Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 13 of the 91 other file storage and sync services we grade

MultCloud connects accounts from more than 30 cloud storage services and moves, syncs or backs up files between them without downloading and re-uploading. It runs in the browser and bills by the amount of data transferred each month or year. A free plan allows 5 GB of traffic a month.

To get you started, here are **9 things to know about MultCloud**, taken from its own pages and our grades.

> From our grade for ease of use

1 **Best for moving files between cloud drives from a browser**

MultCloud moves, syncs and backs up files between more than 30 cloud services without you downloading anything.

2 **Paid plans start at $19.99 a month**

As its pricing page puts it: $19.99 per month for 100 GB of transfers, billed monthly.

3 **There is a free plan**

5 GB of data traffic per month, 2 transfer threads and 50 email conversions a month.

4 **It runs on Web**

Web.

5 **Cloud transfer**

Moves files from one cloud service to another directly, without downloading and re-uploading them to your computer.

6 **One-way and two-way sync**

Keeps two folders on different clouds in step, in real time or on a timed schedule; scheduling needs a paid plan.

7 **Cloud-to-cloud backup**

Backs up data from one cloud drive to another and restores it if files are lost.

8 **A 2.0 GPA, above 13 of 91**

That is against the other file storage and sync services we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace MultCloud you would be making files kept in step across devices without losing one. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for moving files between cloud drives from a browser

MultCloud moves, syncs and backs up files between more than 30 cloud services without you downloading anything. It is metered by data transferred, so the free plan stops at 5 GB a month, scheduling needs a paid plan, and the monthly price jumps to $19.99 for 100 GB.

TOOLGPA REPORT CARD

MultCloud

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	Yearly is $59.99 for 1,200 GB, about $5 a month, which is around the category's cheaper quarter at $4.75. Monthly billing is $19.99 for 100 GB, and unlimited traffic is $119 a year, so most tools of this kind land close to it.
Free plan and trial	C	Free gives 5 GB of traffic a month and 2 transfer threads, with no card shown. A single big migration will use that up in a day.
Features	C	It does transfers, two-way sync and cloud-to-cloud backup fully, and that is a smaller job than storage itself. Scheduled runs and extra sync modes are paid.
Ease of use	C	A web service where you connect each cloud account and build the transfer yourself. No app rating is on record.
Platforms and integrations	C	Web only, with no desktop or phone app. It lists more than 30 services, but nothing beyond the clouds themselves.

Grade point average Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who MultCloud is for

- ✓ Fits if you have a one-off migration between two cloud drives
- ✓ Works for people who keep files in several cloud accounts and want one login for them

Who it is not for

- ✗ Tight if you move a lot of data, since free is 5 GB a month and the cheapest paid tier is 100 GB
- ✗ Not for you if you want scheduled transfers or backups without paying, because those are paid features
- ✗ Pricey if you pay monthly, at $19.99 against $59.99 for a whole year
- ✗ Watch out: the discounts are shown against crossed-out prices with no end date, and support is by email only

Good to know

Good for

- ✓ One-off migrations from one cloud drive to another
- ✓ People juggling several cloud accounts who want one login
- ✓ Scheduled cloud-to-cloud backups without local software

Worth knowing

- ⓘ Plans are priced by data traffic; the free plan stops at 5 GB a month and the cheapest paid tier at 100 GB.
- ⓘ Scheduled transfer, sync and backup are paid features.
- ⓘ The displayed discounts are against crossed-out prices and the page gives no end date.
- ⓘ Support is by email only, according to the pricing page FAQ.

MultCloud is made by MultCloud.

Where it stands

Its grades against its category, and whether to keep it or make your own

13/91

Other file storage and sync services it is graded above

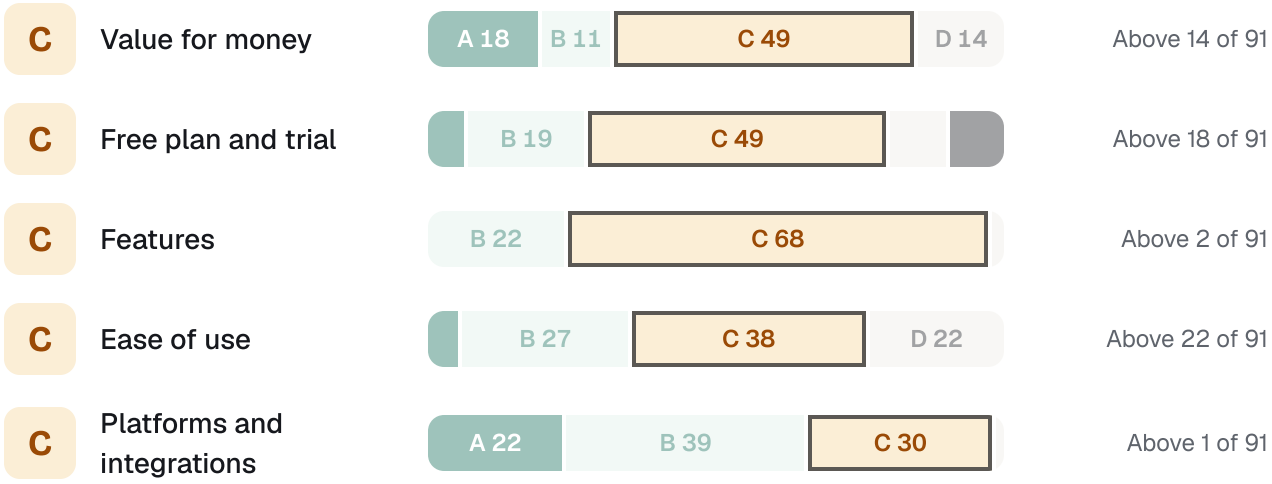

MultCloud's GPA of 2.0 is higher than 13 of the 91 other file storage and sync services we grade, and level with 20.

Its paid plans start at $19.99 a month, against a middle price of $6.64 for the category: 53 of the 60 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 46 tools score higher and cost less.

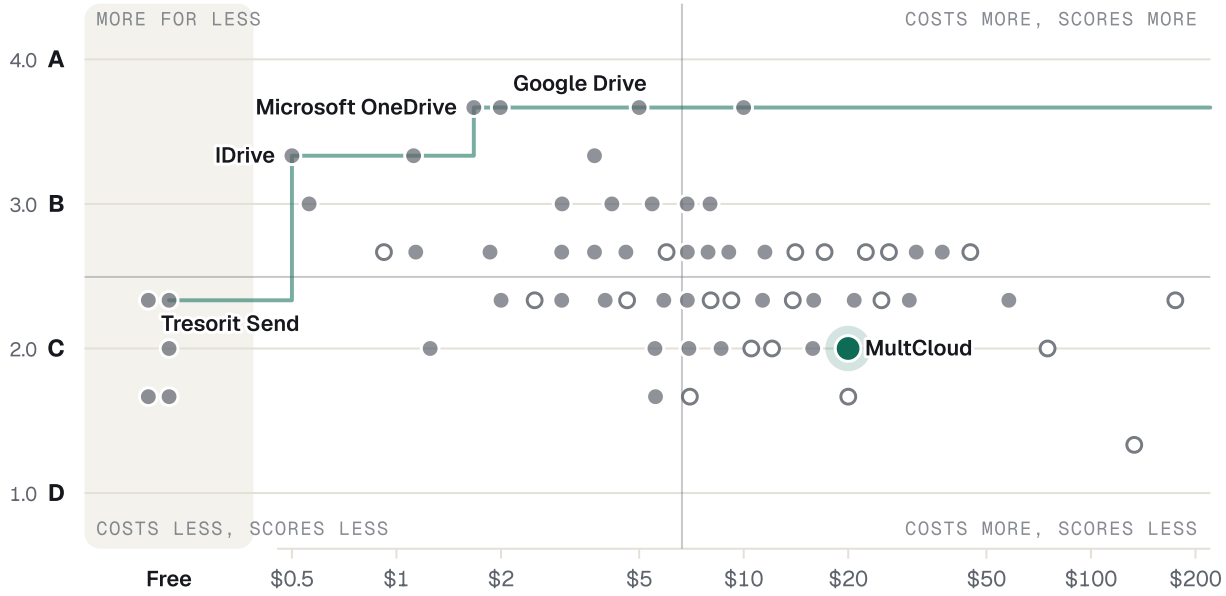

Each grade against the category

Every bar is all 92 file storage and sync services we grade, cut by the letter each got. MultCloud's own letter is outlined.

Price against what you get

Each dot is one of 66 file storage and sync services. Further left costs less; higher up scores better on features, ease of use and platforms. MultCloud is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace MultCloud you would be making files kept in step across devices without losing one. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 58 of the 91 other file storage and sync services grade higher. It costs $239.88 a year.

What you could not

- ✕ Files kept in step across devices without losing one.
- ✕ A file manager working directly on your disk.

- ✕ It plugs into other products, Google Drive, Dropbox and OneDrive among them.
- ✕ Sharing with other people, which means accounts and invitations.

What this rests on. MultCloud's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
