PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

70/149

Other project management tools it is graded above

ONES's GPA of 2.4 is higher than 70 of the 149 other project management tools we grade, and level with 27.

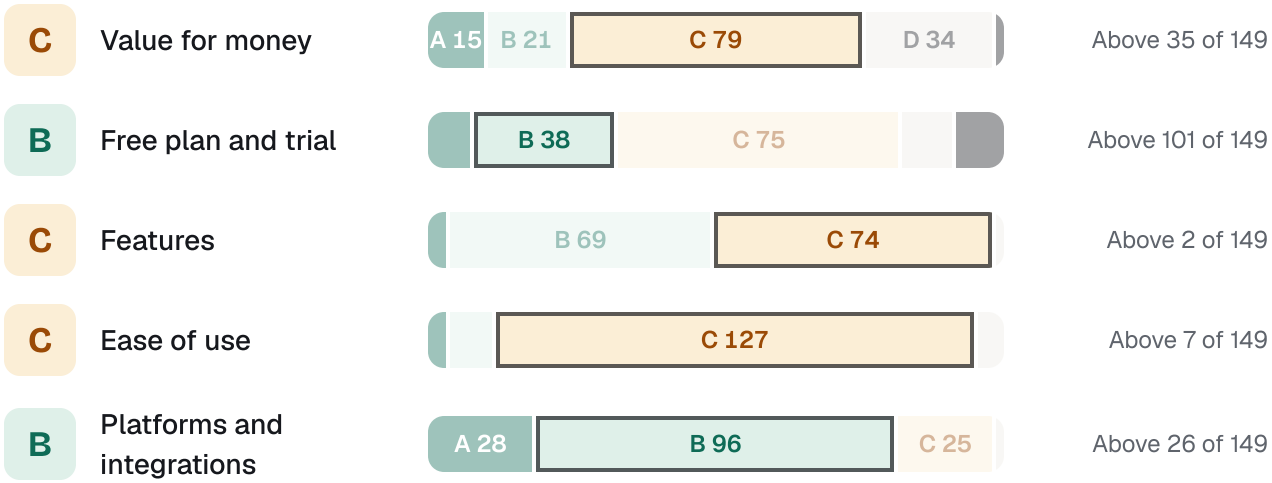

It stands best on free plan and trial (B, above 101 of 149) and worst on features (C, above 2).

Its paid plans start at $8.21 a month when paid by the year for each person, against a middle price of $9 for the category: 53 of the 121 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 28 tools score higher and cost less.

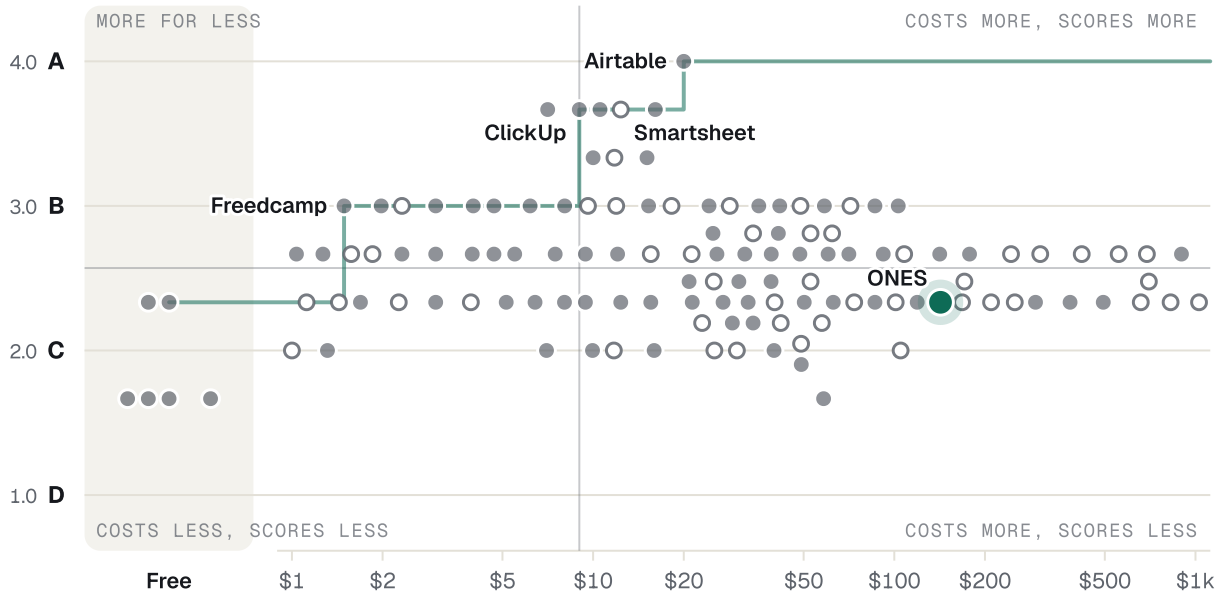

Each grade against the category

Every bar is all 150 project management tools we grade, cut by the letter each got. ONES's own letter is outlined.

Price against what you get

Each dot is one of 128 project management tools. Further left costs less; higher up scores better on features, ease of use and platforms. ONES is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace ONES you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

It costs $98.50 a year.

What you could make

- Issue tracking, Gantt & timelines, kanban boards and wiki: an app builder makes these well.

What you could not

- Connections to other products, each kept working as those products change.

- ✕ It is priced for each person, which means accounts and billing for a team.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. ONES's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
