Who MyParcel is for

- ✓ Fits if you run a Dutch or Belgian shop and ship with PostNL, DHL or DPD
- ✓ Works for stores that want a delivery-day checkout without paying a subscription

Who it is not for

- ✗ Skip it if you ship mostly outside the Netherlands and Belgium, as the rates and carriers are built around those two
- ✗ Watch out: order management is €20 a month and up, analytics €5 and up, and own-contract shipping €10 and up
- ✗ Tight if you expect one flat price: carrier rates change with your yearly shipment volume and are shown without VAT
- ✗ Watch out: the €0.35 per parcel plan discount is only on a paid plan whose price we could not read

Good to know

Good for

- ✓ Dutch and Belgian online stores shipping with PostNL, DHL or DPD
- ✓ Shops wanting a delivery-options checkout without a subscription
- ✓ Stores adding order management or analytics as they grow

Worth knowing

- ⓘ Carrier rates shown on the page are per parcel, exclude VAT and change with yearly shipment volume; add-on prices are 'from' figures.
- ⓘ The MyParcel plan discount of €0.35 per parcel against a €0.10 label fee applies only on a paid plan, and its price was not shown on the page read.
- ⓘ The site routes visitors to separate Dutch, Belgian and Italian sites; pricing here is from the Netherlands English page.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

69/80

Other shipping software it is graded above

MyParcel's GPA of 2.8 is higher than 69 of the 80 other shipping software we grade, and level with 6.

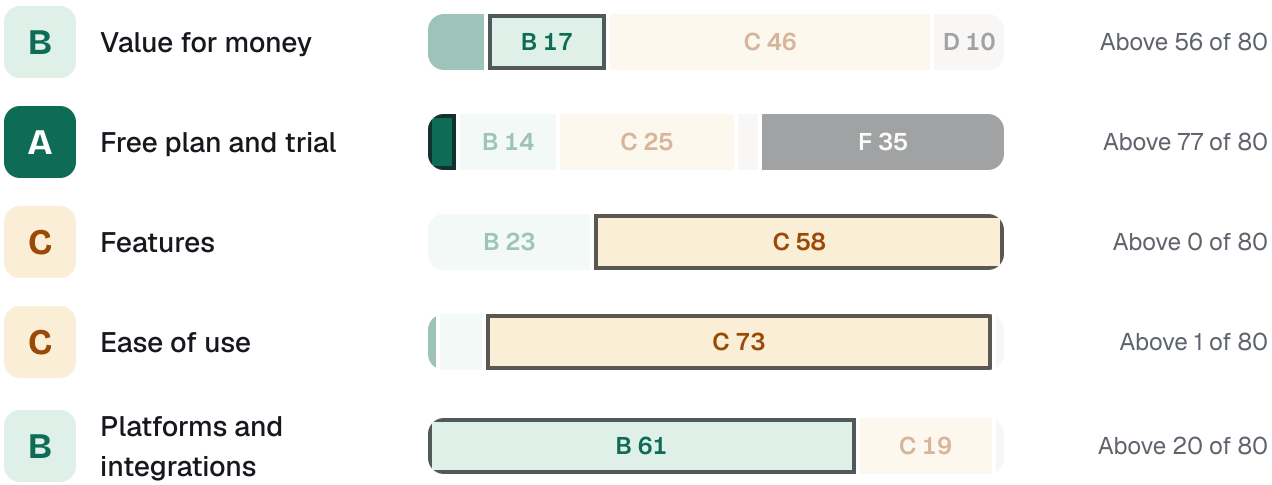

It stands best on free plan and trial (A, above 77 of 80) and worst on features (C, above 0).

Its paid plans start at about $5.59 a month, against a middle price of $19.99 for the category: 5 of the 35 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 4 tools score higher and cost less.

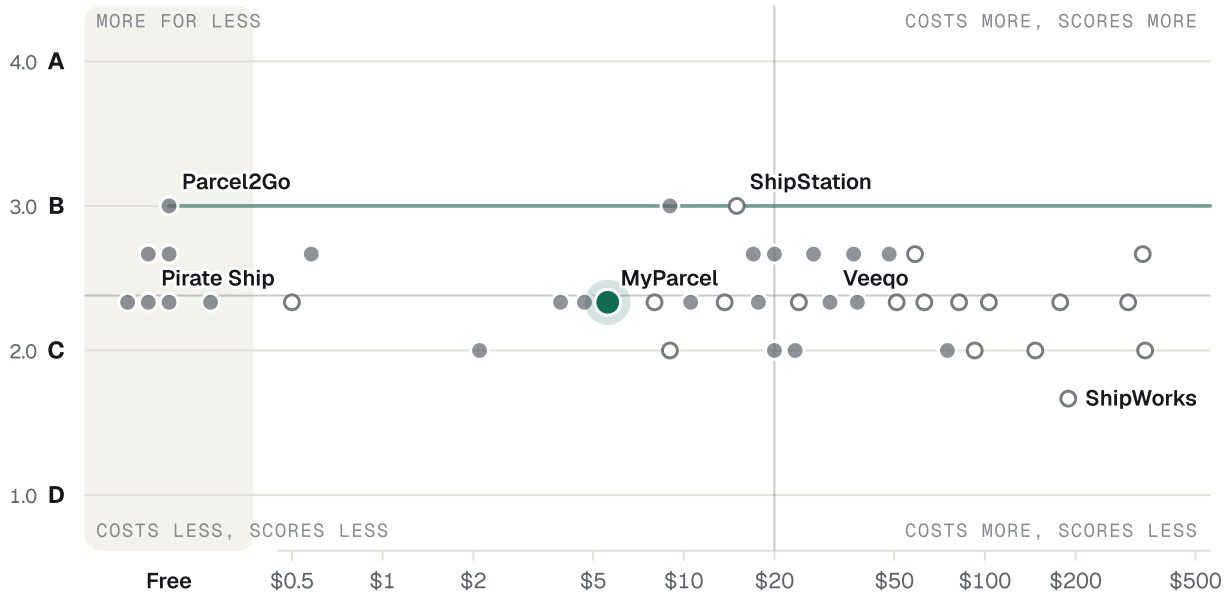

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. MyParcel's own letter is outlined.

Price against what you get

Each dot is one of 43 shipping software. Further left costs less; higher up scores better on features, ease of use and platforms. MyParcel is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace MyParcel you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.8 is higher than 69 of the 80 other shipping software we grade. It costs $67.03 a year.

What you could make

- Reports: an app builder makes this well.

What you could not

- Discounted carrier rates and labels, which take an agreement with each carrier.
- Connections to other products, each kept working as those products change.

What this rests on. MyParcel's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
