Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 11 of the 89 other AI meeting note takers we grade

Noty transcribes meetings live in more than 90 languages, writes a shareable summary afterward and pulls out tasks, deadlines and owners into a to-do list that can be emailed to assignees. A chat box answers questions about past meetings. Plans are a per-user subscription, an hourly pay-as-you-go option and a discounted plan for schools.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

11/89

Other AI meeting note takers it is graded above

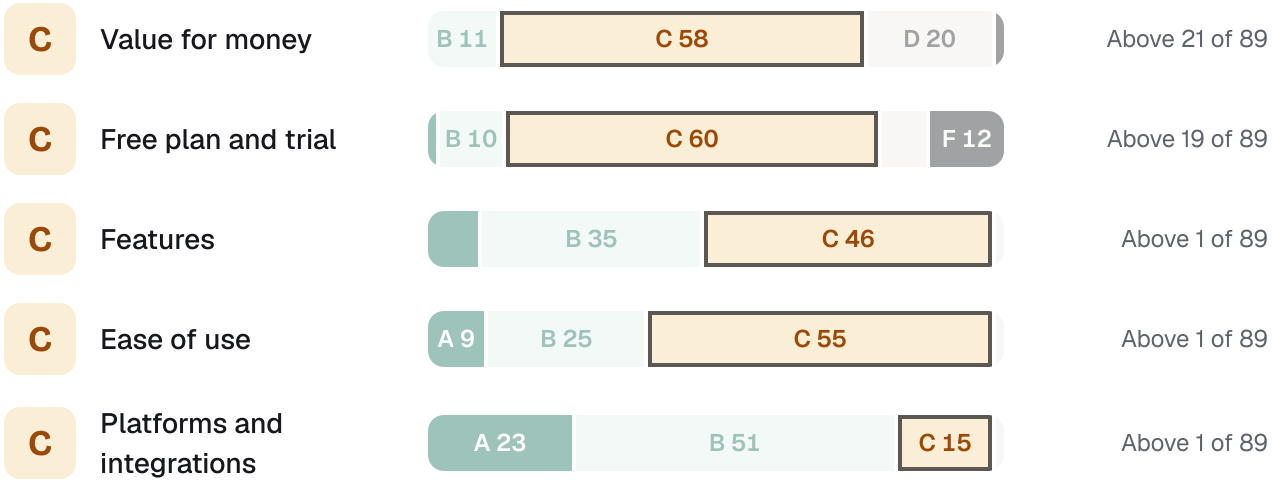

Noty's GPA of 2.0 is higher than 11 of the 89 other AI meeting note takers we grade, and level with 8.

Its paid plans start at $10 a month for each person, against a middle price of $12 for the category: 28 of the 76 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 27 tools score higher and cost less.

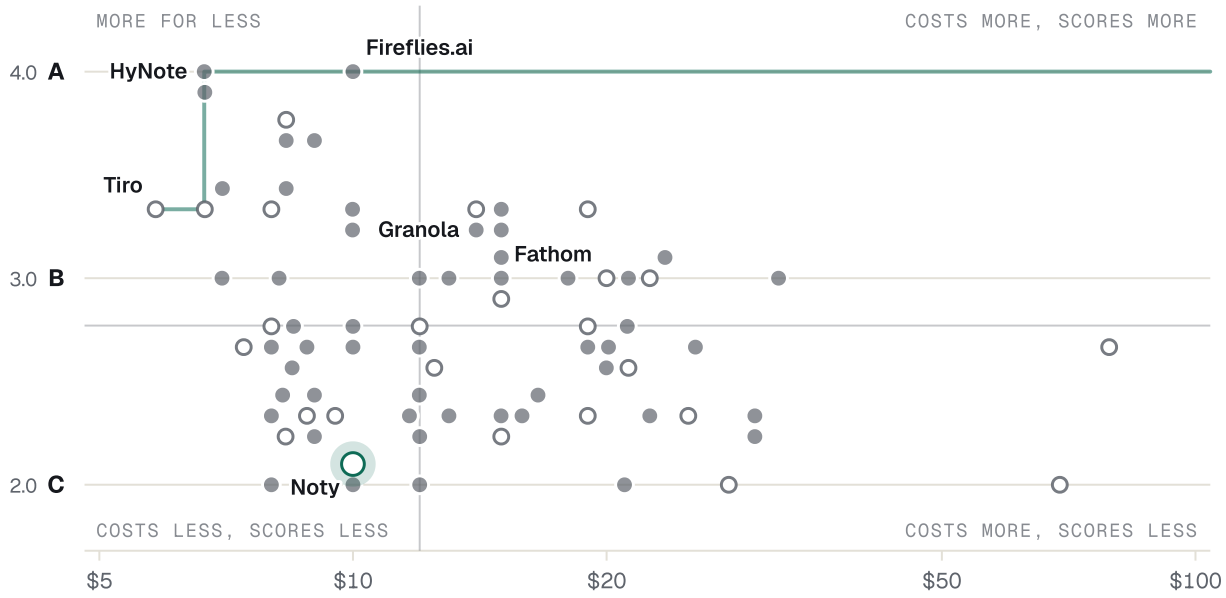

Each grade against the category

Every bar is all 90 AI meeting note takers we grade, cut by the letter each got. Noty's own letter is outlined.

Price against what you get

Each dot is one of 77 AI meeting note takers. Further left costs less; higher up scores better on features, ease of use and platforms. Noty is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Noty you would be making a bot that joins your calls and turns the talk into notes. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 70 of the 89 other AI meeting note takers grade higher. It costs $120 a year.

What you could make

- Tasks: an app builder makes this well.

What you could not

- A bot that joins your calls and turns the talk into notes.

- An AI model, which you can rent by the request but not make.
- A search engine with an AI model behind it.
- Speech turned into text you can trust.
- It is priced for each person, which means accounts and billing for a team.

What this rests on. Noty's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
