Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Planet VPN you would be making servers in dozens of countries, kept fast and private. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.8 is higher than 36 of the 50 other VPNs we grade. It costs $47.88 a year.

What you could not

- ✕ Servers in dozens of countries, kept fast and private.
- ✕ Blocking that reaches every browser and app and is hard to switch off.

- ✕ Apps for macOS, Windows, Linux, iOS and Android that stay in step with each other.

What this rests on. Planet VPN's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
