What it is, who it suits, its grades and the ten things to know first

3.0

GPA, above 63 of the 75 other daily planner apps we grade

Daily is a day planner by an independent developer. It reads the calendars on your device and places workouts, meals, to-dos and routines around them, then shows progress as a single arc across the day. The vendor says every feature is free and that there is no account, advertising or tracking.

Where it stands

Its grades against its category, and whether to keep it or make your own

63/75

Other daily planner apps it is graded above

Daily: Day Planner's GPA of 3.0 is higher than 63 of the 75 other daily planner apps we grade, and level with 6.

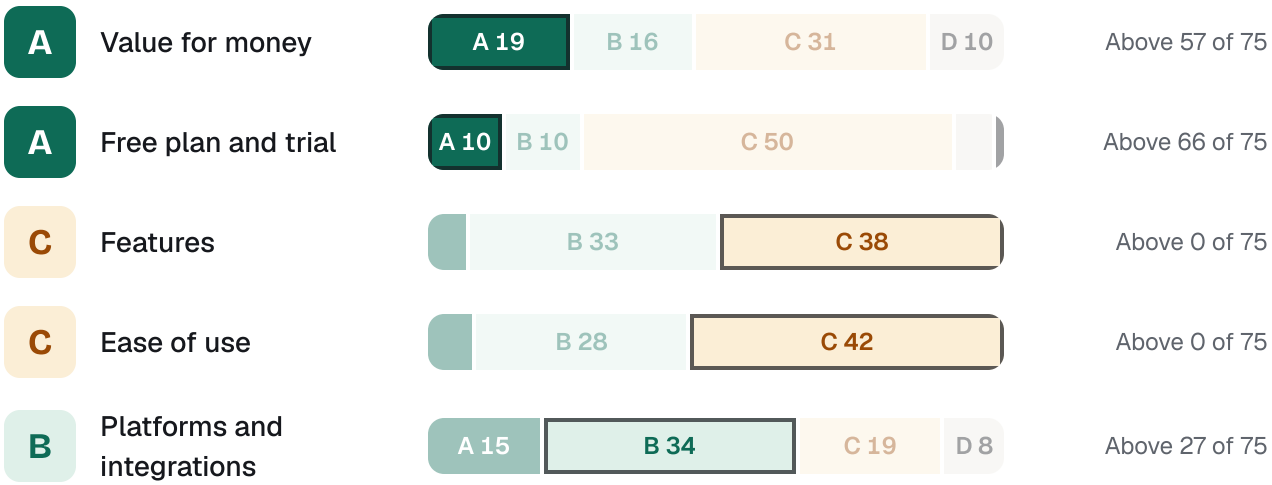

It stands best on free plan and trial (A, above 66 of 75) and worst on features (C, above 0).

Daily: Day Planner has no paid plan.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

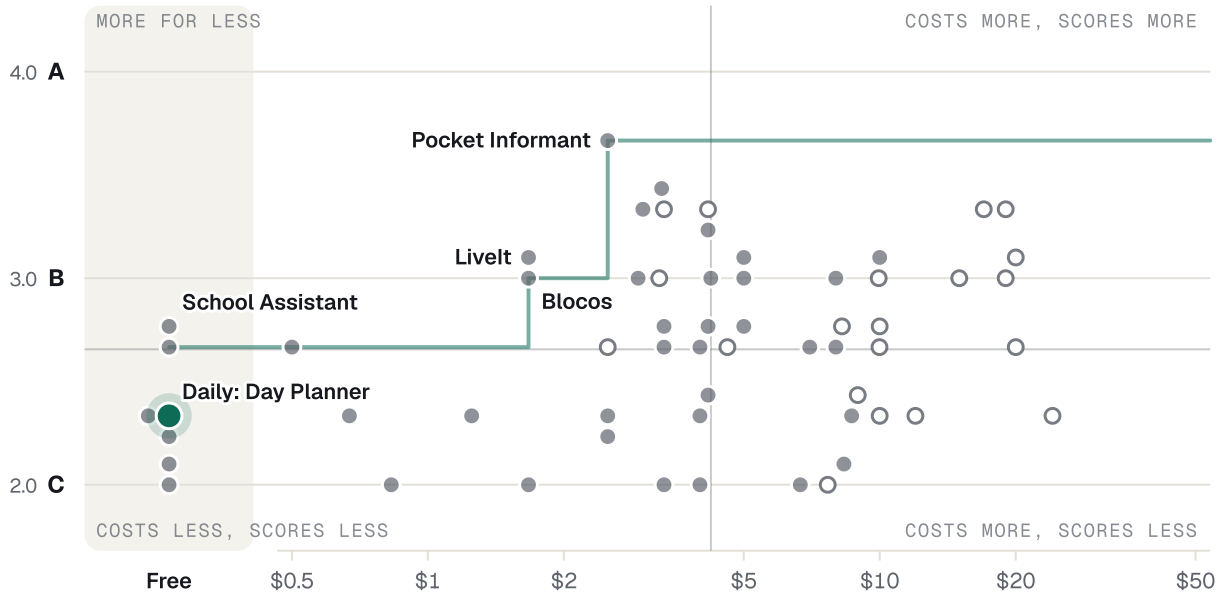

Each grade against the category

Every bar is all 76 daily planner apps we grade, cut by the letter each got. Daily: Day Planner's own letter is outlined.

Price against what you get

Each dot is one of 60 daily planner apps. Further left costs less; higher up scores better on features, ease of use and platforms. Daily: Day Planner is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Daily: Day Planner is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces. It is one of the better ones too: its GPA of 3.0 is higher than 63 of the 75 other daily planner apps we grade.

What you could make

- Tasks, calendar, habit tracking, daily notes and natural-language input: an app builder makes these well.

What you could not

- Apps for macOS, iOS and Android that stay in step with each other.

- It plugs into other products, Apple Health, Health Connect and Siri among them.

What this rests on. Daily: Day Planner's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
