PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

5/122

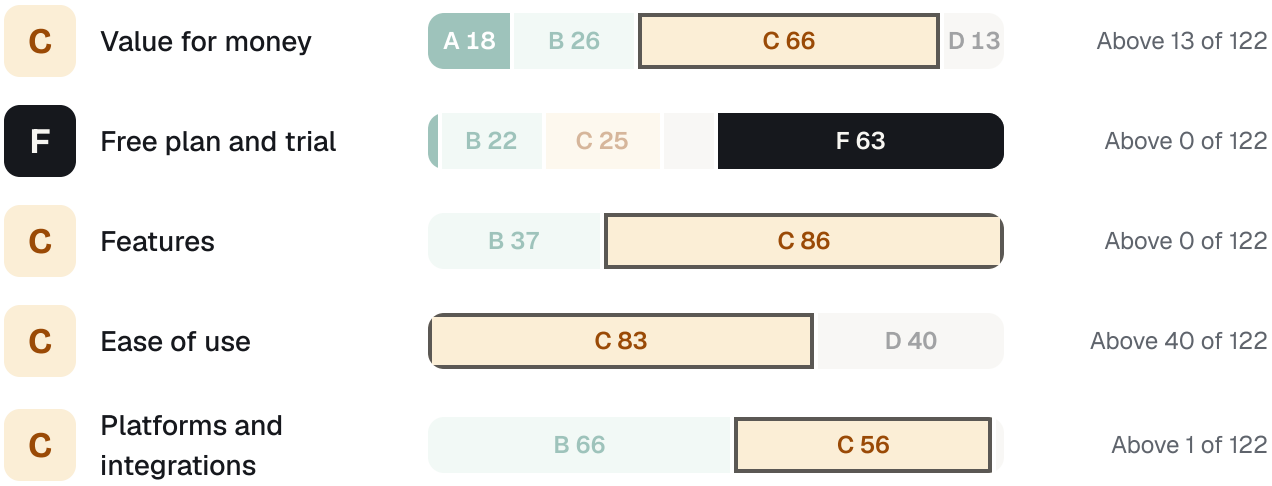

Other web hosts it is graded above

One.com's GPA of 1.6 is higher than 5 of the 122 other web hosts we grade, and level with 23.

It stands best on ease of use (C, above 40 of 122) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 123 web hosts we grade, cut by the letter each got. One.com's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace One.com you would be making servers kept running, patched and backed up for you. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 94 of the 122 other web hosts grade higher.

What you could not

- ✕ Servers kept running, patched and backed up for you.
- ✕ An engine that recognises new malware as it appears.
- ✕ Databases with views, filters and links between them.
- ✕ It plugs into other products, WordPress, Microsoft 365 and Plesk among them.

What this rests on. One.com's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
