07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from PingCode's own pages, its app-store listings and our grades. Every fact in it is on PingCode's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 38 of the 149 other project management tools we grade

PingCode is a collaboration and DevOps platform for research and development teams. It is sold as modules for product ideas (Ship), projects, test management (Testhub), wiki, analytics and team collaboration, and the project module covers Scrum, Kanban, waterfall and hybrid methods. The price list on the site is for mainland China only.

> "
>
> **You pick and configure modules before it is useful.**
>
> From our grade for ease of use

To get you started, here are **9 things to know about PingCode**, taken from its own pages and our grades.

1 **Best for R&D teams that want separate product, test and wiki modules**

The yuan prices on the page apply only to mainland China, and the rest of the world has to ask sales.

2 **What it costs**

Paid plans start at ¥99 per user / year for Teams, mainland China price.

3 **There is a free plan**

Free forever for up to 25 users on the cloud: all modules, with usage limits.

4 **It runs on Web**

Web.

5 Product and idea management

Ship collects customer feedback, ranks and schedules ideas and links them to delivery and release or version management.

6 Project management

Supports Scrum, Kanban, waterfall and hybrid development models, with portfolios, resources and CI/CD integration.

7 Test management

Testhub handles test plans, test cases and bug tracking, linked to ideas and tasks, and generates test reports automatically.

8 A 2.2 GPA, above 38 of 149

That is against the other project management tools we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace PingCode you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for R&D teams that want separate product, test and wiki modules

PingCode splits R&D work into modules for product, projects, tests and a wiki, with a free plan for up to 25 users. The yuan prices on the page apply only to mainland China, and the rest of the world has to ask sales.

TOOLGPA REPORT CARD — **PingCode** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	Prices are per module, per user, per year in yuan, from ¥99 for Teams, and the page says they apply to mainland China only. Elsewhere you ask sales.
Free plan and trial	B	Free forever for up to 25 users on the cloud, with all modules and usage limits.
Features	C	Product and idea management, projects, test management, wiki and automation. Each is a separately priced module.
Ease of use	C	No store rating on record. You pick and configure modules before it is useful.
Platforms and integrations	C	Web app, cloud or private deployment, with no integrations listed on the pages read.

Grade point average — Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who PingCode is for

- ✓ Fits if you want separate modules for ideas, projects and testing
- ✓ Works for teams of up to 25 who want a free cloud plan

Who it is not for

- ✕ Skip it if you want one global price, as the yuan prices apply only to mainland China
- ✕ Pricey if you need several modules, as each is priced per user per year with a 10-user minimum
- ✕ Watch out: prices above 100 users are quoted, and private deployment has no price
- ✕ Not for you if you want free self-hosted use, since the free plan is cloud only

Good to know

Good for

- ✓ R&D and software teams that want ideas, projects and tests in one suite
- ✓ Teams of up to 25 that fit the free cloud plan
- ✓ Companies in mainland China buying by the module

Worth knowing

- ⓘ The page says its prices apply only to mainland China; other regions must contact sales, so these yuan figures are not a global list price.
- ⓘ Business plans are priced per module, per user per year, with a minimum purchase of 10 users; Insight, Flow and Access are further modules at ¥299, ¥299 and ¥99.
- ⓘ Prices above 100 users are quoted by sales, and Enterprise (private deployment) has no listed price.
- ⓘ The free plan covers 25 users and is cloud only.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

6
plans to choose from

PingCode has a free plan. Paid plans start at ⊠99 per user / year for Teams, mainland China price.

⊠499

per user / year, 10 users minimum

Scrum, Kanban, waterfall and hybrid project management with portfolios and resources.

The free plan

Free forever for up to 25 users on the cloud: all modules, with usage limits.

Read from pingcode.com on Nov 13, 2026.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

R&D management suite for products, projects, tests and wikis. Here is what it does, as its own site describes it, and what it covers: AI features, wiki, kanban boards, Gantt & timelines, issue tracking, workflow automation.

> **Product and idea management, projects, test management, wiki and automation.**

From our grade for features

Product and idea management

Ship collects customer feedback, ranks and schedules ideas and links them to delivery and release or version management.

Project management

Supports Scrum, Kanban, waterfall and hybrid development models, with portfolios, resources and CI/CD integration.

Test management

Testhub handles test plans, test cases and bug tracking, linked to ideas and tasks, and generates test reports automatically.

Wiki

Docs, whiteboards and tables with multi-person editing, document security control and links into the R&D process.

Analytics and automation

Efficiency measurement, team goals and process automation, plus directory services and third-party integrations.

Cloud or private deployment

Business plans run on the cloud, while the Enterprise edition is listed as private deployment only.

Where it runs

Web

What it works with

Its own pages name no integrations.

PingCode is made by PingCode.

Where it stands

Its grades against its category, and whether to keep it or make your own

38/149

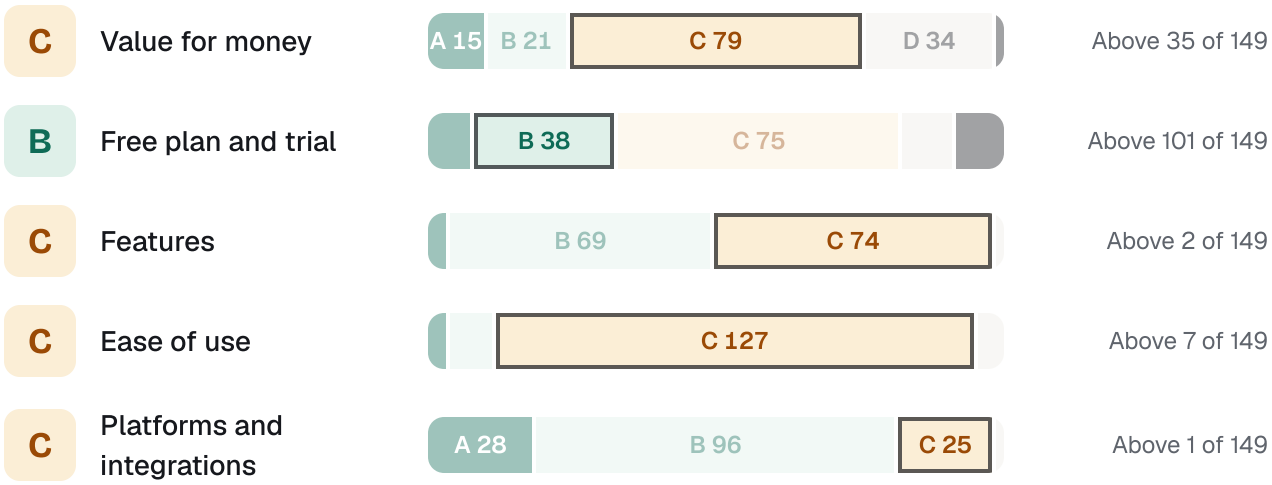

Other project management tools it is graded above

PingCode's GPA of 2.2 is higher than 38 of the 149 other project management tools we grade, and level with 31.

It stands best on free plan and trial (B, above 101 of 149) and worst on platforms and integrations (C, above 1).

Each grade against the category

Every bar is all 150 project management tools we grade, cut by the letter each got. PingCode's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace PingCode you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 80 of the 149 other project management tools grade higher.

What you could make

- Issue tracking, kanban boards, Gantt & timelines and wiki: an app builder makes these well.

What you could not

- Connections to other products, each kept working as those products change.
- AI features, unless you pay a model provider for each request yourself.
- Sharing with other people, which means accounts and invitations.

What this rests on. PingCode's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

ONES, Jira, Yodiz and IBM Targetprocess

The 4 tools PingCode is most often weighed against, with where each one differs from it.

ONES

2.4 GPA

Free plan · from $98.5/yr

Project and wiki management for software teams, cloud or on-prem.

- ONES is self-hostable, according to its own site.

PingCode and ONES compared in full

Jira

3.2 GPA

Free plan · from $9.70/mo

Issue and project tracking for software and business teams.

- Only Jira lists iOS and Android apps.
- PingCode also covers wiki.
- Jira also covers tasks.

PingCode and Jira compared in full

2.8
GPA

Yodiz

Free plan · from $3/mo

Agile planning and issue tracking with a free plan for 3 users.

- Only Yodiz lists iOS and Android apps.
- Only Yodiz lists a browser extension.
- Yodiz is self-hostable, according to its own site.

PingCode and Yodiz compared in full

2.0
GPA

IBM Targetprocess

Free trial

Strategic portfolio management that links plans to spend.

- PingCode has a free plan. IBM Targetprocess does not, though it has a free trial.
- PingCode also covers wiki, kanban boards, Gantt & timelines, issue tracking and workflow automation.
- IBM Targetprocess also covers reports and dashboards.

PingCode and IBM Targetprocess compared in full

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

10

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is PingCode free?

PingCode has a free plan. Free forever for up to 25 users on the cloud: all modules, with usage limits.

How much does PingCode cost?

PingCode lists 6 plans. Free: 0.

What platforms does PingCode work on?

PingCode is available on Web.

Does PingCode have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. PingCode is listed for Web.

Does PingCode have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. PingCode is listed for Web.

Is PingCode open source?

PingCode is not described as open source on its own site, as read on Nov 13, 2026.

Who makes PingCode?

PingCode is made by a company of the same name.

What are the alternatives to PingCode?

The closest alternatives to PingCode in our directory are ONES, Jira, Yodiz and IBM Targetprocess.

How does PingCode compare with other project management tools?

PingCode's GPA of 2.2 is higher than 38 of the 149 other project management tools we grade, and level with 31.

Could I make my own version of PingCode?

To replace PingCode you would be making connections to other products, each kept working as those products change.

Where this guide comes from

The prices, plans, platforms and features were read from PingCode's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from PingCode's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by PingCode. Prices change, so check pingcode.com before you buy.

About ToolGPA

Who made this guide, what else is on the site, and how to cite it

7,721

Tools graded, in 95 categories

ToolGPA grades software the way a school report grades a pupil: five subjects, a letter for each with the reason written beside it, and a GPA that averages them. Prices, plans and platforms are read from each maker's own pages and dated, so you always know how fresh a figure is.

Every grade, review and ranking on ToolGPA is our own judgement. No company can pay for a grade or change one. Every tool on the site has a guide like this one, free to download and pass on. It all lives at **toolgpa.com**.
