Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of PageSpeedPlus you could make: reports. What surrounds it you could not. The 4 things listed below take a company, not a weekend.

It costs $268.13 a year.

What you could make

- Reports: an app builder makes this well.

What you could not

- Speed tests run from real browsers on a schedule.

- A tracking script and a database that counts every visit.
- It plugs into other products, Slack, Microsoft Teams and Google Sheets among them, and has an API.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. PageSpeedPlus's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
