Where it stands

Its grades against its category, and whether to keep it or make your own

76/80

Other shipping software it is graded above

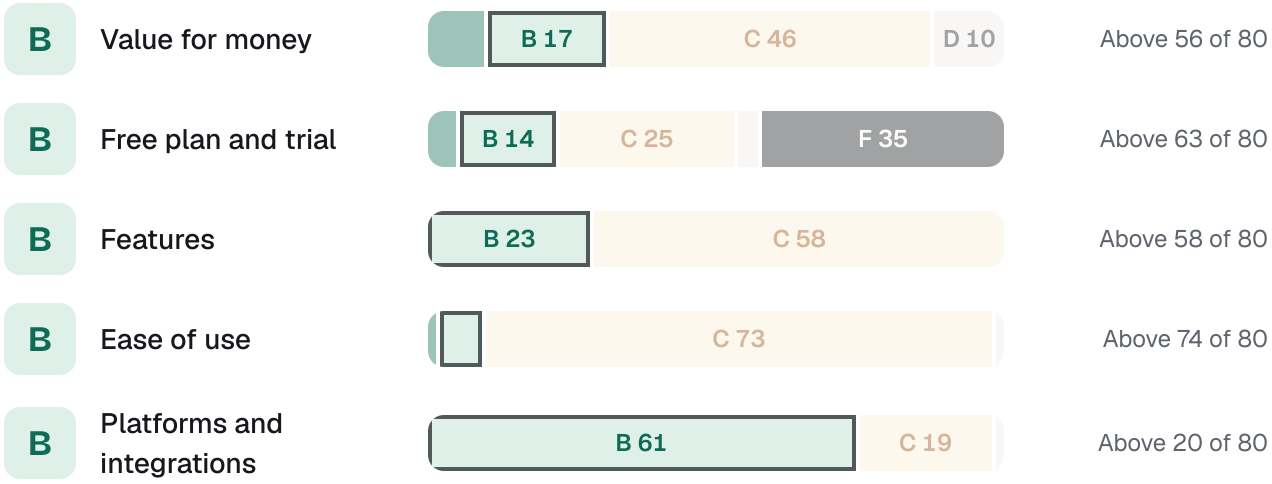

Parcel2Go's GPA of 3.0 is higher than 76 of the 80 other shipping software we grade, and level with 4.

Parcel2Go has no paid plan.

On features, ease of use and platforms it scores 3.0 out of 4, and no tool on the category's chart scores higher without costing more.

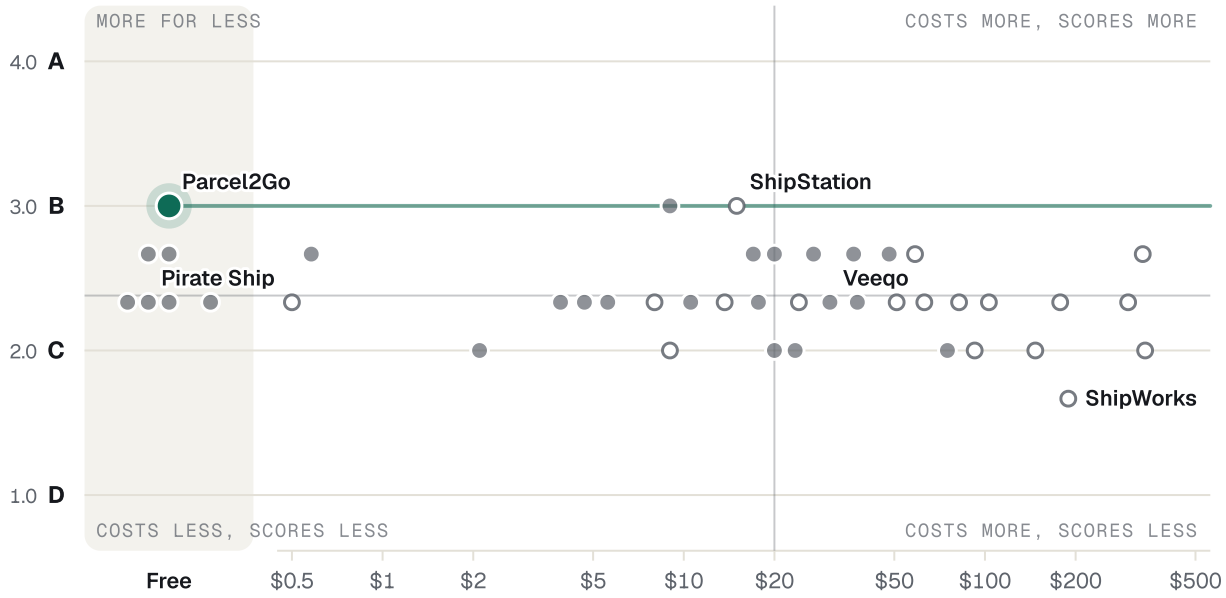

Each grade against the category

Every bar is all 81 shipping software we grade, cut by the letter each got. Parcel2Go's own letter is outlined.

Price against what you get

Each dot is one of 43 shipping software. Further left costs less; higher up scores better on features, ease of use and platforms. Parcel2Go is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Parcel2Go is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces. It is one of the better ones too: its GPA of 3.0 is higher than 76 of the 80 other shipping software we grade.

What you could make

- Reports: an app builder makes this well.

What you could not

- Discounted carrier rates and labels, which take an agreement with each carrier.

- Connections to other products, each kept working as those products change.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Parcel2Go's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
