Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 7 of the 149 other project management tools we grade

Moxo is a workflow orchestration platform where business processes run through humans and AI agents, with branded portals for customers and partners. It is aimed at operations such as client onboarding, implementations and account management. The vendor says it can be deployed in its cloud, a customer's cloud or on-premises.

To get you started, here are **7 things to know about Moxo**, taken from its own pages and our grades.

1 **Best for client portals for workflows run by a sales team**

Moxo runs workflows and client portals with AI agents.

2 **It runs on Web**

Web.

3 **Workflow orchestration**

Processes run across teams, systems and AI agents, with each step timed and recorded.

4 **AI agents**

Build or bring agents that prepare and carry out work inside a process, within permissions the customer sets.

5 **Portals**

Branded portals where teams, customers or partners take action.

6 **A 1.8 GPA, above 7 of 149**

That is against the other project management tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Moxo you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for client portals for workflows run by a sales team

Moxo runs workflows and client portals with AI agents. No price is published, you book a demo, and the site describes engineer-led implementation, which says it is not something to start on your own.

TOOLGPA REPORT CARD	Moxo	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published, so it cannot be compared with the $9 middle for project tools.
Free plan and trial	D	The site offers a free trial on request, but gives no length or terms and no free plan.
Features	C	Workflow orchestration, AI agents, portals and an API. It is a different job from task management, and the pages read show no limits.
Ease of use	C	No store rating on record. The site describes engineer-led implementation alongside the platform.
Platforms and integrations	C	Web only on the pages read, with Zapier as the only named integration and an API.
Grade point average		Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Moxo is for

- ✓ Fits if you run client-facing processes and want a portal for each client
- ✓ Works for firms that will pay for an implementation project

Who it is not for

- ✗ Skip it if you want a price list, as none is published
- ✗ Not for you if you want to set it up on your own, as the site pairs it with engineer-led work
- ✗ Too light for people who want phone apps, as none are listed
- ✗ Watch out: the free trial has no length stated on the pages read

Good to know

Good for

- ✓ Operations teams in regulated industries onboarding clients
- ✓ Professional services firms coordinating work with outside customers

Worth knowing

- ⓘ No pricing is published on the pages read; the site asks visitors to book a demo or request a free trial.
- ⓘ The site describes engineer-led implementation work alongside the platform.
- ⓘ The pages read do not list desktop or mobile apps, so only the web app is listed.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Moxo's current pricing could not be confirmed from its own site.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

7 /149

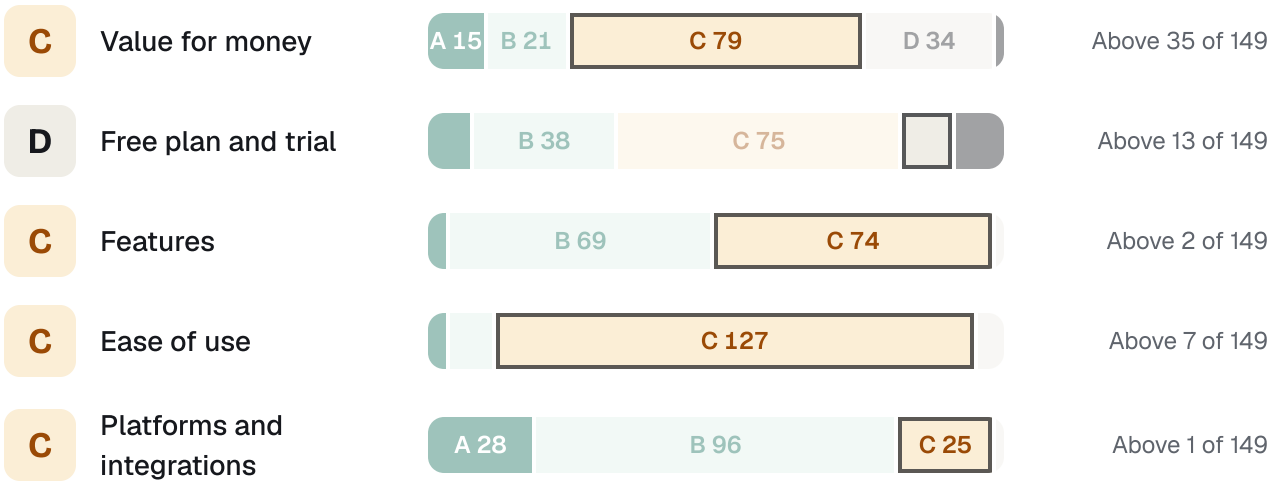

Other project management tools it is graded above

Moxo's GPA of 1.8 is higher than 7 of the 149 other project management tools we grade, and level with 6.

It stands best on value for money (C, above 35 of 149) and worst on free plan and trial (D, above 13).

Each grade against the category

Every bar is all 150 project management tools we grade, cut by the letter each got. Moxo's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Moxo you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 136 of the 149 other project management tools grade higher.

What you could not

- ✕ Connections to other products, each kept working as those products change.
- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ A builder that other people can use without writing code.
- ✕ What a company asks for before it lets staff use something: roles and permissions.

What this rests on. Moxo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
