# Welcome

What it is, who it suits, its grades and the ten things to know first

**2.2**

GPA, above 22 of the 114 other calendar and scheduling apps we grade

Planyo is an online reservation system for businesses that rent out resources or sell places, such as rooms, boats, equipment, classes and parking. It provides an availability calendar to embed on a website, flexible pricing rules and notifications by email and SMS. Pricing is either a monthly fee by resource count or a commission on customer bookings.

| **Value for money** | C | CHF 29 a month for 3 resources, with more resources adding to it. That is in the dearer half of calendar tools. |
| **Free plan and trial** | C | A 30-day trial, and months with no rentals are free, but there is no free plan. |
| **Features** | C | Availability calendar, pricing rules, shared resources, notifications and self-service. The pricing grows with resource count. |

### Who Planyo is for

- ✓ Fits if you rent out equipment, rooms or boats by the hour or day
- ✓ Works for sites on WordPress or WooCommerce

### Who it is not for

- ✗ Pricey if you have many resources, as the price rises per resource
- ✗ Watch out: prices are in Swiss francs, even where the page shows another currency
- ✗ Watch out: text messages cost CHF 10 per 100
- ✗ Tight if you pick the commission plan, which needs customer-entered bookings and a CHF 29 minimum in months with a booking
- ✗ Skip it if you want a free plan, as only a trial is offered

## Good to know

### Good for

- ✓ Equipment, boat and vacation rental operators
- ✓ Venues and studios with seasonal demand
- ✓ Sellers of places on classes, buses or dormitory beds

### Worth knowing

- ⓘ Prices are in Swiss francs; the pricing page converts to other currencies for display, but charges are in CHF.
- ⓘ The PRO price grows with the number of resources, and shared resources count as seats divided by 2.
- ⓘ The PRO-COMM commission model needs customers to make valid online bookings, and admin-entered bookings can trigger a higher minimum.
- ⓘ Text message notifications are extra, at CHF 10 per 100 messages.

# Where it stands

Its grades against its category, and whether to keep it or make your own

**22/114**

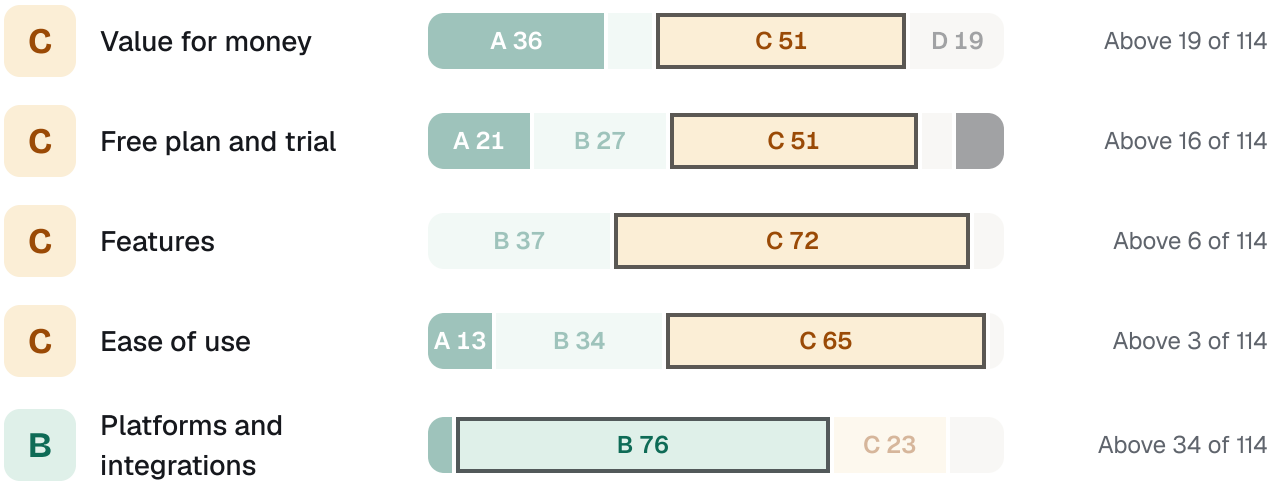

Other calendar and scheduling apps it is graded above

Planyo's GPA of 2.2 is higher than 22 of the 114 other calendar and scheduling apps we grade, and level with 23.

It stands best on platforms and integrations (B, above 34 of 114) and worst on ease of use (C, above 3).

## Each grade against the category

Every bar is all 115 calendar and scheduling apps we grade, cut by the letter each got. Planyo's own letter is outlined.

## Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

## Keep it

The plain part of Planyo you could make: appointment booking, class booking and invoicing. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 69 of the 114 other calendar and scheduling apps grade higher.

### What you could make

- Appointment booking, class booking and invoicing: an app builder makes these well.

### What you could not

- Booking pages that read and write other people's calendars and send the emails.
- A real app for iOS and Android. Something home-made would be a web page.
- It plugs into other products, WordPress, WooCommerce and Squarespace among them, and has an API.

**What this rests on.** Planyo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
