PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

39/79

Other event ticketing platforms it is graded above

Peatix's GPA of 2.4 is higher than 39 of the 79 other event ticketing platforms we grade, and level with 9.

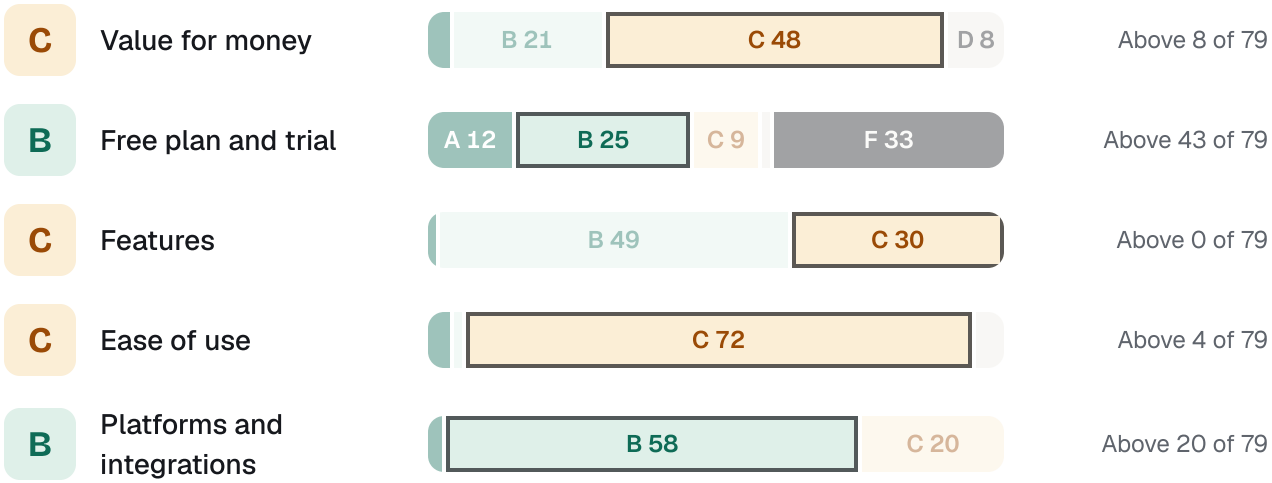

It stands best on free plan and trial (B, above 43 of 79) and worst on features (C, above 0).

Peatix has no paid plan.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

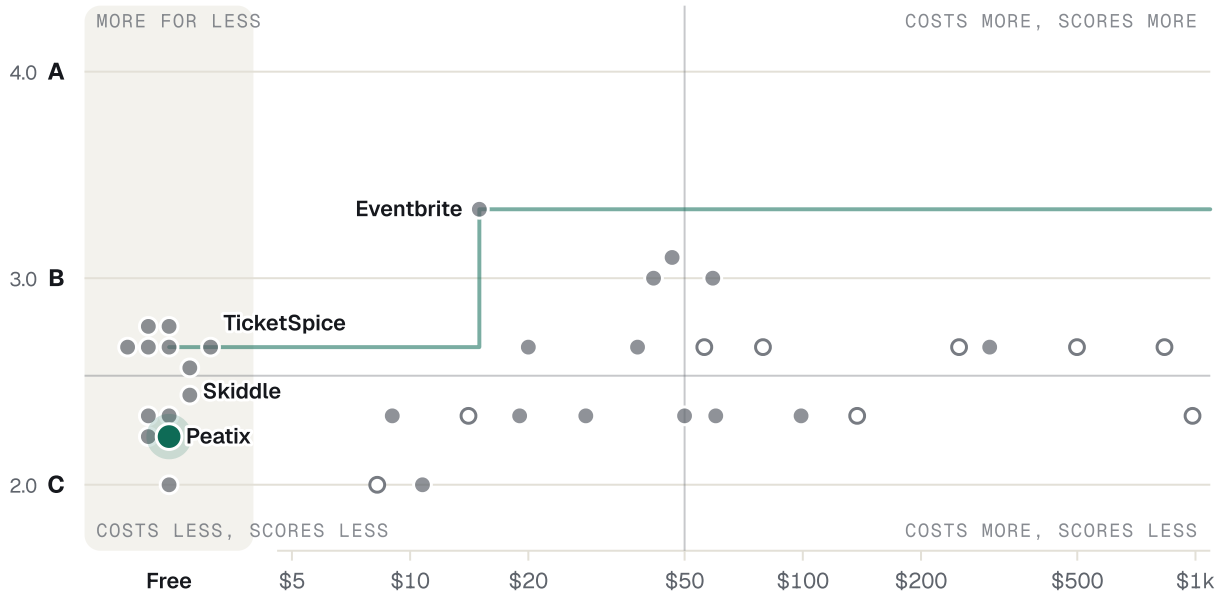

Each grade against the category

Every bar is all 80 event ticketing platforms we grade, cut by the letter each got. Peatix's own letter is outlined.

Price against what you get

Each dot is one of 36 event ticketing platforms. Further left costs less; higher up scores better on features, ease of use and platforms. Peatix is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Peatix is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces.

What you could make

- Forms and qR codes: an app builder makes these well.

What you could not

- Selling tickets and checking them at the door.
- A members' space with posts, chat and events that people keep coming back to.

- A real app for iOS and Android. Something home-made would be a web page.
- Hooks into the device itself: widgets.

What this rests on. Peatix's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
