Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Pleasant Password Server's own pages, its app-store listings and our grades. Every fact in it is on Pleasant Password Server's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 9 of the 49 other password managers we grade

Pleasant Password Server is a multi-user password management server that companies run on their own infrastructure. It works with KeePass and Password Safe clients and adds role-based access, a web client and mobile apps. Licenses are bought per user as a one-time cost.

To get you started, here are **9 things to know about Pleasant Password Server**, taken from its own pages and our grades.

> **You install and maintain the server yourself, which is configuration work before anyone saves a password.**
>
> From our grade for ease of use

1 **Best for self-hosted shared KeePass vaults for a team**

Pleasant Password Server puts a shared, role-based vault on a server you run, for KeePass and Password Safe users.

2 **What it costs**

Paid plans start at $11 per user, one-time, from 5 users ($55).

3 **You can try it first**

Free demo: download the server or use the live demo

4 **It runs on 6 platforms**

Web, Windows, macOS, Linux, iOS and Android, with a browser extension too.

5 **Self-hosted deployment**

Runs on infrastructure you control, including on-premises, private cloud, hybrid and air-gapped setups, with a perpetual-use license.

6 **KeePass and Password Safe clients**

A KeePass client for Windows is included, giving a familiar KeePass interface with multi-user support.

7 **Role-based access**

Administrators set access on single passwords or folders, group users into roles and enforce client policies.

8 **A 2.2 GPA, above 9 of 49**

That is against the other password managers we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Pleasant Password Server you would be making a password vault, the last thing anyone should make for themselves. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for self-hosted shared KeePass vaults for a team

Pleasant Password Server puts a shared, role-based vault on a server you run, for KeePass and Password Safe users. Licences are one-time, but they start at 5 users, you host and patch the server yourself, and upgrades after the first year cost extra.

TOOLGPA REPORT CARD	Pleasant Password Server	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	B	$11 per user one-time on Community, $55 for the 5-user minimum, which is under two years of the category's $2.99 middle subscription. Enterprise is $85 per user, so the cheap tier is the one to read.

SUBJECT	GRADE	COMMENT
Free plan and trial	C	There is a free demo to download or try live, and the page gives no length or card requirement. No free plan, so a demo is all you get before paying.
Features	C	Roles, KeePass and Password Safe clients, web client, mobile apps, MFA and a choice of database. The listing notes no hosted version and the administrator counts as a user.
Ease of use	D	You install and maintain the server yourself, which is configuration work before anyone saves a password. No store rating on record.
Platforms and integrations	B	Web, Windows, Mac, Linux, iPhone, Android and a browser extension, with Azure, RADIUS and YubiKey hooks. Those are sign-in hooks more than app integrations, so no A.
Grade point average		Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Pleasant Password Server is for

- ✓ Fits if you want KeePass users sharing one vault on your own hardware
- ✓ Works for regulated or air-gapped setups that cannot use a hosted vault

Who it is not for

- ✗ Skip it if you have no one to run a server, because there is no hosted version
- ✗ Not for you if you are one person: the price table starts at 5 users, so the floor is $55
- ✗ Pricey if you need more than Community, as Enterprise is $85 per user and Enterprise+SSO about $120
- ✗ Watch out: you get one year of upgrades, then pay for more, which the page puts under half the licence cost
- ✗ Tight if you want more than 15 users on the cheapest tier, which is not offered above that

Good to know

Good for

- ✓ Organizations that want KeePass users on a shared, central server
- ✓ Regulated or air-gapped environments that must self-host
- ✓ Teams that prefer a one-time license to a subscription

Worth knowing

- ⓘ Licenses include one year of upgrades; later upgrades and support are a separate plan costing under 50% of the license.
- ⓘ The administrator counts as a user, and the price table starts at 5 users.
- ⓘ The Community tier is not offered beyond 15 users in the price table.
- ⓘ You host and maintain the server; there is no hosted version on the pricing page.

PART 02 · PRICING

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$11 one-time

To start

Pleasant Password Server is a paid product with a free trial, starting at $11 per user, one-time, from 5 users ($55).

> **There is a free demo to download or try live, and the page gives no length or card requirement.**

OTHER SAVINGS

90-day money-back guarantee

The purchase page says a full refund can be requested within 90 days if the server does not meet your needs.

Stated on pleasantpasswords.com

What it does

Its main features, where it runs, what it works with and who makes it

7

Places it runs: Web, macOS, Windows, Linux, iOS, Android and Browser extension

Self-hosted multi-user password server for KeePass clients. Here is what it does, as its own site describes it, and what it covers: self-hostable, works offline, password manager.

> **Roles, KeePass and Password Safe clients, web client, mobile apps, MFA and a choice of database.**
>
> From our grade for features

Self-hosted deployment

Runs on infrastructure you control, including on-premises, private cloud, hybrid and air-gapped setups, with a perpetual-use license.

KeePass and Password Safe clients

A KeePass client for Windows is included, giving a familiar KeePass interface with multi-user support.

Role-based access

Administrators set access on single passwords or folders, group users into roles and enforce client policies.

Many ways in

A web client, a browser autofill extension, macOS and Linux clients, and Android and iOS apps.

Multi-factor sign-in

Supports authenticator apps (TOTP), biometrics, YubiKey, RADIUS and email codes, and can generate TOTP codes for stored entries.

Choice of database

The server can store data in SQLite, PostgreSQL, MSSQL or Azure SQL.

Where it runs

Web · macOS · Windows · Linux · iOS · Android · Browser extension

What it works with

KeePass · Password Safe · Microsoft Azure · RADIUS · YubiKey

Pleasant Password Server is made by Pleasant Solutions.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

9/49

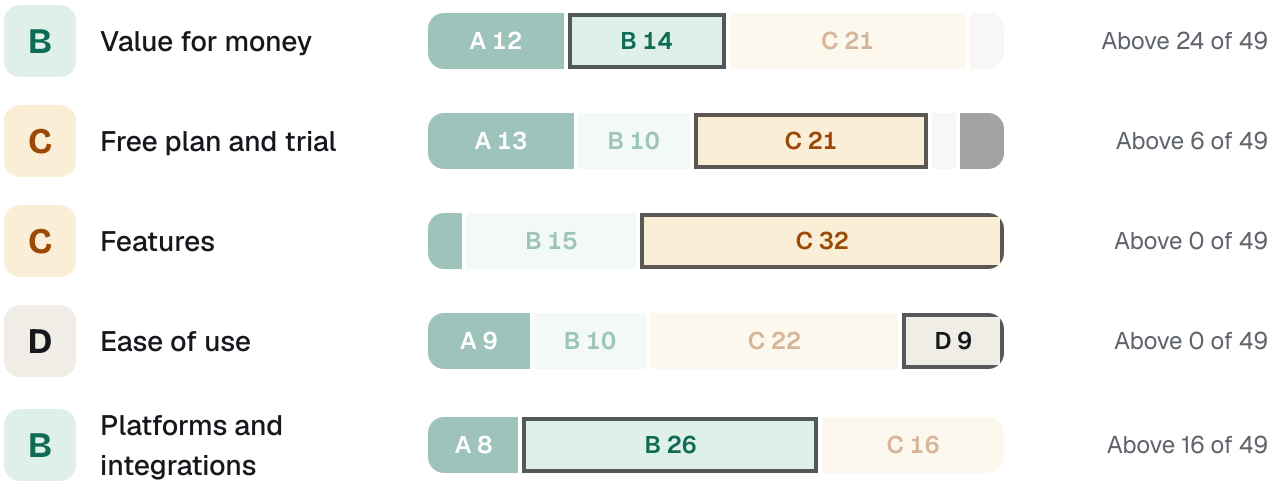

Other password managers it is graded above

Pleasant Password Server's GPA of 2.2 is higher than 9 of the 49 other password managers we grade, and level with 8.

It stands best on value for money (B, above 24 of 49) and worst on ease of use (D, above 0).

Each grade against the category

Every bar is all 50 password managers we grade, cut by the letter each got. Pleasant Password Server's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Pleasant Password Server you would be making a password vault, the last thing anyone should make for themselves. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 32 of the 49 other password managers grade higher. It costs $11, paid once.

What you could not

- A password vault, the last thing anyone should make for themselves.
- Apps for macOS, Windows, Linux, iOS and Android that stay in step with each other.
- It is priced for each person, which means accounts and billing for a team.
- It plugs into other products, KeePass, Password Safe and Microsoft Azure among them.
- What a company asks for before it lets staff use something: roles and permissions.

What this rests on. Pleasant Password Server's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

KeePass, Passwordstate, Passbolt, KeePassXC and Passwork

The 5 tools Pleasant Password Server is most often weighed against, with where each one differs from it.

2.8 GPA
