PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

94/127

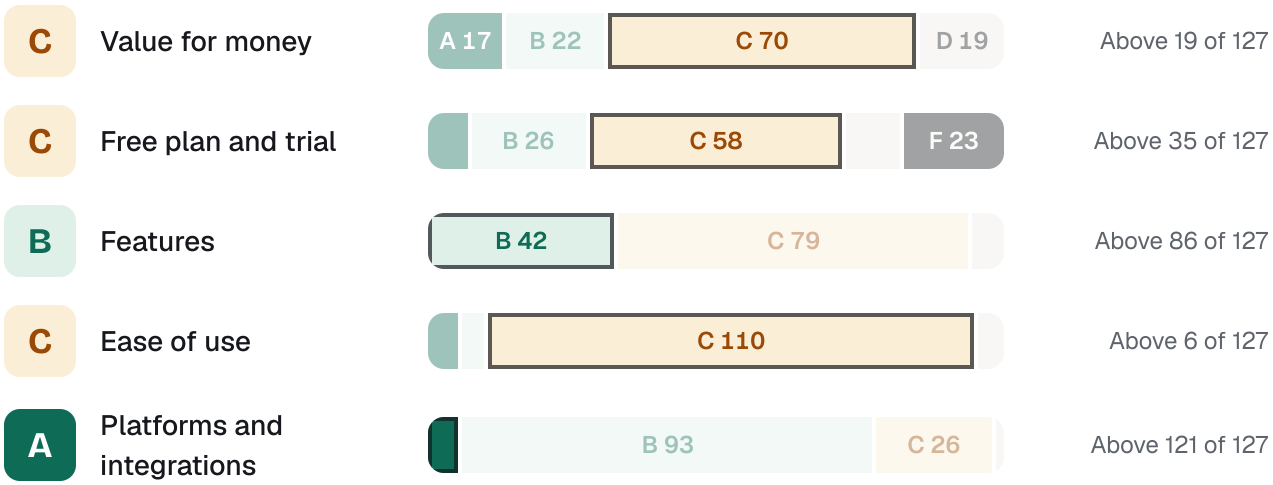

Other accounting and invoicing tools it is graded above

MYOB's GPA of 2.6 is higher than 94 of the 127 other accounting and invoicing tools we grade, and level with 14.

It stands best on platforms and integrations (A, above 121 of 127) and worst on ease of use (C, above 6).

Each grade against the category

Every bar is all 128 accounting and invoicing tools we grade, cut by the letter each got. MYOB's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace MYOB you would be making live feeds from your bank, which take an agreement with each bank or a service that has them. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.6 is higher than 94 of the 127 other accounting and invoicing tools we grade.

What you could make

- Invoicing, inventory, expense tracking and reports: an app builder makes these well.

What you could not

- Live feeds from your bank, which take an agreement with each bank or a service that has them.
- Payroll taxes worked out and filed with the government for you.
- Apps for Windows, iOS and Android that stay in step with each other.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. MYOB's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
