07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Password Boss (CyberFOX)'s own pages, its app-store listings and our grades. Every fact in it is on Password Boss (CyberFOX)'s page too, where it is kept up to date. Checked Nov 12, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 9 of the 49 other password managers we grade

Password Boss is a password manager whose own site now points to CyberFOX Password Manager, a product aimed at managed service providers and lean IT teams. It encrypts data on the device with AES-256, shares passwords and notes between team members, and adds role-based access, two-factor login and a dark web scan. No prices are published.

To get you started, here are **8 things to know about Password Boss (CyberFOX)**, taken from its own pages and our grades.

> **No prices are published, and only iOS and Android apps are confirmed.**
>
> From our report card of Password Boss (CyberFOX)

1 **Best for password management for managed service providers**

Password Boss is a password manager with an admin console and a portal for managed service providers, now being folded into CyberFOX.

2 **You can try it first**

Free trial offered; the pages say no credit card is required

3 **It runs on 2 platforms**

iOS and Android.

4 **Client-side AES-256 encryption**

Data is encrypted and decrypted locally with a key derived from the master password, which the vendor says it never stores.

5 **Sharing with 2048-bit RSA keys**

Passwords and notes are shared between team members using RSA key pairs, with an expiry date that can be set on shared items.

6 **Role-based access and admin console**

Admins add users and assign roles; business logins live in separate profiles from members' personal items.

7 **A 2.2 GPA, above 9 of 49**

That is against the other password managers we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace Password Boss (CyberFOX) you would be making a password vault, the last thing anyone should make for themselves. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for password management for managed service providers

Password Boss is a password manager with an admin console and a portal for managed service providers, now being folded into CyberFOX. No prices are published, and only iOS and Android apps are confirmed.

TOOLGPA REPORT CARD

Password Boss (CyberFOX)

Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published, as the pricing page redirects to the homepage and the CyberFOX site offers quotes and demos.
Free plan and trial	C	A free trial is offered and the pages say no credit card is required. There is no free plan.
Features	B	AES-256 client-side encryption, sharing, role-based access, an admin console, an MSP portal, two-factor login and a dark web scan.
Ease of use	C	No store rating on record. Business use means setting up an admin console and users.
Platforms and integrations	C	Only iOS and Android apps are confirmed on the pages read, though remote-support tools such as ConnectWise Control and TeamViewer are named.

Grade point average — Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Password Boss (CyberFOX) is for

- ✓ Fits if you run an IT service business and manage passwords for clients
- ✓ Works for teams that want role-based access and an admin console

Who it is not for

- ✕ Watch out: no prices are published, so cost cannot be compared before a demo
- ✕ Watch out: the brand is being folded into CyberFOX, so product names and plans may differ from older pages
- ✕ Skip it if you need a desktop app, as only iOS and Android are confirmed
- ✕ Not for you if you want a free plan, as only a trial is offered

Good to know

Good for

- ✓ Managed service providers that need to hold many customers' credentials
- ✓ Small IT teams that want role-based access and audit logs
- ✓ Businesses already using remote-control tools such as ConnectWise Control or TeamViewer

Worth knowing

- ⓘ Prices are not published: passwordboss.com redirects its pricing page to the homepage and the CyberFOX site offers quotes and demos.
- ⓘ The brand is being folded into CyberFOX, so the product name and plans may differ from what older pages say.
- ⓘ Only iOS and Android apps are confirmed on the pages read; other platforms are not listed there.
- ⓘ Partner and reseller programs are offered, with margins up to 50% advertised for MSPs.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Password Boss (CyberFOX)'s current pricing could not be confirmed from its own site.

> **No price is published, as the pricing page redirects to the homepage and the CyberFOX site offers quotes and demos.**
>
> From our grade for value for money

We could not confirm Password Boss (CyberFOX)'s current prices from its own site, so this guide lists no plans. passwordboss.com has them.

What it does

Its main features, where it runs, what it works with and who makes it

2

Places it runs: iOS and Android

Password manager now sold by CyberFOX, mainly to MSPs and IT teams. Here is what it does, as its own site describes it, and what it covers: end-to-end encrypted, password manager, reports.

> **Only iOS and Android apps are confirmed on the pages read, though remote-support tools such as ConnectWise Control and TeamViewer are named.**
>
> From our grade for platforms and integrations

Client-side AES-256 encryption

Data is encrypted and decrypted locally with a key derived from the master password, which the vendor says it never stores.

Sharing with 2048-bit RSA keys

Passwords and notes are shared between team members using RSA key pairs, with an expiry date that can be set on shared items.

Role-based access and admin console

Admins add users and assign roles; business logins live in separate profiles from members' personal items.

MSP management portal

A multi-tenant portal gives MSPs dashboards, security scores, usage reports and audit logs across customers.

Two-factor login and biometrics

Supports an authenticator-app code at sign-in, and fingerprint unlock on the iOS and Android apps.

Dark web scan

Monitors stored passwords and email addresses for known breaches, and shows security scores.

Where it runs

iOS · Android

What it works with

ConnectWise Control · TeamViewer · Datto · Splashtop · LogMeIn Pro

Password Boss (CyberFOX) is made by CyberFOX LLC.

Where it stands

Its grades against its category, and whether to keep it or make your own

9/49

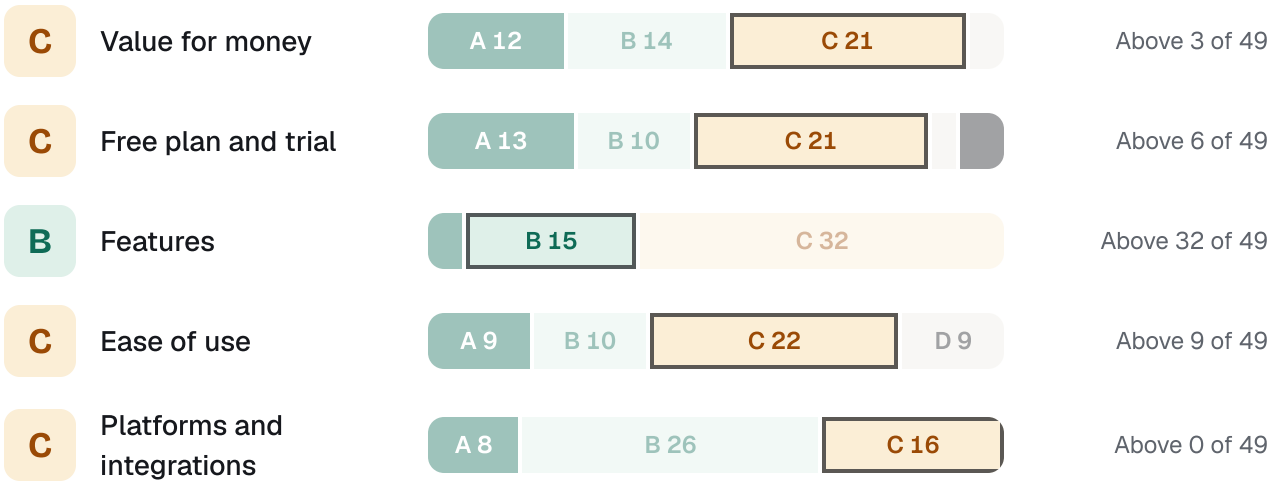

Other password managers it is graded above

Password Boss (CyberFOX)'s GPA of 2.2 is higher than 9 of the 49 other password managers we grade, and level with 8.

It stands best on features (B, above 32 of 49) and worst on platforms and integrations (C, above 0).

Each grade against the category

Every bar is all 50 password managers we grade, cut by the letter each got. Password Boss (CyberFOX)'s own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Password Boss (CyberFOX) you would be making a password vault, the last thing anyone should make for themselves. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 32 of the 49 other password managers grade higher.

What you could make

- Reports: an app builder makes this well.

What you could not

- A password vault, the last thing anyone should make for themselves.
- A real app for iOS and Android. Something home-made would be a web page.
- It plugs into other products, ConnectWise Control, TeamViewer and Datto among them.
- End-to-end encryption done properly.
- What a company asks for before it lets staff use something: audit logs and roles and permissions.
- Sharing with other people, which means accounts and invitations.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Password Boss (CyberFOX)'s listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Keeper, Passbolt, Zoho Vault, 1Password and Dashlane
