Who NimbusPost is for

- ✓ Fits if you sell in India and want courier rates in one dashboard
- ✓ Works for a seller who needs cash on delivery handled

Who it is not for

- ✗ Skip it if you ship outside India, as the rates are in rupees for Indian parcels
- ✗ Watch out: NDR automation and early COD payouts are add-ons
- ✗ Watch out: the pricing page also shows a second set of plan names with placeholder text, so the list may be incomplete
- ✗ Tight if you need B2B pricing, as it sits on a separate tab and is not recorded here

Good to know

Good for

- ✓ Indian D2C brands shipping parcels domestically
- ✓ Sellers wanting several couriers through one account

Worth knowing

- ⓘ NDR automation and early COD payouts are add-ons.
- ⓘ The page also shows a second set of plan names with placeholder text, so the plan list may be incomplete.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

1/33

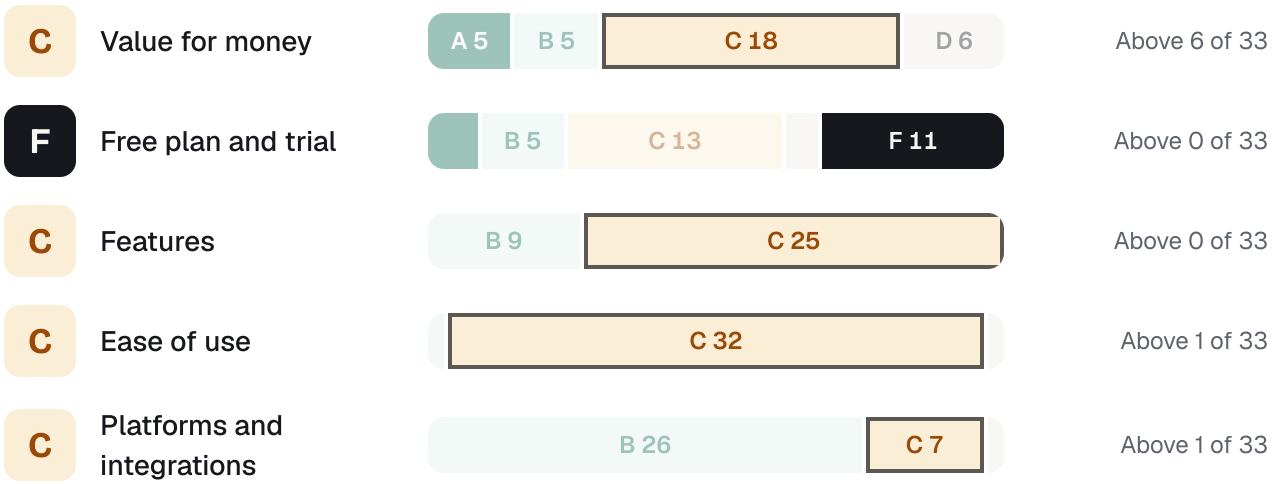

Other shipping software it is graded above

NimbusPost's GPA of 1.6 is higher than 1 of the 33 other shipping software we grade, and level with 4.

It stands best on value for money (C, above 6 of 33) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 34 shipping software we grade, cut by the letter each got. NimbusPost's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace NimbusPost you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 28 of the 33 other shipping software grade higher.

What you could make

- Reports: an app builder makes this well.

What you could not

- Discounted carrier rates and labels, which take an agreement with each carrier.
- Connections to other products, each kept working as those products change.

What this rests on. NimbusPost's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
