Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

A writing app at its plainest is a page that saves what you type.

You could make the core of Papeeria for yourself: Markdown, templates and documents. What you would give up is listed below. Whether that is worth the price is your call. It costs $60 a year.

What you could make

- Markdown, templates and documents: an app builder makes these well.

What you could not

- ✕ Several people working in it at the same moment.

It runs in a browser, which is where something home-made would run too.

What this rests on. Papeeria's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
