Where it stands

Its grades against its category, and whether to keep it or make your own

12/85

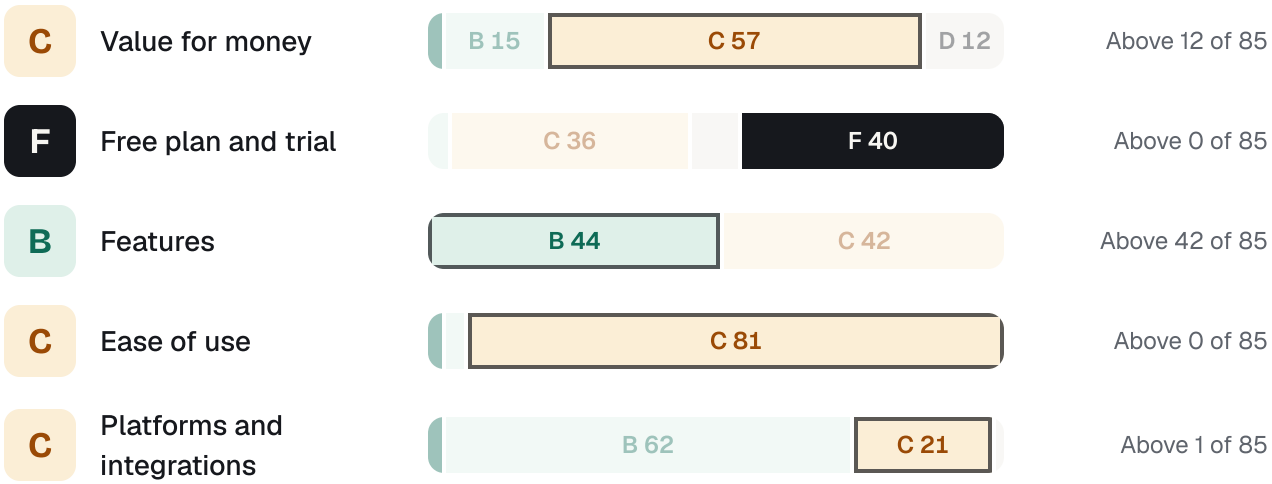

Other salon, spa and studio booking apps it is graded above

PerfectGym's GPA of 1.8 is higher than 12 of the 85 other salon, spa and studio booking apps we grade, and level with 19.

It stands best on features (B, above 42 of 85) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 86 salon, spa and studio booking apps we grade, cut by the letter each got. PerfectGym's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace PerfectGym you would be making email sent in volume that still reaches the inbox. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 54 of the 85 other salon, spa and studio booking apps grade higher.

What you could make

- Class booking, appointment booking and reports: an app builder makes these well.

What you could not

- Email sent in volume that still reaches the inbox.
- An API that other software can build on.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. PerfectGym's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
