PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

10/89

Other AI app builders it is graded above

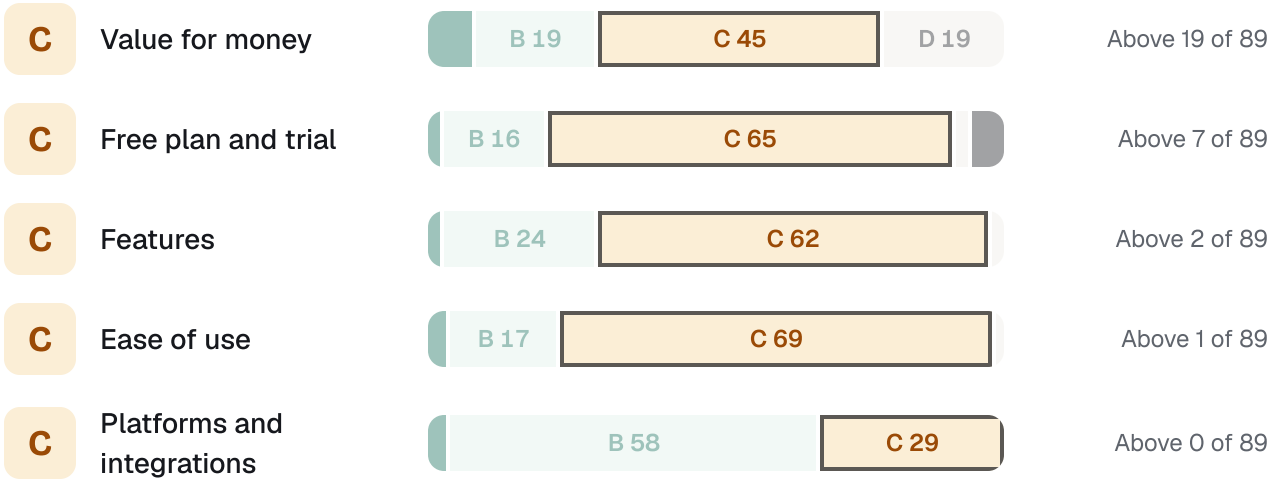

Pineapple Builder's GPA of 2.0 is higher than 10 of the 89 other AI app builders we grade, and level with 12.

Its paid plans start at $16 a month, against a middle price of $20 for the category: 23 of the 82 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 17 tools score higher and cost less.

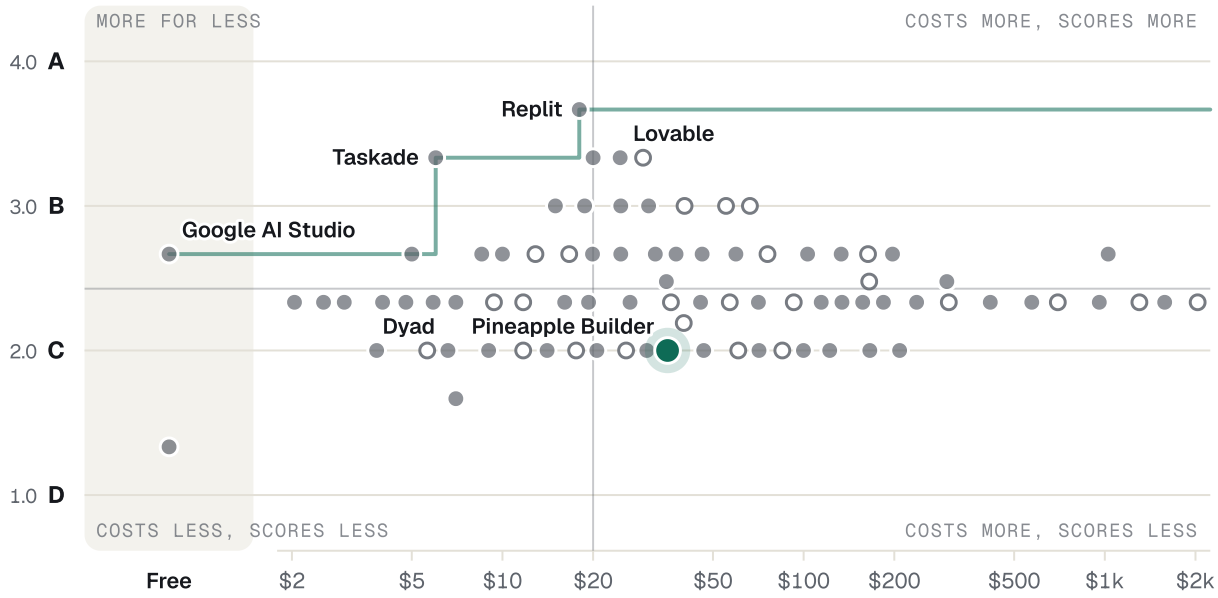

Each grade against the category

Every bar is all 90 AI app builders we grade, cut by the letter each got. Pineapple Builder's own letter is outlined.

Price against what you get

Each dot is one of 85 AI app builders. Further left costs less; higher up scores better on features, ease of use and platforms. Pineapple Builder is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Pineapple Builder you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 67 of the 89 other AI app builders grade higher. It costs $192 a year.

What you could make

- Forms and appointment booking: an app builder makes these well.

What you could not

- A tool that builds and hosts other apps.

- A tracking script and a database that counts every visit.
- A chatbot builder hooked into the messaging apps.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Pineapple Builder's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
