Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 0 of the 178 other AI agents we grade

Origami takes a company's website, works out who is likely to buy, finds people showing buying signals such as hiring, funding or visits to the pricing page, and writes a message to each. A built-in sequencer sends email and LinkedIn outreach, and replies land in a shared inbox. Plans are a flat monthly fee that includes a usage balance, spent when Origami builds leads, verified contacts or enrichments.

PART 04 · STANDING

Where it stands

It stands best on ease of use (C, above 36 of 178) and worst on value for money (D, above 0).

Each grade against the category

Every bar is all 179 AI agents we grade, cut by the letter each got. Origami Agents's own letter is outlined.

Price against what you get

Each dot is one of 109 AI agents. Further left costs less; higher up scores better on features, ease of use and platforms. Origami Agents is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Origami Agents you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 149 of the 178 other AI agents grade higher. It costs $1,188 a year.

What you could make

- Sales pipeline: an app builder makes this well.

What you could not

- An AI agent, with the models and the safeguards behind it.

- ✕ Email sent in volume that still reaches the inbox.
- ✕ A library of papers and sources to search.

What this rests on. Origami Agents's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
