07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Nango's own pages, its app-store listings and our grades. Every fact in it is on Nango's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 54 of the 134 other automation tools we grade

Nango is developer infrastructure for connecting a product or an AI agent to outside APIs. It handles authorization and token refresh, runs tools, syncs and webhooks against those APIs, and offers an MCP server. The homepage says it is open source and self-hostable, and pricing is based on usage.

To get you started, here are **9 things to know about Nango**, taken from its own pages and our grades.

> "
>
> **It's a developer platform and needs code to use.**
>
> From our grade for ease of use

1 **Best for connecting your product or AI agent to outside APIs**

Nango is developer infrastructure that handles authorisation, syncs, webhooks and tools for connecting your product or an AI agent to other people's APIs.

2 **Paid plans start at $50 a month**

As its pricing page puts it: $50 per month, with $50 in usage credits included.

3 There is a free plan

10 connections, 10 hours of compute time and 10GB of data transfer a month, with hard caps that reset monthly.

4 It runs on Web

Web.

5 Managed authorization

Pre-built authentication, secure credential storage and token refresh for more than 1,200 APIs and MCP servers, including a request proxy.

6 Tools, triggers and syncs

Thousands of pre-built tools, triggers and syncs are available, and teams can extend the templates or write fully custom ones.

7 Webhooks

Incoming webhooks from outside APIs are verified and routed, for use in syncs or as triggers.

8 A 2.2 GPA, above 54 of 134

That is against the other automation tools we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Nango you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

OUR GRADE
2.2 GPA, fair

The report card

Best for connecting your product or AI agent to outside APIs

Nango is developer infrastructure that handles authorisation, syncs, webhooks and tools for connecting your product or an AI agent to other people's APIs. Free is capped at 10 connections, and costs scale with each customer account you connect. You also need to write code.

TOOLGPA REPORT CARD — **Nango** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	$50 a month with $50 in usage credits, at $0.29 a connection, $0.72 a compute hour and $0.50 a GB. That's the start of the dearer quarter.
Free plan and trial	C	Free gives 10 connections, 10 compute hours and 10GB, with hard caps that reset monthly. You'll hit them.
Features	B	Managed auth, tools, triggers and syncs, webhooks, an MCP server, logs and a unified API. The core job is covered.
Ease of use	D	No store rating on record. It's a developer platform and needs code to use.
Platforms and integrations	B	Web, with 6 integrations, an MCP server and an API.

Grade point average — Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Nango is for

- ✓ Fits if you're building a product that must connect to your customers' other apps
- ✓ Works for teams building AI agents that call outside APIs

Who it is not for

- ✕ Tight on Free: 10 connections, 10 compute hours and 10GB, with hard caps
- ✕ Not for you if you want a no-code app, since it needs code to use
- ✕ Watch out: a connection is one user's account for one API, so cost climbs with customers
- ✕ Pricey if you want more: the Growth add-on is $450 a month
- ✕ Watch out: self-hosting is an Enterprise offer, priced through sales

Good to know

Good for

- ✓ Developers adding customer-facing integrations to a SaaS product
- ✓ Teams giving AI agents authorized access to many third-party APIs
- ✓ Companies that want an open-source option they can self-host

Worth knowing

- ⓘ The Free plan has hard monthly caps of 10 connections, 10 compute hours and 10GB of data; usage beyond that needs the paid plan.
- ⓘ A connection is one user's authorized account for one API, so costs scale with how many customer accounts you connect.
- ⓘ A Growth add-on costs $450 per month, and self-hosting with support is listed under Enterprise.
- ⓘ It is a developer platform that needs code to use, not a no-code app for personal automations.

PART 02 · PRICING

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$50

A month to start. There is a free plan too

Nango has a free plan. Paid plans start at $50 per month, with $50 in usage credits included.

FREE

$0

API and MCP auth, tools and syncs with hard-capped monthly limits: 10 connections, 10 compute hours, 10GB of data.

PAY-AS-YOU-GO

$50

per month, includes $50 in usage credits

Usage rates of $0.29 per connection, $0.72 per compute hour and $0.50 per GB of data transfer.

ENTERPRISE

Custom

Commitment discounts, self-hosting, an MSA and SLA. Priced through sales.

The free plan

10 connections, 10 hours of compute time and 10GB of data transfer a month, with hard caps that reset monthly.

Read from nango.dev on Nov 13, 2026.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Integration infrastructure for products and AI agents. Here is what it does, as its own site describes it, and what it covers: open source, self-hostable, public API, workflow automation, AI agents.

> **Managed auth, tools, triggers and syncs, webhooks, an MCP server, logs and a unified API.**
>
> From our grade for features

Managed authorization

Pre-built authentication, secure credential storage and token refresh for more than 1,200 APIs and MCP servers, including a request proxy.

Tools, triggers and syncs

Thousands of pre-built tools, triggers and syncs are available, and teams can extend the templates or write fully custom ones.

Webhooks

Incoming webhooks from outside APIs are verified and routed, for use in syncs or as triggers.

MCP server for agents

A single MCP server exposes the tool library to AI agents, with permissions and scopes controlling what an agent may do.

Logs and audit trail

Built-in logs, metrics and alerting show every call, and traces can be exported in OpenTelemetry format on paid plans.

Unified API and white labeling

A unified API gives one schema across APIs, and white labeling plus custom OAuth apps remove Nango branding from the authorization flow.

Where it runs

Web

What it works with

HubSpot Notion Linear Slack Salesforce Gmail

Nango is made by Nango.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

54/134

Other automation tools it is graded above

Nango's GPA of 2.2 is higher than 54 of the 134 other automation tools we grade, and level with 35.

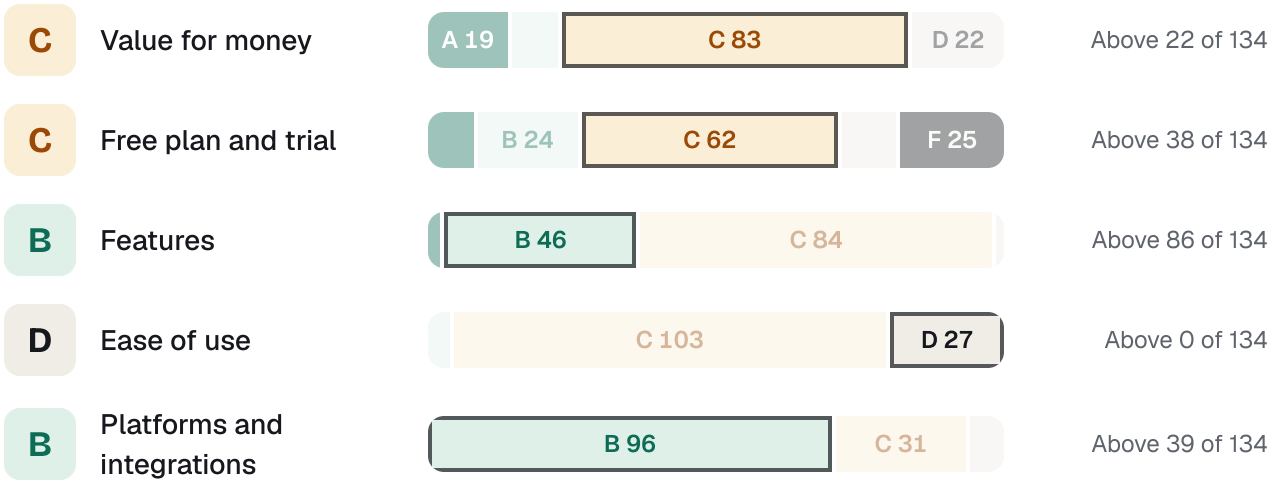

It stands best on features (B, above 86 of 134) and worst on ease of use (D, above 0).

Its paid plans start at $50 a month, against a middle price of $22.17 for the category: 49 of the 65 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 16 tools score higher and cost less.

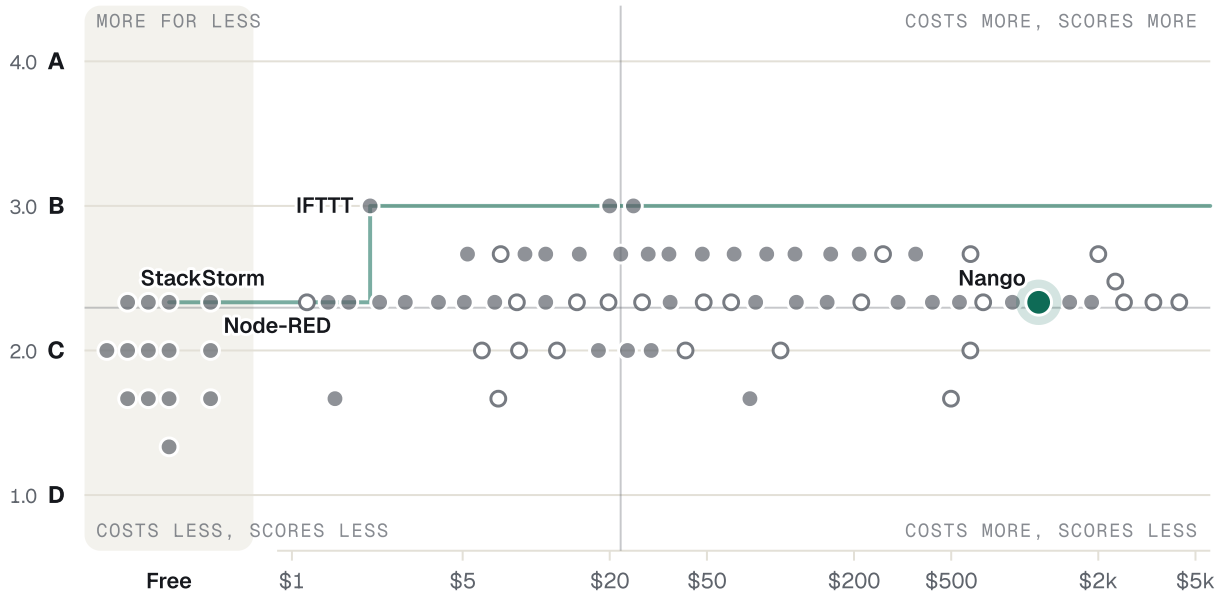

Each grade against the category

Every bar is all 135 automation tools we grade, cut by the letter each got. Nango's own letter is outlined.

Price against what you get

Each dot is one of 80 automation tools. Further left costs less; higher up scores better on features, ease of use and platforms. Nango is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Nango you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

It costs $600 a year. Nango is open source, so there is a third way: take its code and run it yourself.

What you could not

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ Connections to other products, each kept working as those products change.

- ✕ What a company asks for before it lets staff use something: roles and permissions.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Nango's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Paragon, Prismatic, Pandium, Alloy Automation and Appmixer

The 5 tools Nango is most often weighed against, with where each one differs from it.

2.2 GPA

Paragon

Free trial

Integration infrastructure for customer-facing integrations.

- Nango has a free plan. Paragon does not, though it has a free trial.
- Nango is open source and self-hostable, according to its own site.
- Nango also covers AI agents.

Nango and Paragon compared in full

1.8 GPA

Prismatic

Free trial

Embedded integration platform for B2B software companies.

- Nango has a free plan. Prismatic does not, though it has a free trial.
- Nango is open source and self-hostable, according to its own site.
- Nango also covers AI agents.

Nango and Prismatic compared in full

1.2
GPA

Pandium

From $499/mo

Embedded integration platform for B2B SaaS companies.

- Nango has a free plan. Pandium does not.
- Nango is open source and self-hostable, according to its own site.
- Nango also covers AI agents.

Nango and Pandium compared in full

2.0
GPA

Alloy Automation

Paid

Integration platform for internal workflows and embedded integrations.

- Nango has a free plan. Alloy Automation does not.
- Nango is open source and self-hostable, according to its own site.

Nango and Alloy Automation compared in full

1.8
GPA

Appmixer

Free trial · from $500/mo

White-label workflow automation embedded in your own SaaS.

- Nango has a free plan. Appmixer does not, though it has a free trial.
- Nango is open source, according to its own site.
- Nango also covers AI agents.

Nango and Appmixer compared in full

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

13

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Nango free?

Nango has a free plan. 10 connections, 10 hours of compute time and 10GB of data transfer a month, with hard caps that reset monthly.

How much does Nango cost?

Nango lists 3 plans. Free: $0.

What platforms does Nango work on?

Nango is available on Web.

Does Nango have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Nango is listed for Web.

Does Nango have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Nango is listed for Web.

Is Nango open source?

Yes. Nango is open source, according to its own site.

Does Nango have an API?

Yes. Nango offers a public API, according to its own site.

What does Nango integrate with?

Nango's listing names HubSpot, Notion, Linear, Slack, Salesforce and Gmail.

Who makes Nango?

Nango is made by a company of the same name.

What are the alternatives to Nango?

The closest alternatives to Nango in our directory are Paragon, Prismatic, Pandium, Alloy Automation and Appmixer.

How does Nango compare with other automation tools?

Nango's GPA of 2.2 is higher than 54 of the 134 other automation tools we grade, and level with 35.

Is Nango good value for money?

ToolGPA grades Nango C for value for money. Its paid plans start at $50 a month, against a middle price of $22.17 for the category: 49 of the 65 others that charge start lower.

Could I make my own version of Nango?

To replace Nango you would be making an AI agent, with the models and the safeguards behind it.

Where this guide comes from

The prices, plans, platforms and features were read from Nango's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Nango's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Nango. Prices change, so check nango.dev before you buy.
