What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 0 of the 122 other email apps we grade

MXroute hosts email for your own domains over SMTP, IMAP and POP3 and gives customers its own webmail client. Plans are priced by storage, not by user, and every plan allows unlimited domains and accounts. The company says it has been run by its operators since 2013.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

0/122

Other email apps it is graded above

It stands best on ease of use (C, above 20 of 122) and worst on free plan and trial (F, above 0).

Its paid plans start at $4.92 a month when paid by the year, against a middle price of $4.92 for the category: 37 of the 76 others that charge start lower.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace MXroute you would be making an email client: sending, receiving, threading and searching years of mail. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 121 of the 122 other email apps grade higher. It costs $59 a year.

What you could make

- Calendar: an app builder makes this well.

What you could not

- An email client: sending, receiving, threading and searching years of mail.

What this rests on. MXroute's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
