PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

83/98

Other course and community platforms it is graded above

PeepSo's GPA of 2.6 is higher than 83 of the 98 other course and community platforms we grade, and level with 8.

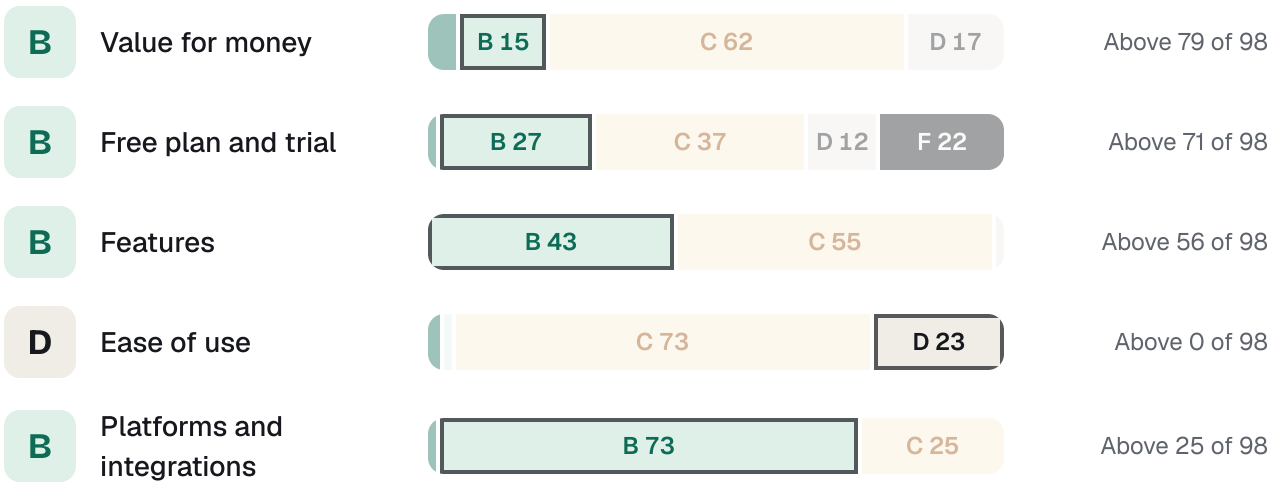

It stands best on value for money (B, above 79 of 98) and worst on ease of use (D, above 0).

Its paid plans start at $12.42 a month when paid by the year, against a middle price of $36 for the category: 5 of the 65 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 1 tool scores higher and costs less.

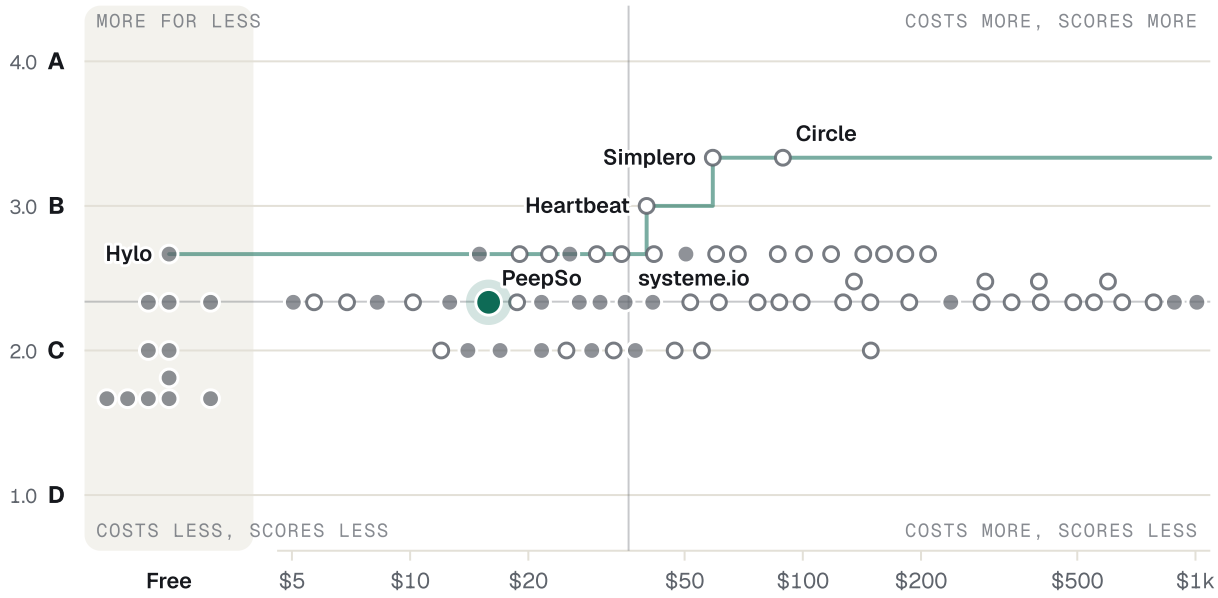

Each grade against the category

Every bar is all 99 course and community platforms we grade, cut by the letter each got. PeepSo's own letter is outlined.

Price against what you get

Each dot is one of 78 course and community platforms. Further left costs less; higher up scores better on features, ease of use and platforms. PeepSo is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of PeepSo you could make: online courses and templates. What surrounds it you could not. The 4 things listed below take a company, not a weekend.

It is one of the better ones too: its GPA of 2.6 is higher than 83 of the 98 other course and community platforms we grade. It costs $149 a year.

What you could make

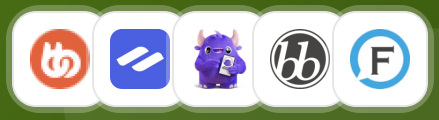

- Online courses and templates: an app builder makes these well.

What you could not

- A members' space with posts, chat and events that people keep coming back to.
- A real app for iOS and Android. Something home-made would be a web page.
- It plugs into other products, LearnDash, Tutor LMS and MasterStudy LMS among them.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. PeepSo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
