Who Mnml AI is for

- ✓ Fits if you draw in SketchUp, Revit or Rhino and want quick concept renders
- ✓ Works for architects who want a canvas to compare design options

Who it is not for

- ✗ Pricey if you are a hobbyist, since the cheapest plan is $29 a month
- ✗ Watch out: the FAQ says refunds are not typically available
- ✗ Tight if you render a lot, as Fast and Ultra renders cost different amounts and video has monthly caps
- ✗ Watch out: rollover stops at two months' worth of credits
- ✗ Skip it if you use Revit on a Mac, as the Revit plugin is Windows only

Good to know

Good for

- ✓ Architects and designers who need fast concept renders
- ✓ Teams already working in SketchUp, Revit or Rhino
- ✓ One-off client jobs, using the credit pack instead of a subscription

Worth knowing

- ⓘ Credits are the currency: a Fast render and an Ultra render cost different amounts, and the price shows before you spend.
- ⓘ Unused plan credits roll over only up to two months' worth; anything above that is lost at renewal.
- ⓘ The FAQ says refunds are not typically available, and offers 100 free credits to try first.
- ⓘ The plugins run inside their host apps: SketchUp, Revit (Windows only), Rhino and Grasshopper.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Mnml AI you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

It costs $348 a year.

What you could not

- ✕ An image model, which you can rent by the picture but not make.
- ✕ A video model, which you can rent by the second but not make.

- ✕ It plugs into other products, SketchUp, Revit and Rhino among them, and has an API.
- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Mnml AI's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
