Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace PartnerBoost you would be making payouts to partners in many countries, with their tax forms. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Reports: an app builder makes this well.

What you could not

- Payouts to partners in many countries, with their tax forms.
- Data from Amazon's seller tools and years of sales estimates.
- Every click and sale traced back to the right partner.
- An API that other software can build on.

What this rests on. PartnerBoost's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
