Welcome

What it is, who it suits, its grades and the ten things to know first

2.8

GPA, above 69 of the 80 other shipping software we grade

Parcel is a personal delivery tracking app from a solo developer that follows packages from more than 300 carriers and syncs them across Apple devices. It can import Amazon orders after you sign in, shows deliveries on a map, and has a web interface for use on other computers. The app is free for up to three deliveries; a yearly premium subscription removes the limit.

To get you started, here are **9 things to know about Parcel**, taken from its own pages and our grades.

> **No store rating on record, but it is an app you install and use with nothing to set up.**
>
> From our grade for ease of use

1 **Best for delivery tracking on Apple devices**

Parcel tracks deliveries from 300+ carriers on iPhone, iPad, Apple Watch and Mac, with Amazon import and widgets.

2 **Paid plans start at $0.58 a month when paid by the year**

As its pricing page puts it: $6.99 per year.

3 **There is a free plan**

Free download that tracks up to 3 deliveries, without push notifications.

4 **It runs on 3 platforms**

iOS, macOS and Web.

5 **More than 300 carriers**

Supports carriers such as DHL, FedEx, UPS, USPS, Royal Mail and DPD, with the full list published on the site.

6 **Push notifications**

Notifies on each delivery event on iOS and Mac devices at once. This needs the premium subscription.

7 **Amazon import**

Adds Amazon packages automatically after signing in to an Amazon account; the developer says credentials never leave the device.

8 **A 2.8 GPA, above 69 of 80**

That is against the other shipping software we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

Nothing Parcel does is plain enough to make in a weekend. The 4 things listed below take a company.

Keep it

Nothing Parcel does is plain enough to make in a weekend. The 4 things listed below take a company.

It is one of the better ones too: its GPA of 2.8 is higher than 69 of the 80 other shipping software we grade. It costs $6.99 a year.

What you could not

- ✕ Scanning barcodes with a phone camera or a scanner.
- ✕ Connections that pull numbers from dozens of other services.
- ✕ Apps for macOS and iOS that stay in step with each other.

- ✕ Hooks into the device itself: an Apple Watch app and widgets.

What this rests on. Parcel's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
