Who NutriAdmin is for

- ✕ Pricey if you want payments or auto-generated plans, as those start at the $41.66 Popular plan
- ✕ Watch out: telehealth is an add-on at $5 a month or $50 a year for 20 hours
- ✕ Not for you if you need insurance billing, because it is nutrition software, not a general therapy EHR

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

15/60

Other therapy and clinic software it is graded above

NutriAdmin's GPA of 1.8 is higher than 15 of the 60 other therapy and clinic software we grade, and level with 11.

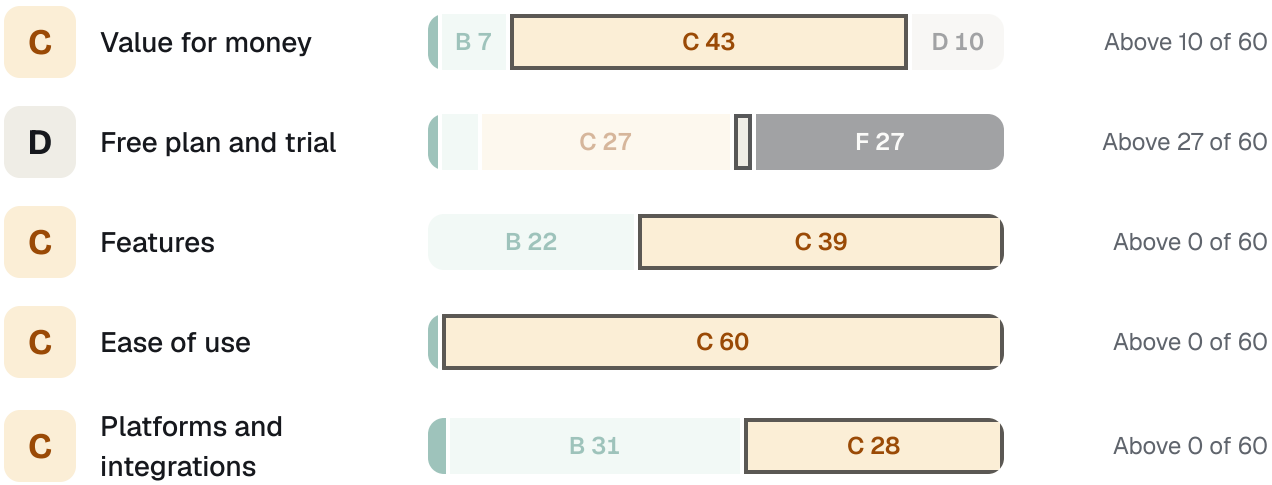

It stands best on value for money (C, above 10 of 60) and worst on free plan and trial (D, above 27).

Its paid plans start at $29.16 a month, against a middle price of $35.75 for the category: 11 of the 32 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 10 tools score higher and cost less.

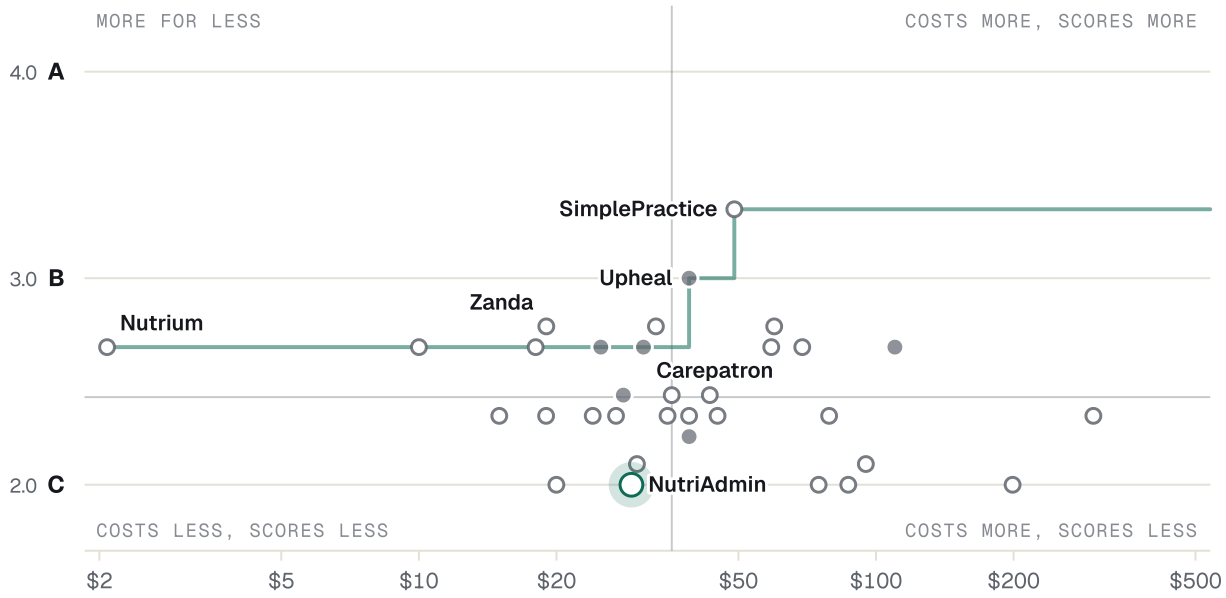

Each grade against the category

Every bar is all 61 therapy and clinic software we grade, cut by the letter each got. NutriAdmin's own letter is outlined.

Price against what you get

Each dot is one of 33 therapy and clinic software. Further left costs less; higher up scores better on features, ease of use and platforms. NutriAdmin is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace NutriAdmin you would be making video sessions that meet health privacy rules. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 34 of the 60 other therapy and clinic software grade higher. It costs $349.92 a year.

What you could make

- Clinical notes and appointment booking: an app builder makes these well.

What you could not

- Video sessions that meet health privacy rules.
- AI features, unless you pay a model provider for each request yourself.
- People on the other end: coaches. No app builder makes those.
- What a company asks for before it lets staff use something: HIPAA.

What this rests on. NutriAdmin’s listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool’s verdict.
