PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

35/136

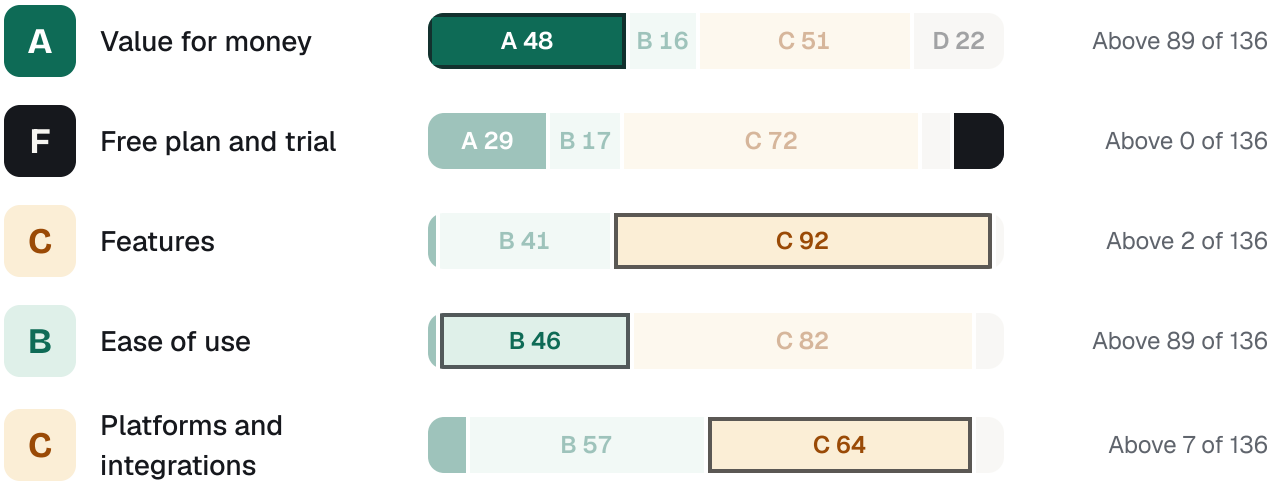

Other writing tools it is graded above

OmmWriter's GPA of 2.2 is higher than 35 of the 136 other writing tools we grade, and level with 23.

It stands best on value for money (A, above 89 of 136) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 137 writing tools we grade, cut by the letter each got. OmmWriter's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

A writing app at its plainest is a page that saves what you type.

You could make the core of OmmWriter for yourself: documents. What you would give up is listed below. Whether that is worth the price is your call. At $9.99, paid once, it costs less than the weekend it would take to replace, which is the argument for keeping it.

What you could make

- Documents: an app builder makes this well.

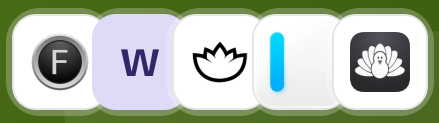

What you could not

- ✕ A library of sound you would have to license.
- ✕ A real app for macOS and Windows. Something home-made would be a web page.

What this rests on. OmmWriter's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
