Welcome

What it is, who it suits, its grades and the ten things to know first

2.6

GPA, above 66 of the 89 other AI image and video generators we grade

Pixelbin is a credit-based AI workspace for generating images and short videos and for editing photos: background and watermark removal, upscaling, object removal, photo restoration and a batch editor. Its plans include access to image and video models from other labs, and the company also sells developer APIs, SDKs and enterprise solutions.

To get you started, here are **9 things to know about Pixelbin**, taken from its own pages and our grades.

1 **Best for image and video generation plus photo editing, by the credit**

Pixelbin is a credit-based workspace for generating images and video and for editing photos, from $6 a month.

2 **Paid plans start at $6 a month**

As its pricing page puts it: $6 per month, billed monthly.

3 **You can try it first**

Signing up gives 10 free credits to explore.

4 **It runs on 2 platforms**

Web and Android.

5 **Image and video generation**

Text-to-image and text-to-video generators, plus AI headshot and background generators.

6 **Photo editing tools**

Background remover, watermark remover, object remover and an upscaler that enlarges images up to 4x.

7 **Photo restoration**

Colorize black and white photos, remove noise and repair damaged or faded pictures.

8 **A 2.6 GPA, above 66 of 89**

That is against the other AI image and video generators we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Pixelbin you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

Who Pixelbin is for

- ✓ Fits if you want generation and photo fixes on one credit pool
- ✓ Works for developers who want APIs and Photoshop or Figma links

Who it is not for

- ✗ Skip it if you need iPhone, as only a Google Play app was found
- ✗ Tight if you generate a lot, since models cost 1 to 3 credits an image
- ✗ Watch out: only monthly prices were readable
- ✗ Watch out: running out of credits means a one-time purchase

Good to know

Good for

- ✓ Occasional creators who want a low monthly cost and many models
- ✓ Ecommerce sellers cleaning product photos in bulk
- ✓ Developers adding image transformation to an app

Worth knowing

- ⓘ Different models spend different numbers of credits: Nano Banana costs 1 credit per image and Seedream 4.5 costs 3.
- ⓘ Only the monthly prices were readable; the Annual tab is marked 79% off but its prices did not appear in the page text.
- ⓘ Extra credits can be bought through a one-time purchase plan when a monthly allowance runs out.
- ⓘ The site links a Google Play app; no iOS listing was found.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

66/89

Other AI image and video generators it is graded above

Pixelbin's GPA of 2.6 is higher than 66 of the 89 other AI image and video generators we grade, and level with 7.

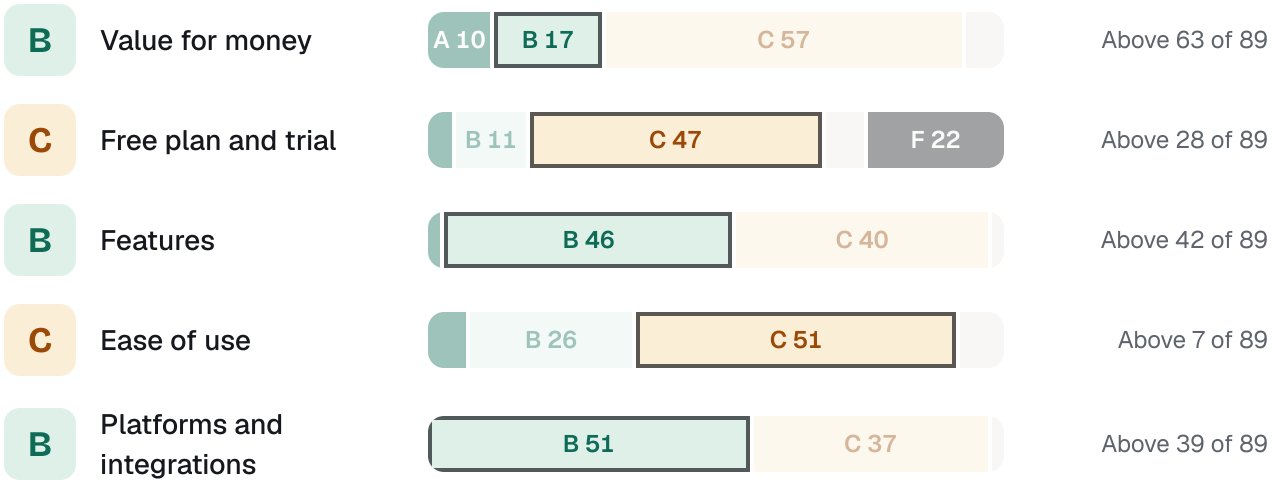

It stands best on value for money (B, above 63 of 89) and worst on ease of use (C, above 7).

Its paid plans start at $6 a month, against a middle price of $10 for the category: 6 of the 65 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 2 tools score higher and cost less.

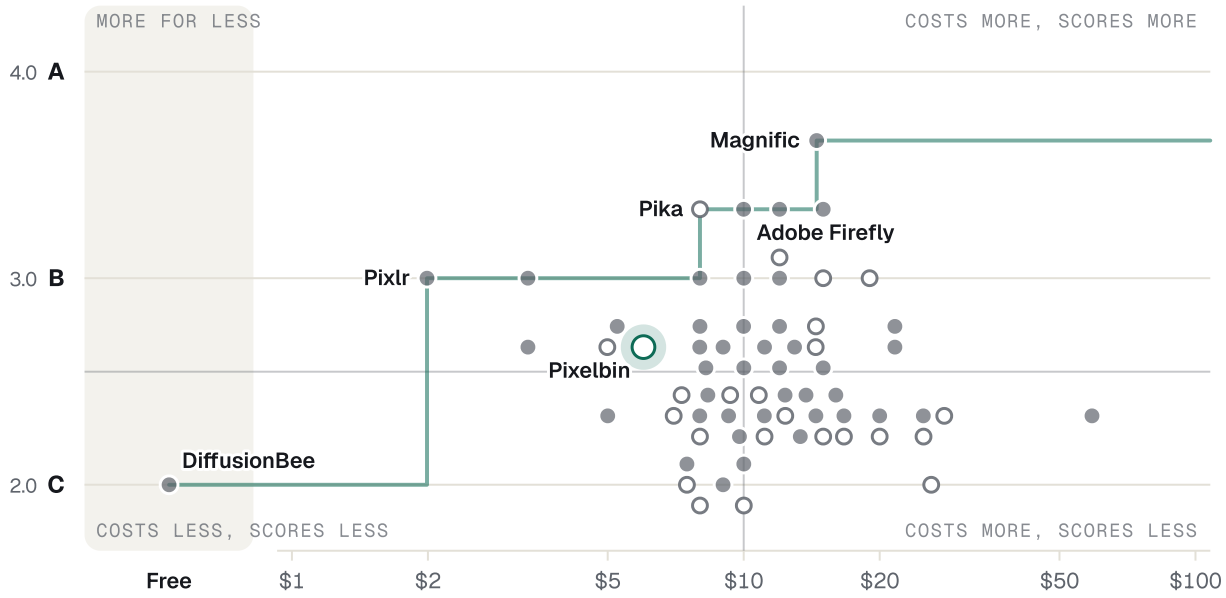

Each grade against the category

Every bar is all 90 AI image and video generators we grade, cut by the letter each got. Pixelbin's own letter is outlined.

Price against what you get

Each dot is one of 67 AI image and video generators. Further left costs less; higher up scores better on features, ease of use and platforms. Pixelbin is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Pixelbin you would be making an image model, which you can rent by the picture but not make. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.6 is higher than 66 of the 89 other AI image and video generators we grade. It costs $72 a year.

What you could not

- ✕ An image model, which you can rent by the picture but not make.
- ✕ A video model, which you can rent by the second but not make.

- ✕ A real app for Android. Something home-made would be a web page.
- ✕ It plugs into other products, Photoshop and Figma among them, and has an API.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Pixelbin's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
