1.8

GPA, above 6 of the 91 other file storage and sync services we grade

odrive now presents itself as a two-way desktop sync client for Procore project documents, aimed at construction companies. It uses placeholder files and selective sync so a project folder appears on the desktop without downloading everything. Enterprise plans add server and SharePoint sync to Procore.

To get you started, here are **9 things to know about odrive**, taken from its own pages and our grades.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

6/91

Other file storage and sync services it is graded above

odrive's GPA of 1.8 is higher than 6 of the 91 other file storage and sync services we grade, and level with 6.

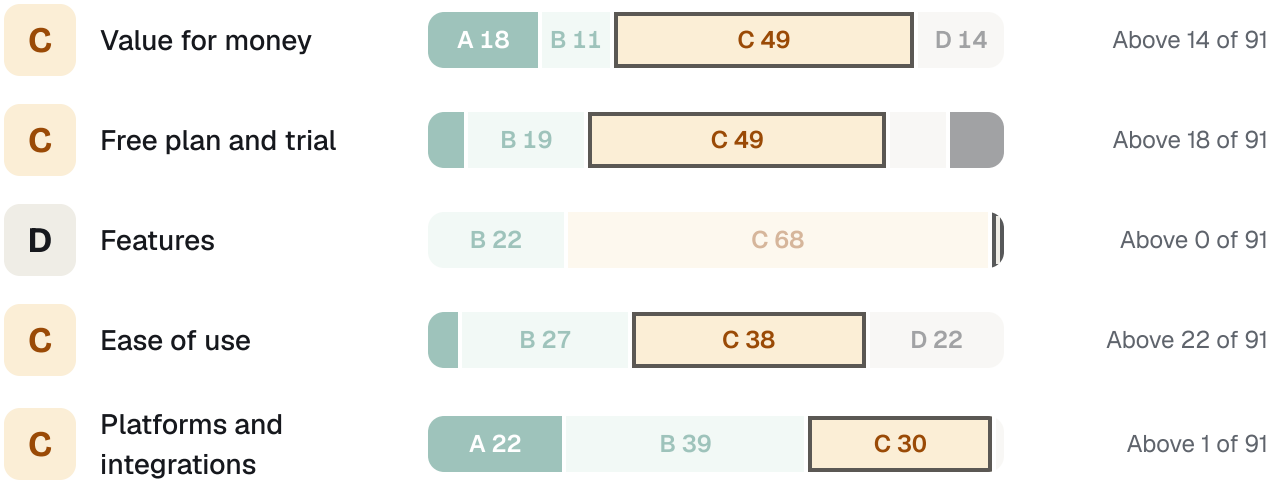

It stands best on ease of use (C, above 22 of 91) and worst on features (D, above 0).

Its paid plans start at $20 a month for each person, against a middle price of $6.64 for the category: 54 of the 60 others that charge start lower.

On features, ease of use and platforms it scores 1.7 out of 4. 55 tools score higher and cost less.

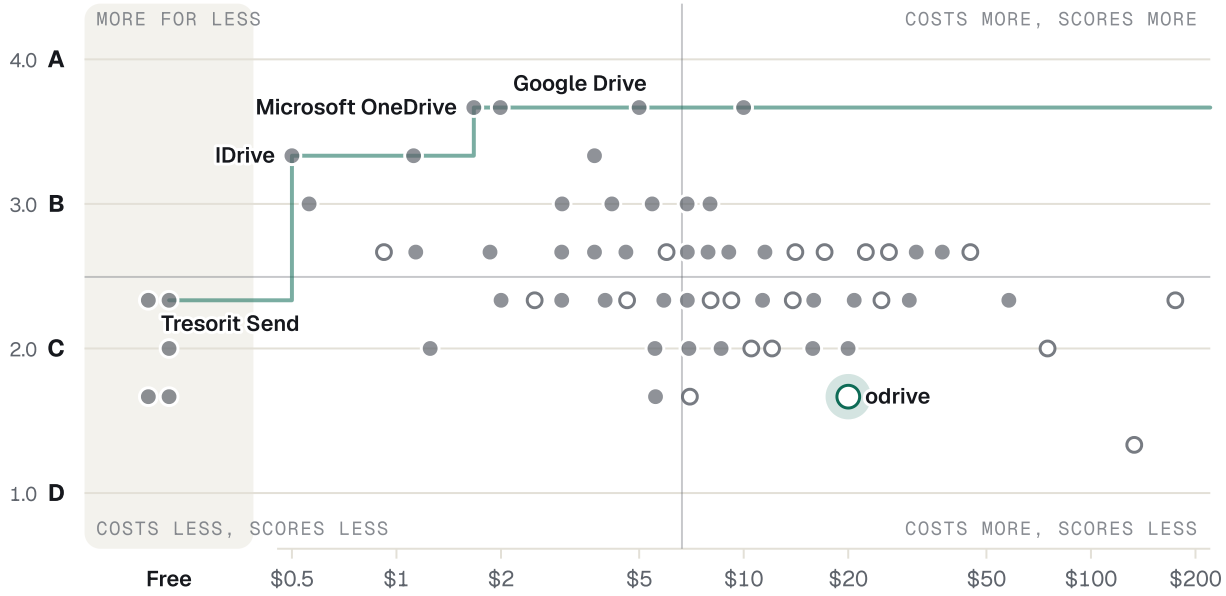

Each grade against the category

Every bar is all 92 file storage and sync services we grade, cut by the letter each got. odrive's own letter is outlined.

Price against what you get

Each dot is one of 66 file storage and sync services. Further left costs less; higher up scores better on features, ease of use and platforms. odrive is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace odrive you would be making files kept in step across devices without losing one. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 79 of the 91 other file storage and sync services grade higher. It costs $240 a year.

What you could not

- ✕ Files kept in step across devices without losing one.
- ✕ A file manager working directly on your disk.

- ✕ A real app for macOS and Windows. Something home-made would be a web page.
- ✕ It is priced for each person, which means accounts and billing for a team.
- ✕ What a company asks for before it lets staff use something: roles and permissions.

What this rests on. odrive's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
