- ✓ Fits if you are a retailer that wants checkout delivery options, labels and returns from one vendor

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

31/80

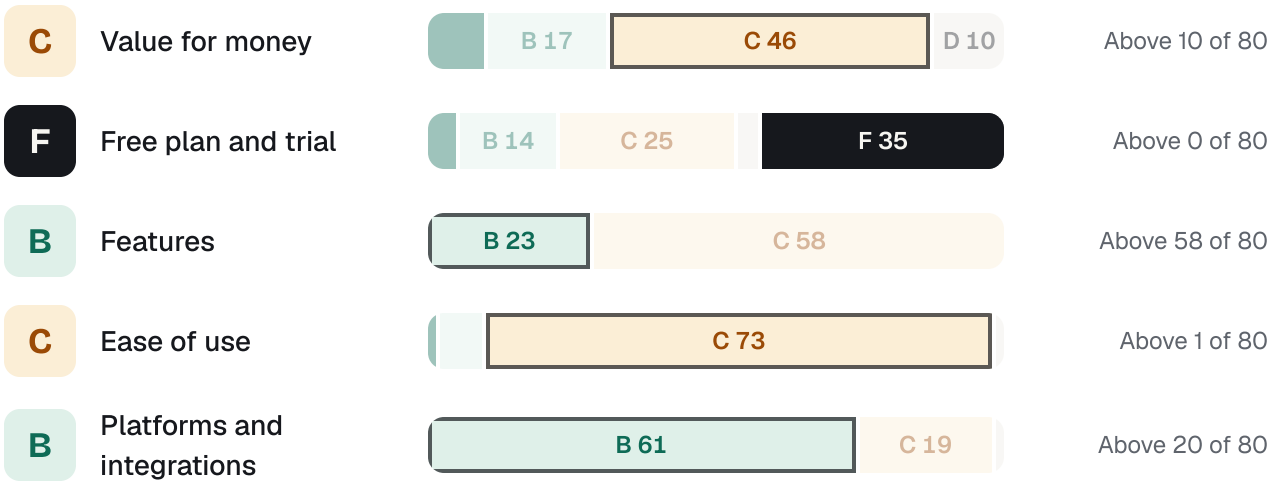

Other shipping software it is graded above

nShift's GPA of 2.0 is higher than 31 of the 80 other shipping software we grade, and level with 10.

It stands best on features (B, above 58 of 80) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. nShift's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace nShift you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Reports: an app builder makes this well.

What you could not

- Discounted carrier rates and labels, which take an agreement with each carrier.
- Checkout, card payments and sales tax handled for you.
- Connections to other products, each kept working as those products change.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. nShift's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
