Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Passky's own pages, its app-store listings and our grades. Every fact in it is on Passky's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 18 of the 49 other password managers we grade

Passky is an open-source password manager with desktop apps, an Android app, browser extensions and a web vault. Accounts can live on the maker's public servers or on a server you run yourself. A free plan stores up to 100 passwords; the paid plan removes that limit.

To get you started, here are **9 things to know about Passky**, taken from its own pages and our grades.

> "
>
> **Apps to install on each device, and a self-host option for those who want it.**
>
> From our grade for ease of use

1 **Best for a free, open-source password manager with a self-host option**

It has no iPhone or iPad app, and no business plan beyond bulk keys.

2 **Paid plans start at $2 a month**

As its pricing page puts it: $2 per month, billed annually ($24).

3 **There is a free plan**

Up to 100 stored passwords, software and hardware two-factor sign-in, and the self-host option.

4 **It runs on 5 platforms**

Web, Windows, macOS, Linux and Android, with a browser extension too.

5 Two-factor sign-in

Software authenticator apps and hardware keys such as a YubiKey can both be used for sign-in, and the pricing page lists them under the free plan.

6 Import and export

Passwords can be imported from other major password managers and exported again to move to a different one.

7 Self-hosting

Passky Server can be run on your own hardware, and the site encourages it over its free public servers.

8 A 2.4 GPA, above 18 of 49

That is against the other password managers we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Passky you would be making a password vault, the last thing anyone should make for themselves. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for a free, open-source password manager with a self-host option

Passky is an open-source password manager with a free plan that holds up to 100 passwords and a $2-a-month Premium plan for unlimited. It has no iPhone or iPad app, and no business plan beyond bulk keys.

TOOLGPA REPORT CARD	Passky	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	B	Premium is $2 a month billed yearly, inside the cheapest quarter of password managers. Bulk is $1.60 for 5 or more keys.
Free plan and trial	C	A free plan with hardware and software two-factor sign-in, but capped at 100 passwords, which many people pass.
Features	C	Two-factor sign-in, import and export, self-hosting and themes. There's no team plan or sharing named on the pricing page.
Ease of use	C	No rating on record. Apps to install on each device, and a self-host option for those who want it.
Platforms and integrations	B	Web, Windows, Mac, Linux, Android and a browser extension. No iPhone or iPad app is listed.
Grade point average		Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Passky is for

- ✓ Fits if you want an open-source manager with a cheap paid tier
- ✓ Works for people on Android, Windows, Mac or Linux

Who it is not for

- ✗ Skip it if you use an iPhone or iPad, as no iOS app is listed
- ✗ Tight if you store over 100 passwords on the free plan
- ✗ Too light for businesses: no plan beyond bulk license keys is listed
- ✗ Watch out: Premium bills yearly at $24, and the pricing page lists no team features

Good to know

Good for

- ✓ People who want an open-source manager they can host themselves
- ✓ Anyone who wants hardware-key sign-in without paying for it
- ✓ Users with a modest vault of under 100 logins

Worth knowing

- ⓘ The free plan stops at 100 stored passwords.
- ⓘ The download page lists an Android app but no iPhone or iPad app.
- ⓘ The pricing page lists no business or team plan beyond bulk license keys.

Ways to pay less

OTHER SAVINGS

20% off bulk license keys

The pricing page lists a Bulk plan at $1.6 per month, 20% below Premium, when at least 5 license keys are bought.

Stated on passky.org

What it does

Its main features, where it runs, what it works with and who makes it

6

Places it runs: Web, macOS, Windows, Linux, Android and Browser extension

Open-source password manager with a self-host option. Here is what it does, as its own site describes it, and what it covers: open source, self-hostable, password manager.

> **Two-factor sign-in, import and export, self-hosting and themes.**

From our grade for features

Two-factor sign-in

Software authenticator apps and hardware keys such as a YubiKey can both be used for sign-in, and the pricing page lists them under the free plan.

Import and export

Passwords can be imported from other major password managers and exported again to move to a different one.

Self-hosting

Passky Server can be run on your own hardware, and the site encourages it over its free public servers.

Apps on most platforms

Desktop apps for Windows, macOS and Linux, an Android app, a web vault, and extensions for Chrome, Firefox, Safari, Edge and several other browsers.

Themes and languages

The interface is translated into 25 languages through community contributions, and users can pick or build a theme.

Where it runs

Web · macOS · Windows · Linux · Android · Browser extension

What it works with

Its own pages name no integrations.

Passky is made by Rabbit Company LLC.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

18/49

Other password managers it is graded above

Passky's GPA of 2.4 is higher than 18 of the 49 other password managers we grade, and level with 2.

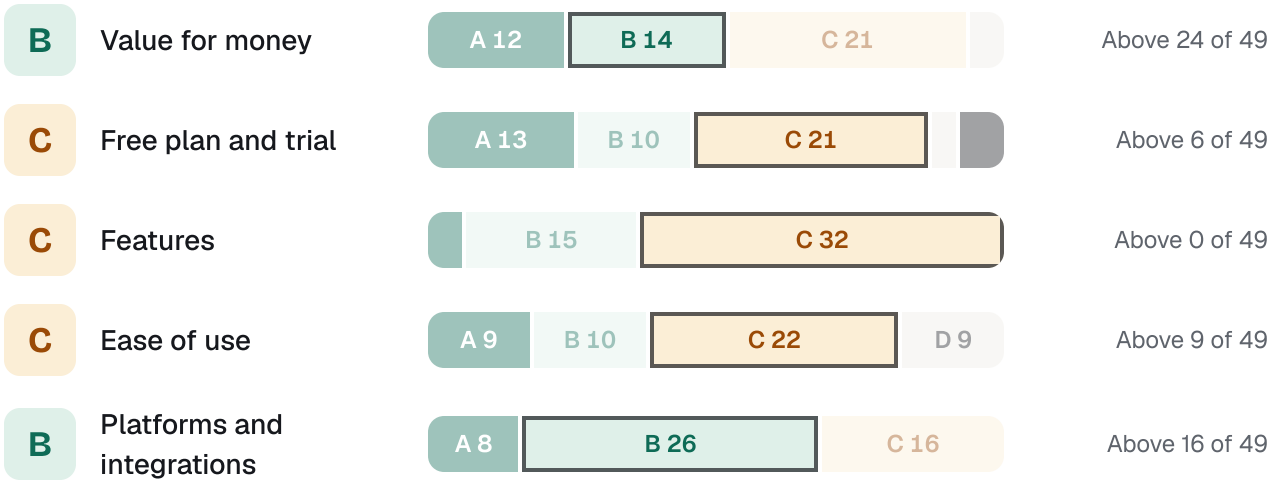

It stands best on value for money (B, above 24 of 49) and worst on features (C, above 0).

Its paid plans start at $2 a month, against a middle price of $2.50 for the category: 6 of the 29 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 6 tools score higher and cost less.

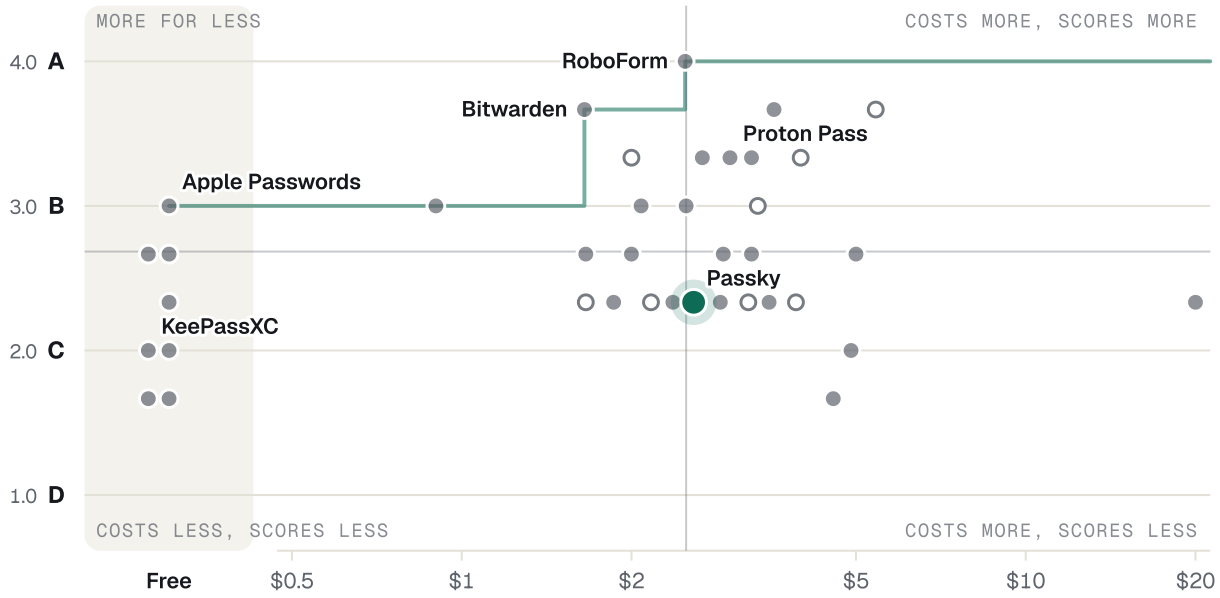

Each grade against the category

Every bar is all 50 password managers we grade, cut by the letter each got. Passky's own letter is outlined.

Price against what you get

Each dot is one of 38 password managers. Further left costs less; higher up scores better on features, ease of use and platforms. Passky is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Passky you would be making a password vault, the last thing anyone should make for themselves. That is not a weekend's work, with an AI app builder or without one.

It costs $24 a year. Passky is open source, so there is a third way: take its code and run it yourself.

What you could not

- ✕ A password vault, the last thing anyone should make for themselves.
- ✕ Apps for macOS, Windows, Linux and Android that stay in step with each other.

What this rests on. Passky's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Bitwarden, KeePassXC, Psono, Padloc and Passbolt

The 5 tools Passky is most often weighed against, with where each one differs from it.

3.8 GPA

Bitwarden

Free plan · from $1.65/mo

Open-source password manager with a free plan and self-hosting.

- Only Bitwarden lists an iOS app.
- Bitwarden is end-to-end encrypted, according to its own site.
- Bitwarden also covers passkeys.

Passky and Bitwarden compared in full

2.8 GPA

KeePassXC

Free

Free, open-source offline password manager for desktop.

- Only Passky lists a web app.
- Only Passky lists an Android app.
- Passky is self-hostable, according to its own site.

Passky and KeePassXC compared in full

2.6 GPA

Psono

Free plan · from $3/mo

Open-source password manager that a company runs on its own servers.

- Only Psono lists an iOS app.
- Psono also covers passkeys.

Passky and Psono compared in full

2.8 GPA

Padloc

Free plan · from $3.49/mo

Open-source, end-to-end encrypted password manager with team plans.

- Only Padloc lists an iOS app.
- Passky is self-hostable, according to its own site.
- Padloc is end-to-end encrypted, according to its own site.

Passky and Padloc compared in full

2.2 GPA

Passbolt

Free plan · from $4.90/mo

Open-source password manager for teams, self-hosted or cloud.

- Only Passky lists macOS and Linux apps.
- Only Passbolt lists an iOS app.
