07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from MSP360 Explorer's own pages, its app-store listings and our grades. Every fact in it is on MSP360 Explorer's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 13 of the 91 other file storage and sync services we grade

MSP360 Explorer, still called CloudBerry Explorer in the help center, is a file manager for cloud object storage such as Amazon S3, Microsoft Azure, Wasabi and Backblaze B2. It copies files between a computer and the cloud, or between two clouds, and manages storage-level settings. It runs on Windows and macOS.

To get you started, here are **8 things to know about MSP360 Explorer**, taken from its own pages and our grades.

1 **Best for browsing S3 or Azure buckets from a desktop app**

Prices could not be confirmed, the Mac edition is basic, and it runs only on Windows and Mac.

2 **There is a free plan**

The macOS help pages list a free version with file restore, transfer and monitoring, beside a commercial one.

3 **It runs on 2 platforms**

Windows and macOS.

4 **Multi-cloud browsing**

Connects to Amazon S3, Microsoft Azure, Wasabi, Backblaze B2, Google Cloud, OpenStack and S3-compatible storage in one window.

5 **Copy between local and cloud**

Local-to-cloud, cloud-to-cloud and cloud-to-local copying, with a queue to monitor transfers and no stated transfer limits.

6 **Storage-level controls**

Windows version manages ACLs, HTTP headers, object versions, Glacier restores and, for S3 only, storage classes and IAM roles.

7 **A 2.0 GPA, above 13 of 91**

That is against the other file storage and sync services we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace MSP360 Explorer you would be making files kept in step across devices without losing one. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for browsing S3 or Azure buckets from a desktop app

MSP360 Explorer is a file manager for cloud object storage such as S3, Azure and Backblaze B2, and its help pages list a free version. Prices could not be confirmed, the Mac edition is basic, and it runs only on Windows and Mac.

TOOLGPA REPORT CARD

MSP360 Explorer

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price could be confirmed because the vendor's main site blocked our reader, so it sits in the middle of the category by default.
Free plan and trial	C	The Mac help pages list a free version with file restore, transfer and monitoring beside a commercial one, but the limits are not shown.
Features	C	It browses and copies between local disk and several clouds, with MFA, Object Lock, command line and PowerShell. The Sync Folders feature was removed in Windows version 6.2, and the Mac edition is described as basic.
Ease of use	C	You add each storage account and keys yourself, and Windows needs .NET Framework 4.7.2 or higher. No store rating is on record.
Platforms and integrations	C	Windows and Mac desktop programs only, with no web or phone version. It connects to S3, Azure, Wasabi, Backblaze B2, Google Cloud and OpenStack.

Grade point average Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who MSP360 Explorer is for

- ✓ Fits if you manage S3 or Azure buckets from a Windows desktop
- ✓ Works for restoring single files out of cloud backup storage

Who it is not for

- ✗ Skip it if you want one clear price, because none could be confirmed and no plans are listed
- ✗ Not for you if you need folder sync, as Sync Folders was removed and Compare Folders replaces it
- ✗ Too light for Mac users wanting full control, since the Mac edition offers basic file management
- ✗ Watch out: the Windows version needs Windows 7 or later and .NET Framework 4.7.2 or higher

Good to know

Good for

- ✓ Administrators who manage S3 or Azure buckets from a desktop app
- ✓ Restoring individual files from cloud backup storage
- ✓ Copying data between two cloud providers without a script

Worth knowing

- ⓘ The vendor's main site blocked our reader, so pricing could not be confirmed and no plans are listed.
- ⓘ The Sync Folders feature was removed as of Windows version 6.2; Compare Folders replaces it.
- ⓘ The macOS edition is described as offering basic file management features.
- ⓘ The Windows version needs Windows 7 or later and .NET Framework 4.7.2 or higher.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

MSP360 Explorer's current pricing could not be confirmed from its own site.

> **No price could be confirmed because the vendor's main site blocked our reader, so it sits in the middle of the category by default.**
>
> From our grade for value for money

We could not confirm MSP360 Explorer’s current prices from its own site, so this guide lists no plans. msp360.com has them.

What it does

Its main features, where it runs, what it works with and who makes it

2

Places it runs: macOS and Windows

File manager for browsing and moving data in cloud object storage. Here is what it does, as its own site describes it, and what it covers: file sync, file management.

> **It browses and copies between local disk and several clouds, with MFA, Object Lock, command line and PowerShell.**
>
> From our grade for features

Multi-cloud browsing

Connects to Amazon S3, Microsoft Azure, Wasabi, Backblaze B2, Google Cloud, OpenStack and S3-compatible storage in one window.

Copy between local and cloud

Local-to-cloud, cloud-to-cloud and cloud-to-local copying, with a queue to monitor transfers and no stated transfer limits.

Storage-level controls

Windows version manages ACLs, HTTP headers, object versions, Glacier restores and, for S3 only, storage classes and IAM roles.

MFA protection and Object Lock

The Windows help center documents MFA protection for file versions and an Object Lock feature.

Command line and PowerShell

A command line interface and a PowerShell snap-in are documented for scripting on Windows.

Shareable links

The macOS version generates web URLs for sharing content and lets you manage transfer bandwidth.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

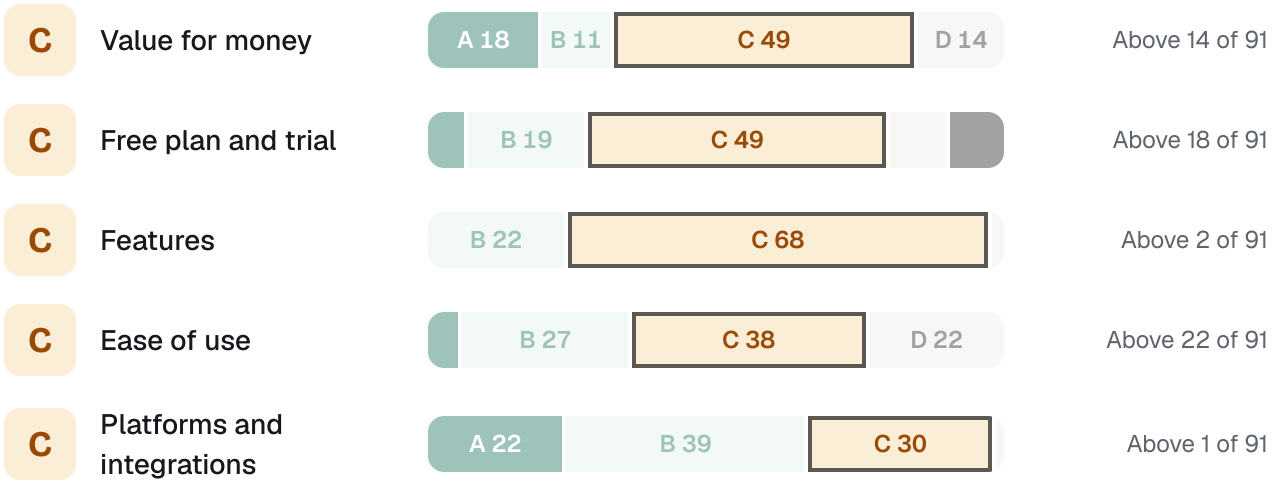

13/91

Other file storage and sync services it is graded above

MSP360 Explorer's GPA of 2.0 is higher than 13 of the 91 other file storage and sync services we grade, and level with 20.

Each grade against the category

Every bar is all 92 file storage and sync services we grade, cut by the letter each got. MSP360 Explorer's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace MSP360 Explorer you would be making files kept in step across devices without losing one. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 58 of the 91 other file storage and sync services grade higher.

What you could not

- ✕ Files kept in step across devices without losing one.
- ✕ A file manager working directly on your disk.
- ✕ A real app for macOS and Windows. Something home-made would be a web page.
- ✕ It plugs into other products, Amazon S3, Microsoft Azure and Wasabi among them.

What this rests on. MSP360 Explorer's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Rclone, Wasabi, Backblaze B2, odrive and MultCloud

The 5 tools MSP360 Explorer is most often weighed against, with where each one differs from it.

2.8 GPA

Rclone

Free

Command-line tool for syncing and mounting cloud storage.

- Only Rclone lists Linux and Android apps.
- Rclone is open source and end-to-end encrypted, according to its own site.

MSP360 Explorer and Rclone compared in full

2.2 GPA

Wasabi

Free trial · from $7.99/mo

S3-compatible cloud object storage at a flat per-TB rate.

- MSP360 Explorer has a free plan. Wasabi does not, though it has a free trial.
- Only MSP360 Explorer lists Windows and macOS apps.
- Only Wasabi lists a web app.

MSP360 Explorer and Wasabi compared in full

Backblaze B2

2.0 GPA

Free plan · from $6.95/mo

S3-compatible object storage billed per terabyte.

- Only MSP360 Explorer lists Windows and macOS apps.
- Only Backblaze B2 lists a web app.
- MSP360 Explorer also covers file sync.

MSP360 Explorer and Backblaze B2 compared in full

odrive

1.8 GPA

Free trial · from $20/mo

Desktop sync for Procore documents, with SharePoint and server tiers.

- MSP360 Explorer has a free plan. odrive does not, though it has a free trial.

MSP360 Explorer and odrive compared in full

MultCloud

2.0 GPA

Free plan · from $19.99/mo

Web service for moving and syncing files between cloud drives.

- Only MSP360 Explorer lists Windows and macOS apps.
- Only MultCloud lists a web app.

MSP360 Explorer and MultCloud compared in full

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

10

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is MSP360 Explorer free?

MSP360 Explorer has a free plan. The macOS help pages list a free version with file restore, transfer and monitoring, beside a commercial one.

What platforms does MSP360 Explorer work on?

MSP360 Explorer is available on Windows and macOS.

Does MSP360 Explorer have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. MSP360 Explorer is listed for Windows and macOS.

Does MSP360 Explorer have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. MSP360 Explorer is listed for Windows and macOS.

Is MSP360 Explorer open source?

MSP360 Explorer is not described as open source on its own site, as read on Nov 13, 2026.

What does MSP360 Explorer integrate with?

MSP360 Explorer's listing names Amazon S3, Microsoft Azure, Wasabi, Backblaze B2, Google Cloud and OpenStack.

Who makes MSP360 Explorer?

MSP360 Explorer is made by MSP360.

What are the alternatives to MSP360 Explorer?

The closest alternatives to MSP360 Explorer in our directory are Rclone, Wasabi, Backblaze B2, odrive and MultCloud.

How does MSP360 Explorer compare with other file storage and sync services?

MSP360 Explorer's GPA of 2.0 is higher than 13 of the 91 other file storage and sync services we grade, and level with 20.

Could I make my own version of MSP360 Explorer?

To replace MSP360 Explorer you would be making files kept in step across devices without losing one.

Where this guide comes from

The prices, plans, platforms and features were read from MSP360 Explorer's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from MSP360's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews. The vendor's main site blocked our reader, so this card is graded from its help pages and the listing.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by MSP360. Prices change, so check msp360.com before you buy.
