Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from OVPN's own pages, its app-store listings and our grades. Every fact in it is on OVPN's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 3 of the 50 other VPNs we grade

OVPN is a paid VPN service launched in 2014 that says it keeps no logs and runs its own diskless servers in 32 cities. Every plan includes port forwarding, multihop and an ad and tracker blocker, and the plans differ mainly in term length and how many devices connect at once.

To get you started, here are **8 things to know about OVPN**, taken from its own pages and our grades.

> "
>
> **No store rating on record, and the listing gives no setup details.**
>
> From our grade for ease of use

1 **Best for a no-log VPN with RAM-only servers**

OVPN is a paid VPN with RAM-only servers, multihop and port forwarding included in every plan.

2 **Paid plans start at $4.22 a month**

As its pricing page puts it: $4.22 per month on the 36-month term.

3 **It runs on 5 platforms**

Windows, macOS, Linux, iOS and Android.

4 **Diskless servers**

OVPN says its servers have no hard drives and load their operating system into RAM, so nothing is written to disk.

5 **No-log policy**

The vendor states that it logs no activity while you are connected, and its security page describes how syslogs are disabled.

6 **Multihop**

Route traffic through two servers. The pricing page lists it as included on every plan at no extra cost.

7 **A 1.8 GPA, above 3 of 50**

That is against the other VPNs we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace OVPN you would be making servers in dozens of countries, kept fast and private. That is not a weekend's work, with an AI app builder or without one.

OVPN at a glance

PRICING Paid, from $4.22 per month on the 36-month term	FREE PLAN No
FREE TRIAL None stated	RUNS ON macOS, Windows, Linux, iOS, Android
MADE BY OVPN, since 2014	CATEGORY VPNs
OUR GRADE 1.8 GPA, weak	

The report card

Best for a no-log VPN with RAM-only servers

OVPN is a paid VPN with RAM-only servers, multihop and port forwarding included in every plan. There is no free plan or trial, and the low price only comes on a 36-month term.

TOOLGPA REPORT CARD	OVPN	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	$4.22 a month on the 36-month term and $4.99 on 12 months sit between the category's cheapest quarter ($3.99) and its middle ($5). Monthly is $12, and the page does not say what longer terms renew at.
Free plan and trial	F	No free plan or trial; a 10-day money-back guarantee is not a trial.
Features	C	No-log policy, RAM-only servers, multihop, port forwarding, kill switch, OpenVPN and WireGuard. The listing's own gap is 32 server cities, fewer than the largest providers.
Ease of use	C	No store rating on record, and the listing gives no setup details.
Platforms and integrations	B	Windows, Mac, Linux, iOS and Android, so phone and computer.
Grade point average		Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who OVPN is for

- ✓ Fits if you want a stated no-log policy and port forwarding or multihop
- ✓ Works for people ready to commit to a 12 or 36 month term

Who it is not for

- ✗ Not for you if you want to try before paying, as only a 10-day refund is offered
- ✗ Pricey if you pay monthly, at $12 against $4.22 on the 36-month term
- ✗ Watch out: devices go from 4 to 5 to 7 as the term gets longer
- ✗ Watch out: the page does not say whether long terms are charged up front or what they renew at
- ✗ Skip it if you need servers in many countries, as there are only 32 cities

Good to know

Good for

- ✓ People who want a stated no-log policy backed by RAM-only servers
- ✓ Users who need port forwarding or multihop without paying extra
- ✓ Anyone comfortable committing to a 12 or 36 month term for a lower rate

Worth knowing

- ⓘ There is no free plan or free trial; the page lists a 10-day money-back guarantee instead.
- ⓘ The device limit rises with term length: 4 on the monthly plan, 5 on 12 months and 7 on 36 months.
- ⓘ The pricing page does not say whether the longer terms are charged up front or what they renew at.
- ⓘ Servers are in 32 cities, a smaller footprint than the largest VPN providers.

PART 02 · PRICING

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$4.22

A month to start

OVPN is a paid product, starting at $4.22 per month on the 36-month term.

1 MONTH

$12

per month, billing basis not shown

Protects 4 devices at a time. Includes port forwarding, multihop and the ad and tracker blocker.

12 MONTHS

$4.99

per month, billing basis not shown

Shown as 71% off the monthly price. Protects 5 devices at a time, with the same features.

36 MONTHS

$4.22

per month, billing basis not shown

Shown as 75% off the monthly price. Protects 7 devices at a time, with the same features.

Read from ovpn.com on Nov 13, 2026.

What it does

Its main features, where it runs, what it works with and who makes it

5

Places it runs: macOS, Windows, Linux, iOS and Android

Paid VPN with RAM-only servers and multihop included. Here is what it does, as its own site describes it, and what it covers: vPN, ad and tracker blocking.

> **No-log policy, RAM-only servers, multihop, port forwarding, kill switch, OpenVPN and WireGuard.**
>
> From our grade for features

Diskless servers

OVPN says its servers have no hard drives and load their operating system into RAM, so nothing is written to disk.

No-log policy

The vendor states that it logs no activity while you are connected, and its security page describes how syslogs are disabled.

Multihop

Route traffic through two servers. The pricing page lists it as included on every plan at no extra cost.

Port forwarding

Open ports through the VPN for incoming connections, such as torrent clients. Included on every plan.

Desktop kill switch

The desktop client blocks traffic if the VPN drops, and it rewrites DNS settings on all network adapters to prevent leaks.

OpenVPN and WireGuard

Both protocols are offered, and the site publishes configuration files and setup guides for routers and other devices.

Where it runs

macOS · Windows · Linux · iOS · Android

What it works with

Its own pages name no integrations.

OVPN is made by OVPN, and has been around since 2014.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

3/50

Other VPNs it is graded above

OVPN's GPA of 1.8 is higher than 3 of the 50 other VPNs we grade, and level with 5.

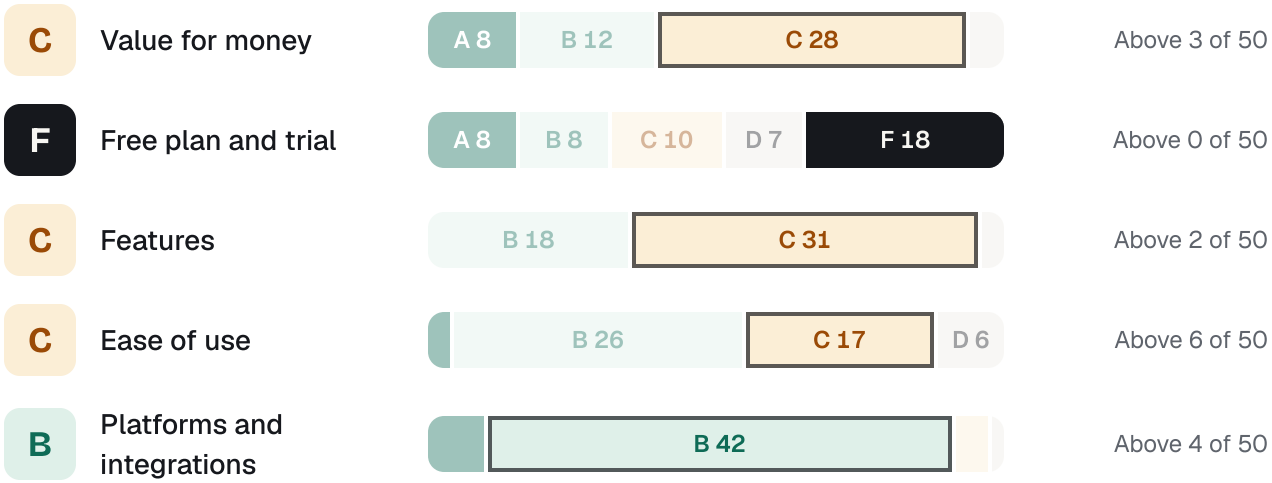

It stands best on platforms and integrations (B, above 4 of 50) and worst on free plan and trial (F, above 0).

Its paid plans start at $4.22 a month, against a middle price of $4.99 for the category: 16 of the 40 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 15 tools score higher and cost less.

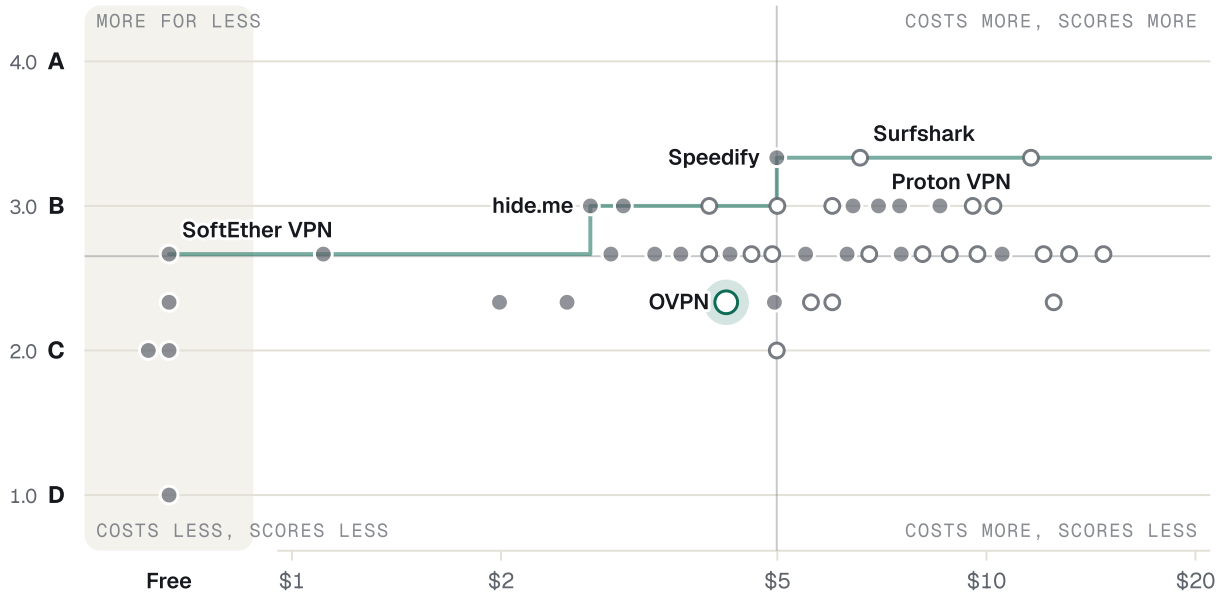

Each grade against the category

Every bar is all 51 VPNs we grade, cut by the letter each got. OVPN's own letter is outlined.

Price against what you get

Each dot is one of 46 VPNs. Further left costs less; higher up scores better on features, ease of use and platforms. OVPN is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace OVPN you would be making servers in dozens of countries, kept fast and private. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 42 of the 50 other VPNs grade higher. It costs $50.64 a year.

What you could make

- Ad and tracker blocking: an app builder makes this well.

What you could not

- Servers in dozens of countries, kept fast and private.

- Apps for macOS, Windows, Linux, iOS and Android that stay in step with each other.

What this rests on. OVPN's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Mullvad VPN, IVPN, Proton VPN, AirVPN and Windscribe

The 5 tools OVPN is most often weighed against, with where each one differs from it.

1.8 GPA

Mullvad VPN

From €5/mo

Flat-rate Swedish VPN with anonymous numbered accounts.

- Mullvad VPN is open source, according to its own site.
