Where it stands

Its grades against its category, and whether to keep it or make your own

0/133

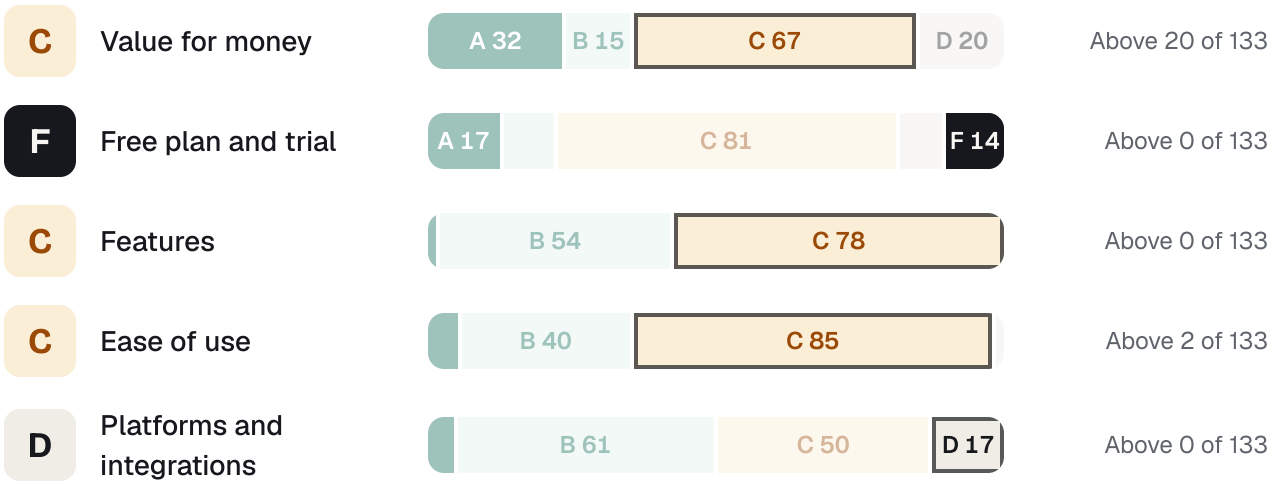

Other screen recording and video tools it is graded above

Nero Video's GPA of 1.4 is higher than 0 of the 133 other screen recording and video tools we grade.

It stands best on value for money (C, above 20 of 133) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 134 screen recording and video tools we grade, cut by the letter each got. Nero Video's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Nero Video you would be making a video editor. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 133 of the 133 other screen recording and video tools grade higher.

What you could make

- Templates: an app builder makes this well.

What you could not

- A video editor.
- Speech turned into text you can trust.
- A real app for Windows. Something home-made would be a web page.
- Sharing with other people, which means accounts and invitations.

What this rests on. Nero Video's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
