Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Notte's own pages, its app-store listings and our grades. Every fact in it is on Notte's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 30 of the 178 other AI agents we grade

Notte is a browser platform for AI agents. It runs cloud browser sessions at scale, with stealth and captcha solving, and adds agents that follow a plain-language task, reusable functions, persistent browser profiles called personas, and credential vaults. Plans grant monthly credits that are spent on sessions, proxies and model tokens.

To get you started, here are **9 things to know about Notte**, taken from its own pages and our grades.

> "
>
> **It is used through an SDK and API, so it takes code.**
>
> From our grade for ease of use

1 **Best for cloud browsers and agent identities**

Notte runs cloud browser sessions for agents, with stealth, CAPTCHA solving, saved browser profiles and credential vaults.

2 **Paid plans start at $20 a month**

As its pricing page puts it: $20 per month.

3 **You can try it first**

$10 in credits granted once on sign-up, no card needed, no expiry

4 **It runs on Web**

Web.

5 Cloud browser sessions

Launches many concurrent browser instances, with live view, session replays, stealth and captcha solving included on every plan.

6 Browser agents

An agent takes a task described in plain language and carries it out on the web without selectors to maintain.

7 Functions

Browser functions run as billed workloads on the platform, charged by the hour.

8 A 1.8 GPA, above 30 of 178

That is against the other AI agents we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Notte you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

Notte at a glance

PRICING Free trial, from $20 per month	FREE PLAN No
FREE TRIAL $10 in credits granted once on sign-up, no card needed, no expiry	RUNS ON Web
MADE BY Notte Labs Inc.	CATEGORY AI Agents
OUR GRADE 1.8 GPA, weak	

The report card

Best for cloud browsers and agent identities

Notte runs cloud browser sessions for agents, with stealth, CAPTCHA solving, saved browser profiles and credential vaults. The free plan is a one-time $10 of credits, and plan credits expire each month.

TOOLGPA REPORT CARD	Notte	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	Developer is $20 a month with $20 of credits that expire each cycle, so most of it is prepaid usage. Startup is $100.
Free plan and trial	C	A one-time $10 in credits with no card, 5 concurrent browsers and 15-minute sessions. It runs out and does not refill.
Features	C	Sessions, agents, functions, personas and vaults. Bring-your-own keys and proxies wait for the $100 Startup plan.
Ease of use	D	No rating on record. It is used through an SDK and API, so it takes code.
Platforms and integrations	C	Web service only, with no integrations named. No desktop or phone app.

Grade point average — Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Notte is for

- ✓ Fits if you want to try browser agents for a few runs with no card
- ✓ Works for developers who need saved logins across agent sessions

Who it is not for

- ✕ Tight if you stay free: $10 once, 5 browsers and 15-minute sessions
- ✕ Watch out: plan credits expire at the end of each cycle, though top-ups do not
- ✕ Watch out: usage is billed on top, with residential proxies at $10 per GB
- ✕ Skip it if you need to bring your own keys or proxies below the $100 Startup plan

Good to know

Good for

- ✓ Developers running browser agents or scrapers that need stealth and proxies
- ✓ Teams that want usage-based billing with credits instead of per-seat fees
- ✓ Engineers testing an agent platform with a free credit grant first

Worth knowing

- ⓘ Usage is billed on top of the credits: sessions $0.01 an hour, functions $0.05 an hour, residential proxies $10 per GB.
- ⓘ Monthly plan credits expire at the end of each cycle; extra purchased top-ups do not.
- ⓘ Bring-your-own keys and proxies start on the Startup plan; Free and Developer sessions cap at 15 and 120 minutes.
- ⓘ Model tokens are passed through without a Notte markup when Notte-managed keys are used.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$20
A month to start

Notte is a paid product with a free trial, starting at $20 per month.

FREE

$0

One-time $10 of credits, 5 concurrent browsers and 15-minute sessions.

DEVELOPER

$20

per month

$20 of credits a month that expire each cycle, 25 concurrent browsers and 120-minute sessions.

STARTUP

$100

per month

$100 of credits a month, 100 concurrent browsers, 300-minute sessions, bring-your-own keys and proxies.

ENTERPRISE

Custom

Custom limits, SSO, SLAs, HIPAA, on-premise deployment and bring-your-own cloud.

Trying it first

$10 in credits granted once on sign-up, no card needed, no expiry

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Cloud browsers, identities and agents for web automation. Here is what it does, as its own site describes it, and what it covers: public API, workflow automation, AI agents.

> "
>
> **Sessions, agents, functions, personas and vaults.**
>
> From our grade for features

Cloud browser sessions

Launches many concurrent browser instances, with live view, session replays, stealth and captcha solving included on every plan.

Browser agents

An agent takes a task described in plain language and carries it out on the web without selectors to maintain.

Functions

Browser functions run as billed workloads on the platform, charged by the hour.

Personas and vaults

Browser profiles for each agent and credential vaults keep identities and logins available across runs.

Proxies

Residential proxies are available when enabled, and the Startup plan accepts your own proxy at a lower per-GB rate.

Where it runs

Web

What it works with

Its own pages name no integrations.

Notte is made by Notte Labs Inc.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

30/178

Other AI agents it is graded above

Notte's GPA of 1.8 is higher than 30 of the 178 other AI agents we grade, and level with 33.

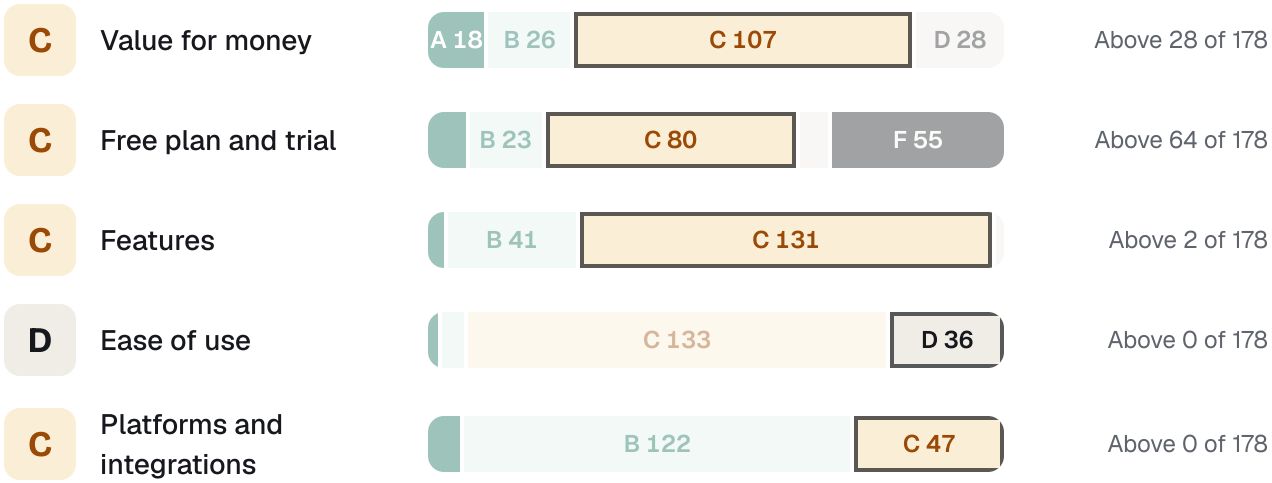

It stands best on free plan and trial (C, above 64 of 178) and worst on ease of use (D, above 0).

Its paid plans start at $20 a month, against a middle price of $25 for the category: 29 of the 98 others that charge start lower.

On features, ease of use and platforms it scores 1.7 out of 4. 35 tools score higher and cost less.

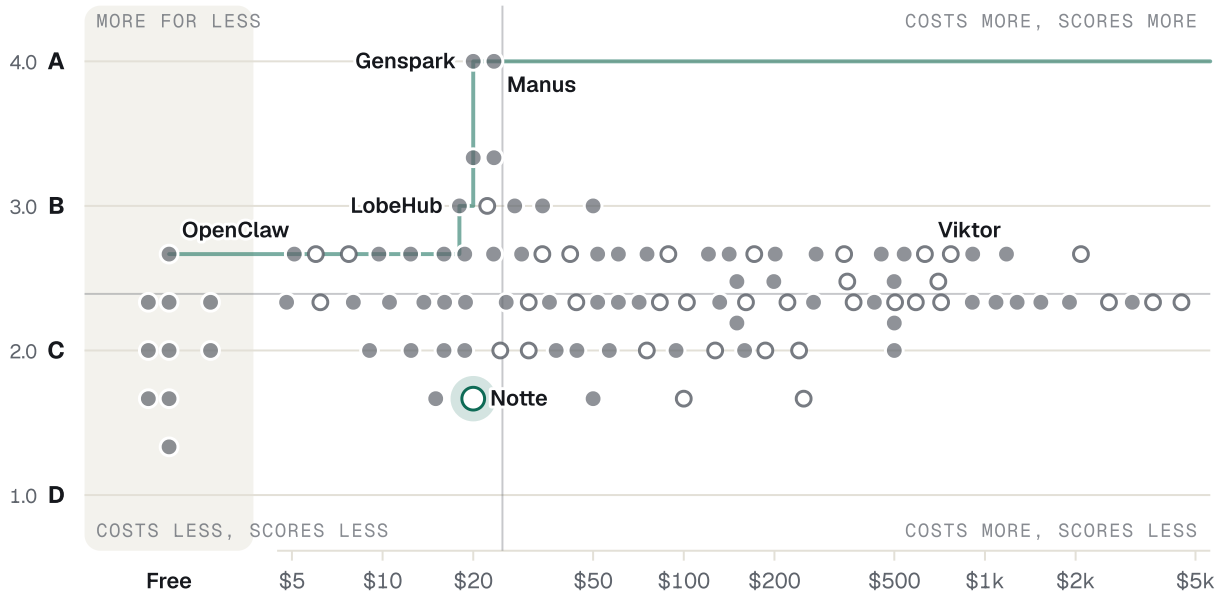

Each grade against the category

Every bar is all 179 AI agents we grade, cut by the letter each got. Notte's own letter is outlined.

Price against what you get

Each dot is one of 109 AI agents. Further left costs less; higher up scores better on features, ease of use and platforms. Notte is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Notte you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 115 of the 178 other AI agents grade higher. It costs $240 a year.

What you could not

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ Connections to other products, each kept working as those products change.

What this rests on. Notte's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Browserbase, Browser Use, Kernel, Hyperbrowser and Steel

The 5 tools Notte is most often weighed against, with where each one differs from it.

2.2 GPA

Browserbase

Free plan · from $20/mo

Cloud browsers and APIs for agents that use the web.

- Browserbase has a free plan. Notte does not, though it has a free trial.

Notte and Browserbase compared in full

2.6 GPA

Browser Use

Free plan · from $5

Browser agents and cloud browsers for AI apps.

- Browser Use has a free plan. Notte does not, though it has a free trial.
- Browser Use is open source, according to its own site.
- Notte also covers workflow automation.

Notte and Browser Use compared in full

2.0 GPA

Kernel

Free plan · from $30/mo

Cloud browser infrastructure for web agents and automations.

- Kernel has a free plan. Notte does not, though it has a free trial.
- Kernel is open source, according to its own site.
- Kernel also covers screen recording.

Notte and Kernel compared in full

2.2 GPA

Hyperbrowser

Free trial · from $30/mo

Cloud browsers, sandboxes and web APIs for AI agents.

- Hyperbrowser also covers screenshots.

Notte and Hyperbrowser compared in full

1.6 GPA

Steel

Free trial · from $250/mo

Open-source browser infrastructure for AI agents.

- Steel is open source and self-hostable, according to its own site.
- Notte also covers workflow automation.

Notte and Steel compared in full

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

12

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Notte free?

No, Notte is a paid product, but you can try it first. $10 in credits granted once on sign-up, no card needed, no expiry.

How much does Notte cost?

Notte lists 4 plans. Free: $0.

What platforms does Notte work on?

Notte is available on Web.

Does Notte have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Notte is listed for Web.

Does Notte have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Notte is listed for Web.

Is Notte open source?

Notte is not described as open source on its own site, as read on Nov 13, 2026.

Does Notte have an API?

Yes. Notte offers a public API, according to its own site.

Who makes Notte?

Notte is made by Notte Labs Inc.

What are the alternatives to Notte?

The closest alternatives to Notte in our directory are Browserbase, Browser Use, Kernel, Hyperbrowser and Steel.

How does Notte compare with other AI agents?

Notte's GPA of 1.8 is higher than 30 of the 178 other AI agents we grade, and level with 33.

Is Notte good value for money?

ToolGPA grades Notte C for value for money. Its paid plans start at $20 a month, against a middle price of $25 for the category: 29 of the 98 others that charge start lower.

Could I make my own version of Notte?

To replace Notte you would be making an AI agent, with the models and the safeguards behind it.

Where this guide comes from

The prices, plans, platforms and features were read from Notte's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Notte Labs Inc.'s own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Notte Labs Inc. Prices change, so check notte.cc before you buy.
