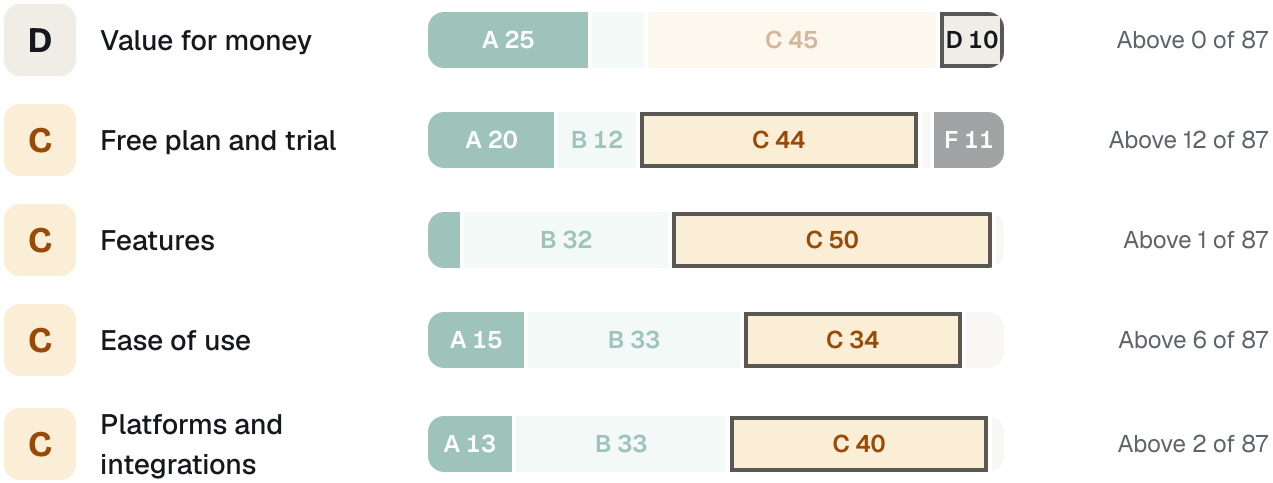

It stands best on free plan and trial (C, above 12 of 87) and worst on value for money (D, above 0).

Its paid plans start at $39 a month, against a middle price of $12.46 for the category: 52 of the 53 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 51 tools score higher and cost less.

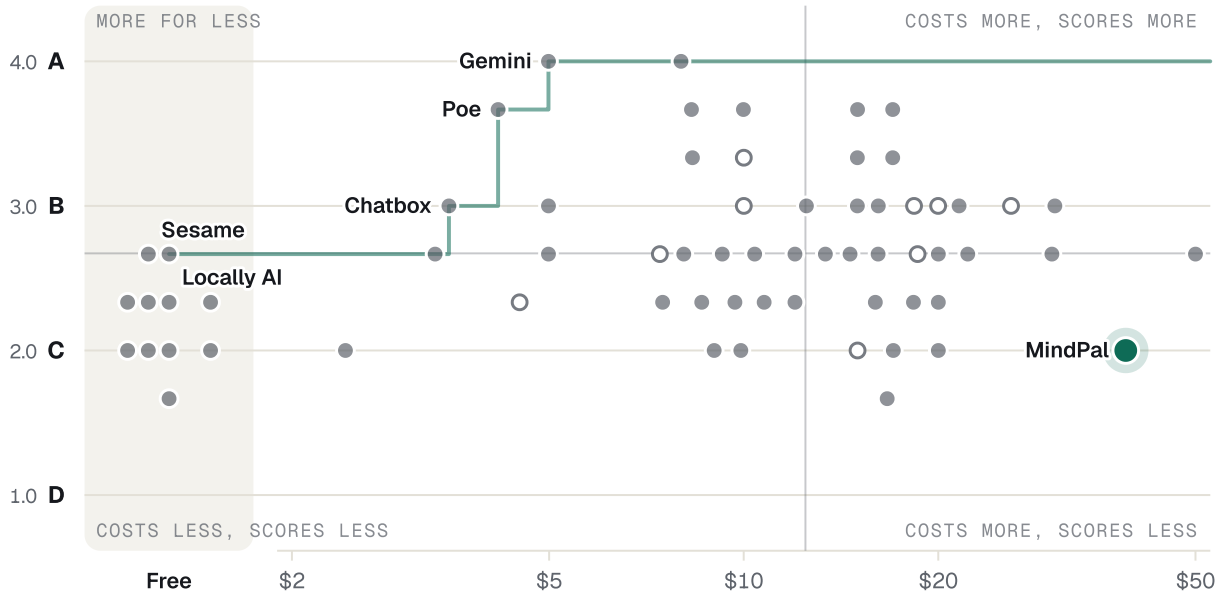

Each grade against the category

Every bar is all 88 AI assistants we grade, cut by the letter each got. MindPal's own letter is outlined.

Price against what you get

Each dot is one of 65 AI assistants. Further left costs less; higher up scores better on features, ease of use and platforms. MindPal is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace MindPal you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 79 of the 87 other AI assistants grade higher. It costs $468 a year.

What you could not

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ A builder that other people can use without writing code.

- ✕ Connections to other products, each kept working as those products change.
- ✕ An AI model, which you can rent by the request but not make.
- ✕ People on the other end: coaches. No app builder makes those.
- ✕ Sharing with other people, which means accounts and invitations.

What this rests on. MindPal's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
