Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from OpenServ's own pages, its app-store listings and our grades. Every fact in it is on OpenServ's page too, where it is kept up to date. Checked Nov 13, 2026.

# Welcome

What it is, who it suits, its grades and the ten things to know first

**1.8**

GPA, above 30 of the 178 other AI agents we grade

OpenServ's main product is SERV Reasoning, an API that sits in front of OpenAI- and Anthropic-compatible models and turns tasks into structured, validated steps, with a dashboard for tracking cost and decisions. The company also offers a no-code agent builder and workflows. It describes enterprise, bank and government customers as its focus.

To get you started, here are **7 things to know about OpenServ**, taken from its own pages and our grades.

> **It publishes no plans, there is no free tier on record, and the compliance certificates it names are still roadmap items.**
>
> From our report card of OpenServ

**1** **Best for reasoning API and agent builder**

OpenServ sells a reasoning API and a no-code agent builder, paid for with prepaid credits.

**2** **It runs on Web**

Web.

3 **SERV Reasoning API**

Works with the OpenAI and Anthropic SDKs by changing the base URL and API key, and routes calls through structured reasoning steps.

4 **Schema-forced outputs**

Each step has input and output schemas and validation, so results conform to a specification instead of free text.

5 **Shadow agents and guards**

Separate verification agents review decisions, and requests are screened for prompt injection and output leakage.

6 **A 1.8 GPA, above 30 of 178**

That is against the other AI agents we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace OpenServ you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

### OpenServ at a glance

| OUR GRADE<br>1.8 GPA, weak | |

## The report card

### Best for reasoning API and agent builder

OpenServ sells a reasoning API and a no-code agent builder, paid for with prepaid credits. It publishes no plans, there is no free tier on record, and the compliance certificates it names are still roadmap items. The company also runs a crypto token alongside the product.

TOOLGPA REPORT CARD — **OpenServ** — Graded Nov 13, 2026

| SUBJECT | GRADE | COMMENT |
|---|---|---|
| **Value for money** | C | No plans or monthly prices are published. The docs describe prepaid credits with model prices per million tokens, so cost depends on use. |
| **Free plan and trial** | F | No free plan or trial is listed. You buy credits first. |
| **Features** | C | Reasoning API, schema-forced outputs, guard agents, a playground and a no-code builder. It is a platform with a lot of surface and few details on the pages read. |
| **Ease of use** | C | No store rating on record. There is a no-code builder, but you also set up API keys and credits first. |
| **Platforms and integrations** | B | Web dashboard and an API, with OpenAI, Anthropic, Google, LangChain and the Vercel AI SDK listed. No desktop or phone app. |

**Grade point average** — Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

### Who OpenServ is for

- ✓ Fits if you want a reasoning API billed by credits rather than a subscription
- ✓ Works for developers who want agent guards and structured outputs in one place

### Who it is not for

- ✕ Skip it if you want published prices, as none are listed and enterprise goes through sales
- ✕ Not for you if you need a free way to try it, since none is on record
- ✕ Watch out: SOC 2, ISO 27001 and HIPAA are shown as roadmap items, not as held
- ✕ Watch out: the company also runs a $SERV crypto token and a token launch platform, described on its site as part of the ecosystem

## Good to know

### Good for

- ✓ Developers who want a drop-in layer to make existing LLM calls more reliable
- ✓ Regulated organizations that need an audit trail of agent decisions
- ✓ Teams building agents who want a no-code option too

### Worth knowing

- ⓘ No plans or subscription prices are published; the docs describe buying prepaid credits, with model prices listed per million tokens.
- ⓘ Enterprise buyers are directed to talk to sales.
- ⓘ The company also runs a $SERV crypto token and a token launch platform, described on its site as part of the ecosystem.
- ⓘ SOC 2, ISO 27001 and HIPAA are listed as roadmap items or coming next, not as held.

# What it costs

Every plan, the free plan, ways to pay less and how prices have moved

OpenServ's current pricing could not be confirmed from its own site.

> **No plans or monthly prices are published.**
>
> From our grade for value for money

We could not confirm OpenServ's current prices from its own site, so this guide lists no plans. openserv.ai has them.

# What it does

Its main features, where it runs, what it works with and who makes it

**1**

Place it runs: Web

SERV reasoning layer and agent builder for production AI agents. Here is what it does, as its own site describes it, and what it covers: public API, workflow automation, AI agents, no-code.

> **Reasoning API, schema-forced outputs, guard agents, a playground and a no-code builder.**
>
> From our grade for features

### SERV Reasoning API

Works with the OpenAI and Anthropic SDKs by changing the base URL and API key, and routes calls through structured reasoning steps.

### Schema-forced outputs

Each step has input and output schemas and validation, so results conform to a specification instead of free text.

### Shadow agents and guards

Separate verification agents review decisions, and requests are screened for prompt injection and output leakage.

### Playground and dashboard

A playground compares a model with and without SERV Reasoning, and a dashboard tracks request cost, latency and decisions.

## No-code agent builder

Build agents and workflows without code, with templates and an agent directory described in the no-code docs.

### Where it runs

Web

### What it works with

OpenAI
Anthropic
Google
LangChain
Vercel AI SDK

OpenServ is made by OpenServ.

PART 04 · STANDING

# Where it stands

Its grades against its category, and whether to keep it or make your own

**30/178**

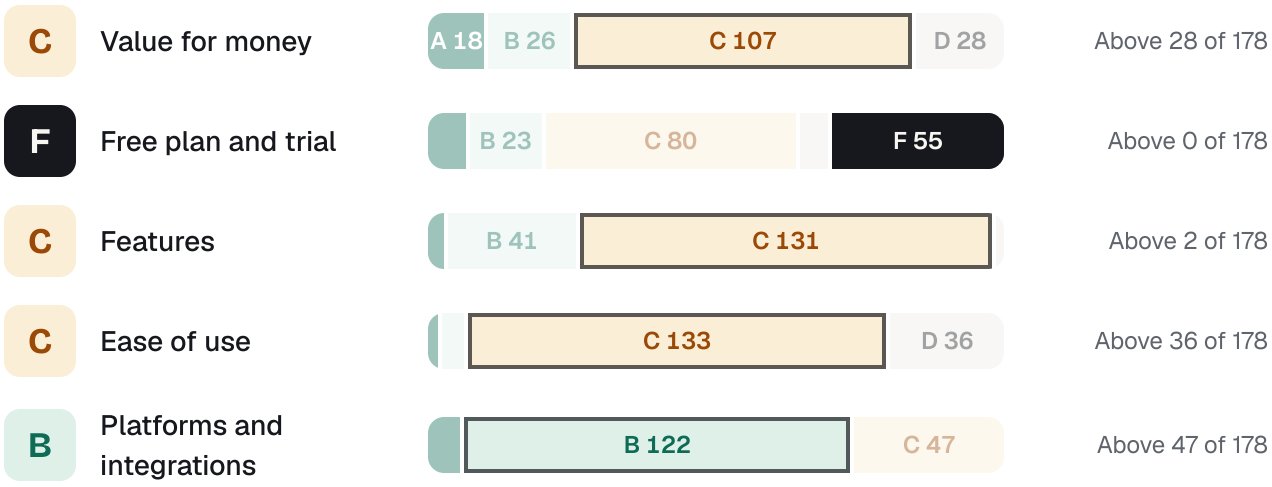

Other AI agents it is graded above

OpenServ's GPA of 1.8 is higher than 30 of the 178 other AI agents we grade, and level with 33.

It stands best on platforms and integrations (B, above 47 of 178) and worst on free plan and trial (F, above 0).

## Each grade against the category

Every bar is all 179 AI agents we grade, cut by the letter each got. OpenServ's own letter is outlined.

## Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

## Keep it

To replace OpenServ you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 115 of the 178 other AI agents grade higher.

### What you could not

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ A builder that other people can use without writing code.
- ✕ Connections to other products, each kept working as those products change.

**What this rests on.** OpenServ's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

# The alternatives

The tools it is most often weighed against, side by side

Fetch.ai Agentverse, CrewAI, Relevance AI, Orq.ai and Lamatic

The 5 tools OpenServ is most often weighed against, with where each one differs from it.

2.2 GPA

## Fetch.ai Agentverse

Free plan

Marketplace and hosting platform for registering and finding AI agents.

- Fetch.ai Agentverse has a free plan. OpenServ does not.
- OpenServ also covers workflow automation.
- Fetch.ai Agentverse also covers reports.

OpenServ and Fetch.ai Agentverse compared in full

---

2.2 GPA

## CrewAI

Free plan

Multi-agent platform to build, run and govern AI agents.

- CrewAI has a free plan. OpenServ does not.
- CrewAI is open source, according to its own site.

OpenServ and CrewAI compared in full

2.0
GPA

## Relevance AI

From $19/mo

Low-code platform for building AI agents and multi-agent teams.

- Only Relevance AI lists iOS and Android apps.
- Only Relevance AI lists a browser extension.
- Relevance AI also covers chat assistant.

OpenServ and Relevance AI compared in full

2.6
GPA

## Orq.ai

Free plan · from €35/mo

AI gateway with observability, governance and managed agents.

- Orq.ai has a free plan. OpenServ does not.
- OpenServ also covers workflow automation and no-code.
- Orq.ai also covers reports.

OpenServ and Orq.ai compared in full

1.8
GPA

## Lamatic

Free plan · from $99/mo

Visual builder and hosting for AI agents and GenAI features.

- Lamatic has a free plan. OpenServ does not.

OpenServ and Lamatic compared in full

# Quick answers

The questions people ask about it, each answered in a line or two

**11**

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

### Is OpenServ free?

No. OpenServ is a paid product.

### What platforms does OpenServ work on?

OpenServ is available on Web.

### Does OpenServ have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. OpenServ is listed for Web.

### Does OpenServ have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. OpenServ is listed for Web.

### Is OpenServ open source?

OpenServ is not described as open source on its own site, as read on Nov 13, 2026.

### Does OpenServ have an API?

Yes. OpenServ offers a public API, according to its own site.

### What does OpenServ integrate with?

OpenServ's listing names OpenAI, Anthropic, Google, LangChain and Vercel AI SDK.

### Who makes OpenServ?

OpenServ is made by a company of the same name.

### What are the alternatives to OpenServ?

The closest alternatives to OpenServ in our directory are Fetch.ai Agentverse, CrewAI, Relevance AI, Orq.ai and Lamatic.

### How does OpenServ compare with other AI agents?

OpenServ's GPA of 1.8 is higher than 30 of the 178 other AI agents we grade, and level with 33.

### Could I make my own version of OpenServ?

To replace OpenServ you would be making an AI agent, with the models and the safeguards behind it.

## Where this guide comes from

The prices, plans, platforms and features were read from OpenServ's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from OpenServ's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by OpenServ. Prices change, so check openserv.ai before you buy.
