07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Polymet's own pages, its app-store listings and our grades. Every fact in it is on Polymet's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 51 of the 89 other AI app builders we grade

Polymet is an AI product designer. You describe a page, component or prototype and its agent builds it as a React and Tailwind app on a canvas, which you can then change by prompting, in a visual editor or in code. It imports from and exports to Figma, can use a team's own design system, and publishes to a live link.

To get you started, here are **9 things to know about Polymet**, taken from its own pages and our grades.

> **If you need a finished product with its own back office, it is a design tool first.**
>
> From our report card of Polymet

1 **Best for turning a prompt into front-end screens and prototypes**

Polymet turns a prompt into React and Tailwind screens on a canvas, with Figma import and export and a live link to share.

2 **Paid plans start at $20.83 a month when paid by the year**

As its pricing page puts it: $25 per month for 1,000 credits (Pro), or $250 billed yearly.

3 There is a free plan

500 credits every 30 days, up to 250 a day, with unlimited projects and collaborators. Published apps carry a "Built with Polymet" badge.

4 It runs on Web

Web.

5 Prompt-built canvas

The Polymet agent turns a prompt into pages and components on a canvas, as a React and Tailwind app you can click through.

6 Visual and code editors

Tweak layout, spacing and colors visually, select an element and edit it with AI, or open the code editor for direct control.

7 Design systems and Figma

Bring your own design system, import Figma files into a project and export designs back to Figma.

8 A 2.4 GPA, above 51 of 89

That is against the other AI app builders we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Polymet you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for turning a prompt into front-end screens and prototypes

Polymet turns a prompt into React and Tailwind screens on a canvas, with Figma import and export and a live link to share. But Pro starts at $25 a month for only 1,000 credits, code download and your own domain sit behind it, and it is a browser app only. If you need a finished product with its own back office, it is a design tool first.

TOOLGPA REPORT CARD	Polymet	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	$25 a month for 1,000 credits sits at the top of the $15 to $25 range this category charges, and Team costs $50 for the same credits. The paid plan is what unlocks code download and custom domains.

SUBJECT	GRADE	COMMENT
Free plan and trial	C	Free gives 500 credits every 30 days, capped at 250 a day, with unlimited projects. Published apps carry a Built with Polymet badge, and unused free credits do not carry over.
Features	B	Canvas, visual and code editors, Figma and GitHub in and out, a design system, a backend and publishing. Nothing in the listing is missing from the job of building front-end screens, though credits run out faster on big builds.
Ease of use	C	A browser app where the work is describing and shaping the thing you are building. No store rating is on record, so there is nothing to lift it higher.
Platforms and integrations	B	Web only, but it links to Figma, GitHub, Storybook, npm and Claude Code through its MCP server.
Grade point average		Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Polymet is for

- ✓ Fits if you want working React screens from a prompt, to hand to developers
- ✓ Works for teams that already keep a design system or Figma files

Who it is not for

- ✕ Skip it if you want a finished app with logins and payments built for you, as it is aimed at design and front end
- ✕ Tight if you stay free: 500 credits a month, 250 a day, and a Polymet badge on anything you publish
- ✕ Pricey if you need code download, GitHub export or a custom domain, all Pro at $25 a month for 1,000 credits
- ✕ Watch out: Team is $50 for the same 1,000 credits, and there is no phone or desktop app

Good to know

Good for

- ✓ Product designers and teams that want working front-end code from a prompt
- ✓ Teams with an existing design system or Figma files to build from
- ✓ Prototypes that need a shareable live link for stakeholders

Worth knowing

- ⓘ Credits are spent by AI model usage per message, so large builds use more than short edits; nothing is billed past zero and generations stop when credits run out.
- ⓘ Custom domains, code download, GitHub export, removal of the Polymet badge and premium models are Pro-plan features.
- ⓘ A Keep Alive option at $8 a month keeps a finished project online after a paid plan is cancelled, with 300 credits a month on top of the free 500.
- ⓘ Unused free credits do not carry over; paid plan credits roll over for 30 days after each renewal. The product is a browser app only.

PART 02 · PRICING

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$20.83

A month to start, paid by the year.
There is a free plan too

Polymet has a free plan. Paid plans start at $25 per month for 1,000 credits (Pro), or $250 billed yearly.

> **The paid plan is what unlocks code download and custom domains.**
>
> From our grade for value for money

FREE

$0

500 credits every 30 days (up to 250 a day), unlimited projects and collaborators, canvas, visual and code editors, Figma and GitHub import. Published apps show a Polymet badge.

PRO

$25

per month for 1,000 credits ($250 billed yearly)

Adds credit rollover, custom domains, code download, GitHub export, no badge and premium models. Sizes run from 1,000 to 50,000 credits a month ($1,000).

TEAM

$50

per month for 1,000 credits ($500 billed yearly)

Everything in Pro at twice the price for the same credits, in the same 12 sizes up to $2,000 a month.

ENTERPRISE

Custom

For teams over 10 people: volume pricing, SSO and SAML, audit logs, SOC 2 and dedicated support. Arranged by contract.

The free plan

500 credits every 30 days, up to 250 a day, with unlimited projects and collaborators. Published apps carry a "Built with Polymet" badge.

Read from docs.polymet.ai on Nov 13, 2026.

Ways to pay less

ANNUAL DISCOUNT

2 months free on yearly billing

A yearly Pro or Team plan costs 10 times the monthly price, paid at once, with credits arriving in 12 monthly batches.

Stated on docs.polymet.ai

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

AI product designer that builds screens as editable React code. Here is what it does, as its own site describes it, and what it covers: public API, AI features, real-time collaboration, AI agents, app builder.

> **Canvas, visual and code editors, Figma and GitHub in and out, a design system, a backend and publishing.**
>
> From our grade for features

Prompt-built canvas

The Polymet agent turns a prompt into pages and components on a canvas, as a React and Tailwind app you can click through.

Visual and code editors

Tweak layout, spacing and colors visually, select an element and edit it with AI, or open the code editor for direct control.

Design systems and Figma

Bring your own design system, import Figma files into a project and export designs back to Figma.

GitHub and coding agents

Import from GitHub or a ZIP with two-way sync, export code to a repository, and build in Polymet from Claude Code and other coding agents through its MCP server.

Backend and publishing

Projects can add a backend with managed data and secrets, publish to a polymet.app link, and use custom domains on paid plans.

Team collaboration

Invite members with Admin and Member roles, work live in the same project, and keep versions and branches.

Where it runs

What it works with

Figma · GitHub · Storybook · npm · Claude Code

Polymet is made by Polymet.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

51/89

Other AI app builders it is graded above

Polymet's GPA of 2.4 is higher than 51 of the 89 other AI app builders we grade, and level with 15.

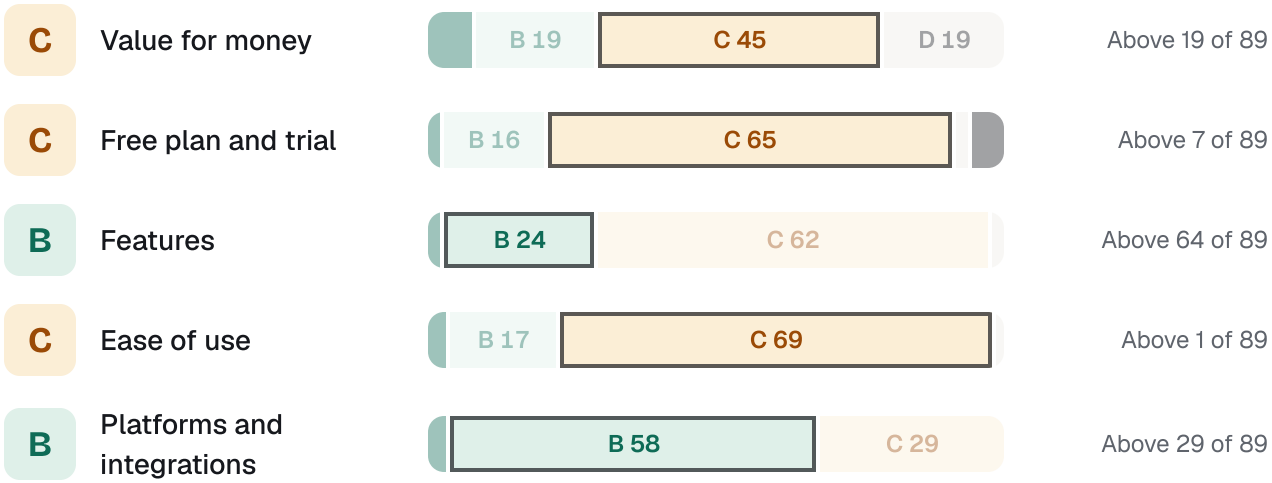

It stands best on features (B, above 64 of 89) and worst on ease of use (C, above 1).

Its paid plans start at $20.83 a month when paid by the year, against a middle price of $20 for the category: 51 of the 82 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 7 tools score higher and cost less.

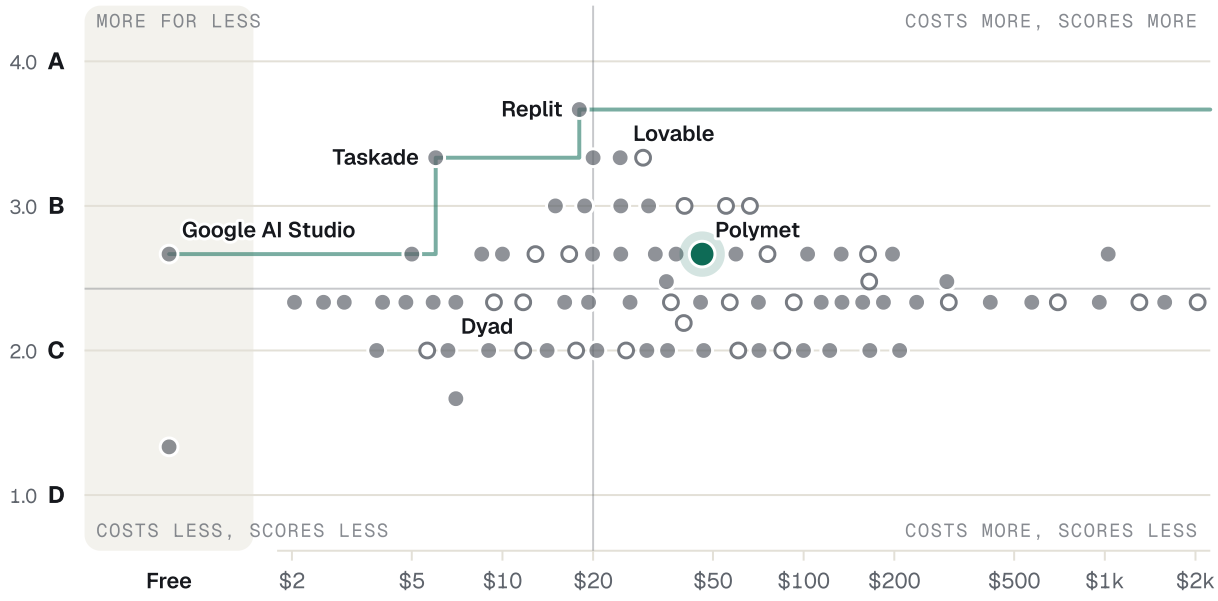

Each grade against the category

Every bar is all 90 AI app builders we grade, cut by the letter each got. Polymet's own letter is outlined.

Price against what you get

Each dot is one of 85 AI app builders. Further left costs less; higher up scores better on features, ease of use and platforms. Polymet is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Polymet you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

It costs $250 a year.

What you could not

- ✕ A tool that builds and hosts other apps.
- ✕ An AI agent, with the models and the safeguards behind it.

- ✕ Several people working in it at the same moment.
- ✕ It plugs into other products, Figma, GitHub and Storybook among them, and has an API.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Polymet's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Lovable, v0, Bolt, Magic Patterns and Subframe

The 5 tools Polymet is most often weighed against, with where each one differs from it.

2.8 GPA

Lovable

Free plan · from $21/mo

Chat-based AI builder for full-stack web apps and websites.

- Only Lovable lists macOS, Windows, iOS and Android apps.
- Polymet also covers AI agents.
- Lovable also covers no-code.

Polymet and Lovable compared in full

2.4 GPA

v0

Free trial · from $30/mo

Vercel's AI agent for building and deploying full-stack web apps.

- Polymet has a free plan. v0 does not, though it has a free trial.
- Only v0 lists an iOS app.

Polymet and v0 compared in full

2.6
GPA

Bolt

Free plan · from $18/mo

Browser-based AI builder for websites, web apps and mobile apps.

- Polymet also covers AI agents.
- Bolt also covers no-code.

Polymet and Bolt compared in full

2.2
GPA

Magic Patterns

Free plan · from $17/mo

AI prototyping tool that builds product UIs from prompts.

- Polymet also covers AI agents.
- Magic Patterns also covers no-code.

Polymet and Magic Patterns compared in full

2.2
GPA

Subframe

Free plan · from $20/mo

Design canvas, coding agent and browser in one desktop app.

- Only Subframe lists macOS and Windows apps.

Polymet and Subframe compared in full

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

14

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Polymet free?

Polymet has a free plan. 500 credits every 30 days, up to 250 a day, with unlimited projects and collaborators.

How much does Polymet cost?

Polymet lists 4 plans. Free: $0.

What platforms does Polymet work on?

Polymet is available on Web.

Does Polymet offer any discounts?

Polymet publicly lists the following: 2 months free on yearly billing.

Does Polymet have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Polymet is listed for Web.

Does Polymet have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Polymet is listed for Web.

Is Polymet open source?

Polymet is not described as open source on its own site, as read on Nov 13, 2026.

Does Polymet have an API?

Yes. Polymet offers a public API, according to its own site.

What does Polymet integrate with?

Polymet's listing names Figma, GitHub, Storybook, npm and Claude Code.

Who makes Polymet?

Polymet is made by a company of the same name.

What are the alternatives to Polymet?

The closest alternatives to Polymet in our directory are Lovable, v0, Bolt, Magic Patterns and Subframe.

How does Polymet compare with other AI app builders?

Polymet's GPA of 2.4 is higher than 51 of the 89 other AI app builders we grade, and level with 15.

Is Polymet good value for money?

ToolGPA grades Polymet C for value for money. Its paid plans start at $20.83 a month when paid by the year, against a middle price of $20 for the category: 51 of the 82 others that charge start lower.

Could I make my own version of Polymet?

To replace Polymet you would be making a tool that builds and hosts other apps.

Where this guide comes from

The prices, plans, platforms and features were read from Polymet's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Polymet's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Polymet. Prices change, so check polymet.ai before you buy.

PART 07 · ABOUT

About ToolGPA

Who made this guide, what else is on the site, and how to cite it

7,721

Tools graded, in 95 categories

ToolGPA grades software the way a school report grades a pupil: five subjects, a letter for each with the reason written beside it, and a GPA that averages them. Prices, plans and platforms are read from each maker's own pages and dated, so you always know how fresh a figure is.

Every grade, review and ranking on ToolGPA is our own judgement. No company can pay for a grade or change one. Every tool on the site has a guide like this one, free to download and pass on. It all lives at **toolgpa.com**.
